

RABBIT CARE 101

A Quick Guide for New Happy Rabbit Parents

HOUSING

Rabbits should be kept inside with plenty of room to run.

Remember: This is just their home base. Rabbits should be free to roam 2+ hours a day.

FEEDING

- Hay should be available in or above their litter box 24/7.
- Greens are given twice a day. (Full list available on our website).
- Fresh water should be available in a non-tippable dish (no bottles).

Litter Boxes

Rabbits like to eat and go potty in the same place. Not all litter is created equally. Safe options for your rabbit include: paper, horse pellets, & newspaper. It is important to completely change out your rabbit's litter box every other day. Their litter habits are a window to their health!

Toys

Because rabbits love to chew, toys are very important! Toys not only help your rabbit's teeth but also keep them happy and healthy. Try things like timothy hay huts, apple sticks, & seagrass twists.
