Food Needed for 7 Days

A typical healthy, adult cat weighing up to ten (10) pounds will need approximately two (2) pounds of food for a 7-day period.

Water Needed for 7 Days

A typical healthy, adult cat weighing up to ten (10) pounds will approximately two (2) gallons of water for a 7-day period.

NOTE: These are only estimates. You and your veterinarian are best to determine your pet's individual needs.

CATS

If evacuating, take your pet. If it's not safe for you, it's not safe for them. Evacuating early makes the process less stressful. Additional helpful planning tips:

Identify a trusted backup caretaker and give them a key in case you're not home.

Pet-friendly shelters should be available in most disasters. Call your local emergency management agency to ask about their plan for animals in disaster.
