# WELCOME TO ESSENS

This year, ESSENS will celebrate its tenth anniversary. Ten years since the launch of the very first perfumes, ten years since our products became an inseparable part of your lives, your life stories. This year, there are a series of catalogues to help you get better acquainted with the benefits of popular product lines. You are now holding in your hands a clear portfolio of premium cosmetics, which always stays abreast of world trends and brings added value to the market.

# PERFUME

## 20% AROMATIC ESSENCES = ELITE AMONG PERFUMES

ESSENS perfumes are primarily created with emphasis on the highest possible quality. Our production is certified by GMP (Good Manufacturing Practice), ISO 9001-2008 and fulfils the strictest rules and standards of the EU. We guarantee the content of 20% aroma essences (essential oils), exclusively supplied by SELUZ, one of the world's leading producers for private brands, which ensures that we rank amongst the elite of perfumes.

## LET'S IMAGINE THE MOST SIMPLE EXPLANATION OF THE PRODUCTION PROCESS

Essences of the highest quality are first mixed with pure perfume alcohol. Only distilled water is used to denature the perfumes so that the fragrance and the quality of the final product is not at all influenced. The resulting mixture is supercooled to a temperature of -7 °C and is then perfectly filtered with the use of a 10-micron mesh. For the components to be able to bind into a harmonic unit, the perfume matures for at least 8 weeks in stainless steel storage tanks. Our flacons, created by Italian masters in a renowned glass workshop, are cleaned by air and filled with these perfumes. The resulting products are packed into their boxes, which possess a design with the emphasis of purity.

All production steps are under constant control of quality and only faultless materials are used for the production. All of our products are certified and registered for sale in every country, where an ESSENS branch is established.

# OUR FRAGRANCE, OUR REPRESENTATION...

The emotion that the perfume evokes plays the most important role for choosing your fragrance. Our skin type, everything that we eat about and how we feel, then subsequently forms the final scent that passers-by and people perceive. And that's why the same perfume may smell a little different on each of us.

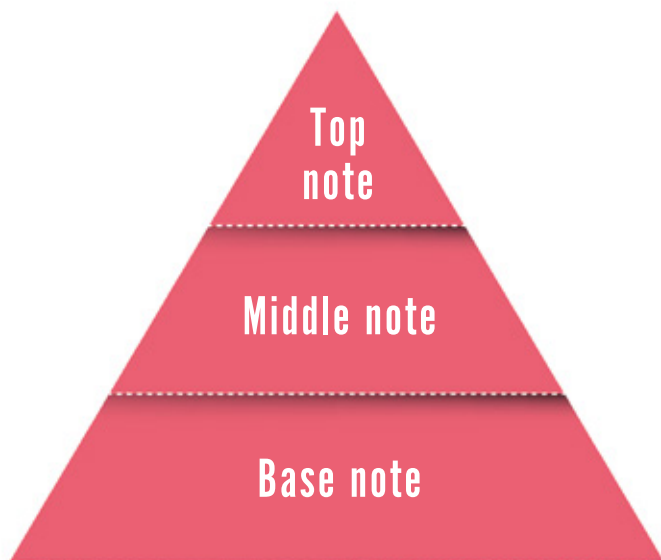

Attention should be given to selecting the right perfume for your yourself. All the scents we would like to present to you are also available in the form of small samples. The aromatic compounds are gradually released over several hours, so you have a unique opportunity to try the perfume on your own skin and choose the best scent, crafted especially for you.

Keep in mind that each situation is an opportunity for a different type of scent with a different intensity. To school or to work we choose distinctively lighter fragrances which do not irritate anyone who surrounds you and that can only compliment your own personality. On the contrary, an evening occasion deserves a more distinctive fragrance that will underline your charisma.

## THE MAGIC OF LASTING FRAGRANCE

- The perfume works best where the skin is most perfused with blood. It is recommended to apply behind your ears onto your neck, wrists, elbows or even ankles
- For a lower intensity of the perfume, it is sufficient to walk into a fragrance cloud created by spraying the perfume in front of yourself
- To make the fragrance last longer it is advisable to enhance it by using complimentary products of the same aroma
- The scent is also kept for a long time in freshly washed hair
- Clothes should be put on after the perfume has been absorbed into the skin

## Top note

Very intense fragrance that is recognised immediately after application; this sensation lasts a few seconds, but in some perfumes this may even last up to 15 minutes.

## Middle note

Fragrance that can be sensed after the unwinding of the top note, the intensity lasts roughly 2-3 hours.

## Base note

In this phase, the fragrances are released slowly; the duration is extended for a few hours, sometimes even tens of hours.

