Spiritual Awareness

Who are we, where are we from and what are we capable of?

Ok, so whatever you like to call it, Heaven, the Universe, in the clouds etc I like to call it Source. This my lovelies, is our home and it is where we are from and where we live in between our lifetimes (incarnations).

All of us are magical beings which magical powers and we are capable or ANYTHING and we can create ANYTHING and EVERYTHING we desire. There is only one thing that we cannot control and that is death. The rest, we can!

However, even death is something we will have had a say in when we were home before choosing each lifetime. So firstly, lets have a bit more of a look at Home / Source and where we come from.

We and our guides are all together at Source and we discuss which lifetimes we are going to go in to and what goals and lessons we need to achieve and learn. We agree not to remember and will be automatically born with some amnesia. If we can remember where we are from and what we are doing it could interfere with your lessons to be learnt.

At the end of each lifetime it is believed that our soul leaves our body through the top of our head. We all take various journeys back to soul and each depends whether we are a new soul or an old soul that has been through the process many times.

The consensus is that we travel through energy and light and sometimes a tunnel, but we are met by our spiritual adviser guides. We can also be met by loved ones too, but our guide will appear soon after. (Older souls are not always met by their guides straight away as they will be so familiar with the process, they will know what to do).

We are then taken through various healing processes to heal from any memories or damage that was caused by this lifetime. Following this we are back with our guide to have a full blown discussion to see what worked and did not work in our recent lifetime. (This is a brief explanation).

So that is a bit of background on who we are and what happens. However, alongside this, we can use our soul energy to get creative and do anything!!!

Some examples of what we are capable of:

Manifesting ANYTHING we want

Reading people's minds / telepathy

Remote viewing

Reading complete strangers and just knowing details about them without ever meeting them before

Feeling other people's ailments and emotions

Looking into the future and see what is happening

Connecting with loved ones that have passed (in source)

Seeing Auras around others

Working with chakras

Healing others and ourselves

Being fully aware of where we are from and even of past lives

These are just a few examples and throughout this Academy I am going to show you how!

Extra sensory Perception

Extra sensory perception means "outside the senses" our awareness. The main 5 senses are sight, touch, hearing, smell, and taste. There is actually more which we will discuss. ESP is the ability to receive and process information independent of our five senses.

Lets look at them individually.

Sight

Some people will see inwardly in their mind whilst others will see objectively (outside of their body)

For example, when I am speaking with spirit, they will appear in my mind and I hear them in my mind.

However, I have also seen ghosts/ spirits as physical beings right in front of me.

Touch

I will use Psychometry to explain touch. Psychometry is the ability to touch an object and just know things about the owner of the object or perhaps where the object originated. For example, at times when I have read for clients, I have asked for an object to help me to connect with them. Mostly, they will give you jewellery although I have had all sorts. If someone try's to give you a ring that their parent passed to them then you will end up getting information on the parent rather than your client.

Hearing

This is when you are able to hear things either internally like via your mind or objectively outside of your ears, just like a normal person is speaking to you. The latter is more rare, just as it is rare to see objectively, but it is absolutely possible and I have been lucky enough to experience both.

Spirit or your guides are able to communicate via these ways. The issue us humans have is that we doubt what we hear! It is very difficult to trust in our senses but once we gain that trust it will just start to flow.

Smell

With smell, this is our ability to smell things that our normal senses are not able to detect. For example, often people will talk about smelling a deceased loved ones perfume or tobacco if they were smokers.

Taste

This is the ability to actually taste things beyond our "normal" senses. To give you an example, during a reading I had brought through the clients father and got the sudden taste of brown sauce for no reason and it completely resonated for the client as her father had like to add brown sauce to everything he ate, including curries and stews! It always fascinates me what we and our fellow souls are capable of.

Knowing

"knowing" this is something I have grown up with since I can remember. I mean I literally grew up completely "open" with these senses which some people do. For others, they develop later in life or some never in this life time.

A knowing for me is when information is just given to you, you just know but you do not know how you know!

A knowing for me is when information is just given to you, you just know but you do not know how you know! Yes it sounds crazy but I am pretty sure many of you reading this will have experienced it for sure.

You may know what someone is going to say, you may know that someone is going to call you, you may know a situation that is going on around you that you haven't yet been told about.

You may also know about future events / premonitions.

Gut Feelings

Another strong and very common one. So many of us get these feelings deep inside our stomach. We often say this aloud too "I had a gut feeling about that". Never ignore it, it is always right.

I once heard an old boyfriend on the phone and despite me never doubting him, my gut was strongly telling me that he was on the phone to a woman even though he said it was a guy.

My mind was saying why would he lie? but my gut was saying something wasn't right. So after being a bit of a detective I found out that yes he was talking to a woman and she fancied him. Always trust your gut.

Telepathy

This is the ability to read another persons thoughts and yes it is completely real and possible! When you think about it, you may realise its more common or in your life more than you think. Have you ever been close to someone where you naturally know what they are about to say or you know what they are thinking and perhaps you may say it before them. This is telepathy! This is it in it's mildest form but you can teach yourself to communicate with another person using your minds only.

Precognition

This is the ability to see in to the future. Whether it is major events or peoples situations. We all again have this ability.

Retrocognition

This is the opposite to precognition. This is the ability to look back in to peoples past, including as far as past lives. You will also at some point have experienced Deja vu where you have felt you have been somewhere before. This is you recognising something from a previous life, so a past memory.

All of us have past lives, some just a few and some 100's of lives. You have heard the say "he is an old soul" that is because it is likely that person IS an old soul who has had many lifetimes.

Telekinesis

This is the ability to move objects with your mind. The mind is an extremely powerful tool.

Now do you see, we truly are very magical beings. We can do all of this. Without realising, so much of it is already happening in our daily lives and the bits that are not, then we can learn them. It is all about just tapping in to what and who we are.

Imagine what you can do in your life when you start to ignite all of this?

Also, this would enhance our manifesting methods. With manifesting, we are just directing our thoughts straight to the universe and dealing with them on a 1 to 1 basis.

We are our own creators? We all need to find out our soul purpose to see what we wanted to achieve in this life time. Using all of our abilities will totally enhance that.

"Look within and unleash your magic"
