

GROW WITH THE

FLEX ACRE™

The Flex Acre™ farm system maximizes vertical space to grow fresh food at a commercial scale with no prior farming experience required. The system matches the industry-leading energy efficiency of the Flex Farm™ with four times the output. Flex Acre™ farms are mobile and operate with a self-contained water system and pump.

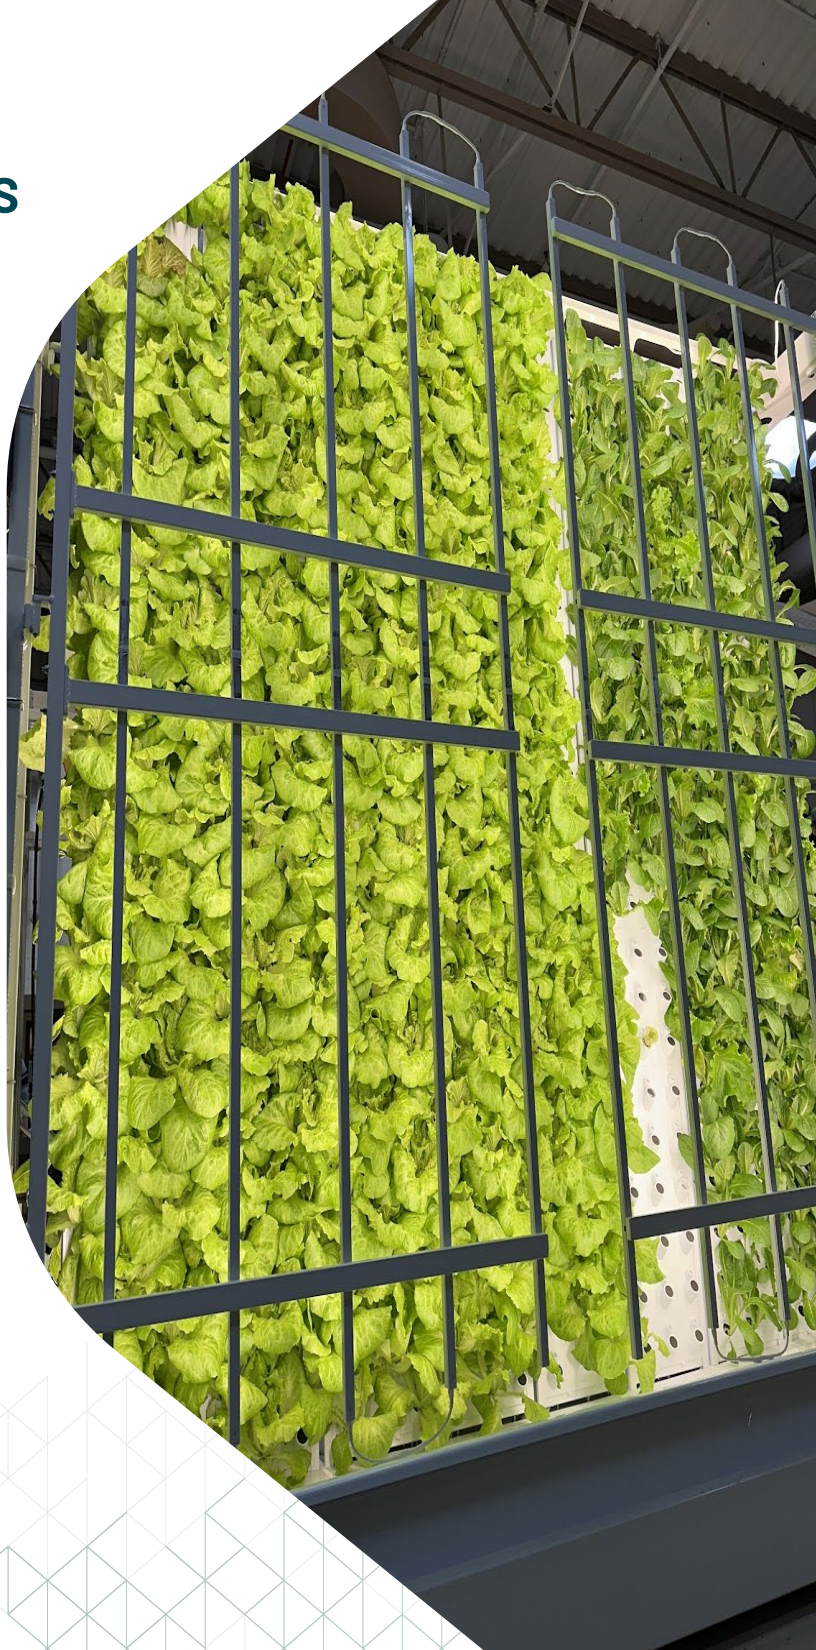

ACRE FEATURES

- Indoor Growing
- 100+ lbs per 4 week harvest
- Made in USA
- Free Access to Farmative
- Grow for \$1 per lb
- Expert Growing Support

ACRE CONNECT™

Up to 12 Flex Acre™ farms can connect to a single Acre Connect™ plumbing system, maximizing the benefits of vertical hydroponic gardening.

Efficient, scalable hydroponic technology

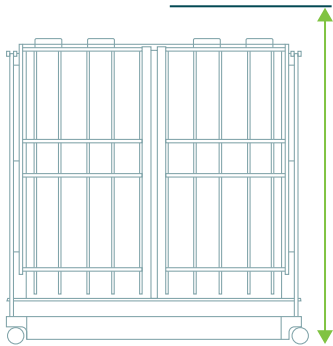

LENGTH: 108"

WIDTH: 31.5"

RECOMMENDED
CLEARANCE: 144"

HEIGHT: 111.75"

FLEX ACRE™ SPECS

- Weight (with water) starts at 1,800 lbs
- 9' x 9' x 3' per Flex Acre™ farm
- 1,152 plant spaces
- Caster unit
- Dishwasher safe panels
- Quick disconnect irrigation for modular space optimization

REQUIREMENTS

- At least 12 ft clearance height recommended
- Temperature-controlled 68°F to 75°F (20°C to 24°C)
- 800 watts for each electrical light
- Accessible water source (e.g. sink)
- Secured growing space recommended
- Flat, concrete floor
- Code-compliant discharge for condensate is required (e.g. mop sink or floor drain)

FLEX ACRE™ vs Traditional Agriculture

ZERO FOOD MILES

98% LESS LAND

98% LESS WATER