**EDS**, Eau de Solide / Sport, more commonly known as sports or splash perfume, contains 1% of aromatic compounds

**EDC**, Eau de Cologne, known simply as Cologne, contains 4-6% of aromatic compounds of fragrant essences

**EDT**, Eau de Toilette as it is known, contains 6-12% of aromatic compounds

**EDP**, or Eau de Parfum as it is known, contains 12-15% of aromatic compounds

**Perfume** is the highest quality and most intensive fragrance that can be purchased on the market, contains 15-40% aromatic compounds

# ESSENS WOMEN'S PERFUME

Appropriately chosen perfume should complement not only the personal fragrance of the user, but also her personality in a natural and undisturbed manner. It should emphasize her charm and glamour. Nothing is ingrained into a person's memory when meeting a woman as much as a pleasant scent.

The truth is that every fragrance is suitable for a different occasion, for different seasons. Therefore, it is not enough just to perfectly harmonise the outfit, but also to adjust to the appropriate perfume.

The basic ESSENS perfume portfolio is regularly updated, taking into account the latest world trends. In our offer you will find a varied palette of the most trendy fragrances from which everyone will surely choose.

# ESSENS MEN'S PERFUME

We live in a time where perfumes are no longer only a woman's privilege. Modern men use aftershaves equally as often, emphasising their healthy self-confidence, masculinity and strength. They play an important role during business and personal meetings, as a suitably chosen aftershave underlines charisma and can be the basis of success.

At ESSENS, the basic portfolio of men's aftershaves are regularly updated according to the latest world trends to meet the most demanding requirements of modern men.

- The antibacterial and anti-inflammatory effects of lactoferrin and lactoperoxidase inhibit inflammation and skin irritation
- Beneficial effects on skin cell regeneration due to the positive effect of growth factors
- Regeneration of skin cells, acts against aging, so-called anti-aging effect
- Protection of the skin from all-day exposure to adverse external influences
- Paraben and pollutants free, non-toxic to the environment
- For everyday use, optimal for people with sensitive skin
- Helps in the removal and treatment of skin defects and acne
- The removal of mimic wrinkles is accelerated
- Natural raw materials of the highest possible quality

# ESSENS COLOSTRUM SHOWER GEL

- This gently scented shower gel is suitable for everyday use and is optimal for those with sensitive skin
- The hemp oil - used within, treat skin diseases, is hypoallergenic, helps restore the naturally protective microfilm of the skin, slows the ageing of the skin, moisturises and softens whilst also possessing strong anti-inflammatory and anti-bacterial effects
- Natural ingredient lauryl polyglucose, from the extracts of corn and coconut oil, creates a rich, thick and stable foam
- Glucose guarantees the highest possible softness of shower gel
- High-performance detergents guarantee the excellent removal of impurities from the surface of the skin
- A special formula eliminates any sensitivity to the hardness of water and retains excellent washing qualities

# ALOE VERA

# ALOE VERA BARBADENSIS MILLER

Aloe vera may grow up to 100 cm and is a succulent perennial herb with a short stem and a rosette of sparsely growing, spiny leaves. Plant origin is mostly attributed to the Nile basin, but is now cultivated in climatically conforming regions around the world. The pulp of the leaves is formed by colourless cells with a gel-like content that has clinically proven health benefits and is therefore used as a food supplement and has now found its place in the cosmetics industry. Aloe Vera Gel contains amino acids, vitamins, minerals, enzymes, polysaccharides and many other beneficial substances.

## BENEFITS OF COSMETICS CONTAINING ALOE VERA

- They have been designed on the basis of the latest research, knowledge and trends
- Parabens and pollutants free, are non-toxic to the environment
- Natural raw ingredients of the highest possible quality
- Suitable for everyday use and optimal for those with sensitive skin and susceptibilities toward acne, herpes, eczema or fungal infections
- Aloe vera helps to reduce bacterial growth and is highly valued for both its antibacterial and anti-inflammatory effects
- Aloe vera is easily absorbed deep below the surface of the skin and stimulates fibroblasts (basic cells of connective tissue found within different parts of the human body) resulting in the accelerated recovery of cells

## CBD

Just as the ESSENS Scientific Board team is behind the ESSENS CBD Capsules supplement, we can also find their signature on the CBD cosmetics.

CBD known as cannabidiol is one of the main cannabinoids contained in the cannabis plant. It is a non-psychoactive component with significant therapeutic potential for a number of health problems. In addition to its use in pharmacy, it is also abundantly represented in cosmetics, where it relies on its positive effects on a number of dermatological problems, whether it is dry skin, psoriasis, eczema or acne.
