

**Dutch Oven Treats!**

**Pile- Burning Workshop**

# Serving Lake County

The Lake County Umbrella Watershed Council provides education activities for youth in Lake County along with hosting tours and workshops for adults. We connect our youth and landowners to the experts in the field while providing research based land and stream restoration strategies and techniques.

# Education and Outreach

*Lake County  
Umbrella Watershed Council*

## Focal Areas

- Stream Restoration and Enhancement
- Riparian Area Management
- Fish Passage and Screening
- Forest Health Treatment
- Juniper Reduction
- Wildlife and Habitat Improvement

# Our Program

---

**OUTDOOR SCHOOL:** The LCUWC coordinates the outdoor school for students of North Lake and Paisley 1st - 6th grades - providing hands on activities while connecting students to the natural resources of our area.

**FIELD MONITORING:** We work with high school teachers to introduce and apply monitoring methods and techniques used in the field.

**WORKSHOPS and TOURS:** The LCUWC connects landowners to resources and strategies that can be used to restore and enhance their land and stream for long term benefits. Check out our website to learn about current and past projects showcasing a holistic approach to watershed function - from the upland forest health treatments to fish passage in the stream.

**FAIR BOOTH:** View an array of projects implemented throughout the county at the Lake County Fair each Labor Day.

**WEEDS AND WATERSHED GATHERING:** Together, The Lake County Cooperative Weeds Management Organization and LCUWC host an annual event each December highlighting the year in review - while providing a presentation on current land management studies and topics of interest.

## Outdoor School

- Connect with the Experts
- Hands-On Activities
- Dutch Oven Treats (Big Hit!)

## Field Monitoring

- Presentations
- Real World Application
- Field Monitoring Methods

## Workshops / Tours

- Slash-Pile Burning
- Off-Site Water and Spring Development
