

# Attaching USB Token / DSC (Digital Signature Certificate) on Traces Website

<https://contents.tdscpc.gov.in>

This document aims to help user to attach USB Token / DSC on Traces Website.

This is document is published for the domain users of vijayco.cloud

## Table of Contents

1. Error Statement	3
2. Potential Causes	4
3. Resolutions	
a. Windows Firewall Blocking emSigner	5
b. Java Version Required	9
c. Add Sites to Chrome	9
d. Add Sites to Java	11
4. Final Check	12

## Error Statement

Error in establishing connection with TRACES WebSocket Emsigner. Please ensure that Web signer setup is installed, and service is running on your machine and there are no proxies enabled on the browser while doing DSC activities.

A screenshot of the TDS TRACES portal. The header includes the TDS logo and the text "TRACES TDS Reconciliation Analysis and Correction Enabling System". Below the header is a navigation menu with options: Dashboard, Statements / Payments, Defaults, Commission/Offers, Downloads, Profile, and a "Home" button. The main content area shows a "Welcome" message and a "Choose KYC Flow" section. The "Choose KYC Flow" section contains a message: "Error in establishing connection with TRACES WebSocket Emsigner. Please ensure that WebSigner Setup is installed and service is running on your machine and there are no proxies enabled on the browser while doing DSC activities." Below this message are two radio button options: "Digital Signature supported KYC selection" (which is selected) and "Normal KYC selection (Without Digital Signature)". A "Webinar DSC" link is visible at the bottom left. To the right of the text is an image of several USB keys.

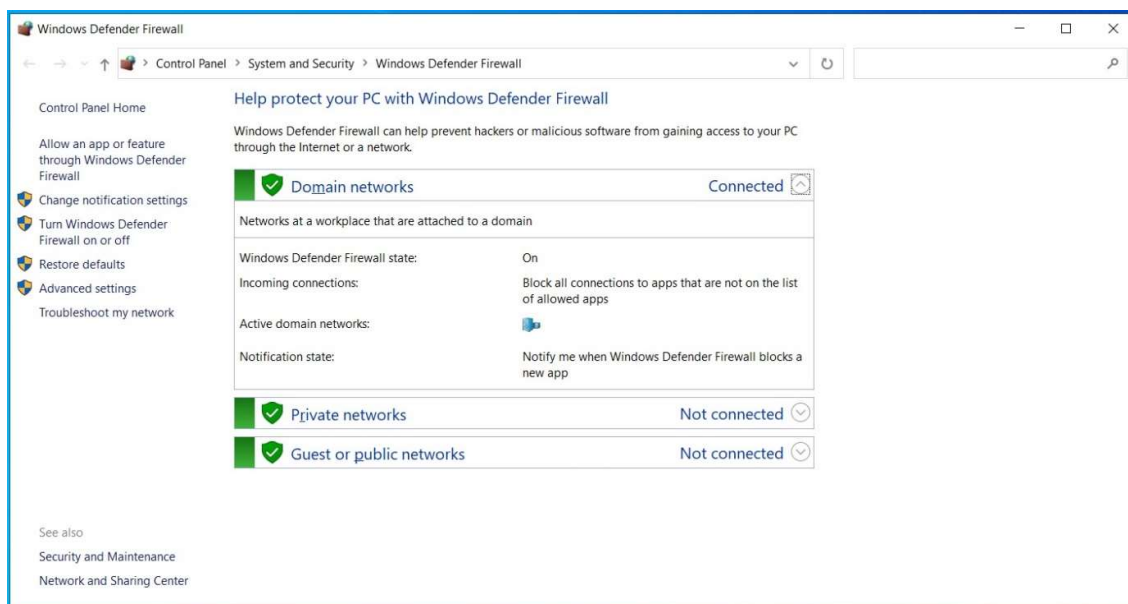

## Potential Clauses

1. Windows Firewall is blocking Emsigner
2. Java Version required : Any 32 Bit or 8.0.1620.12
3. Traces website and Emsinger Port is being blocked by Chrome & Java Security.

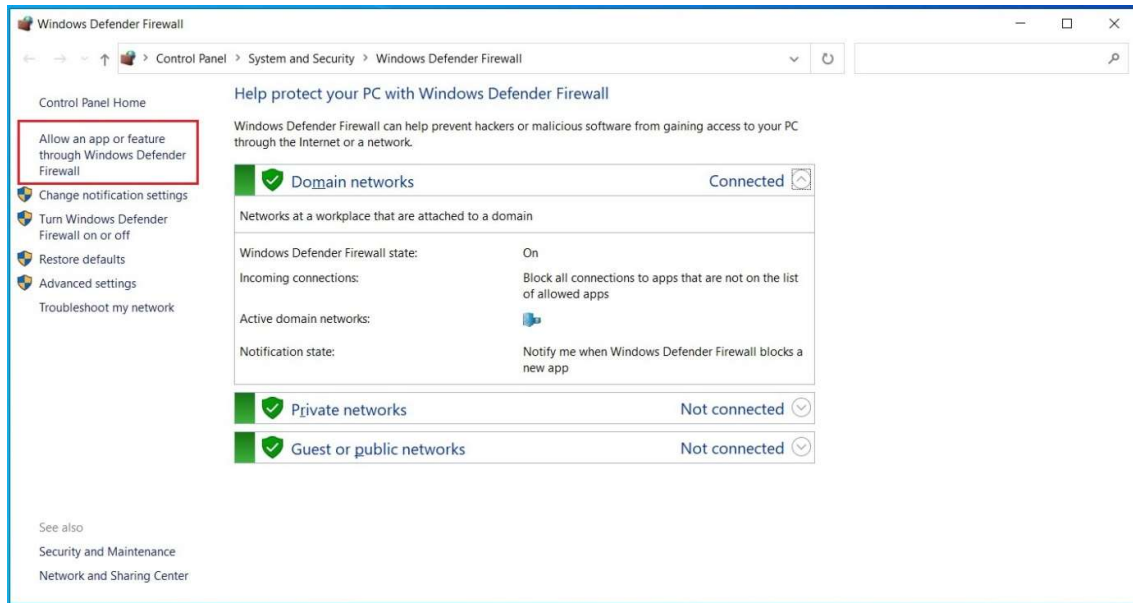

## Resolutions to above problem

### 1. Windows Firewall blocking emSigner

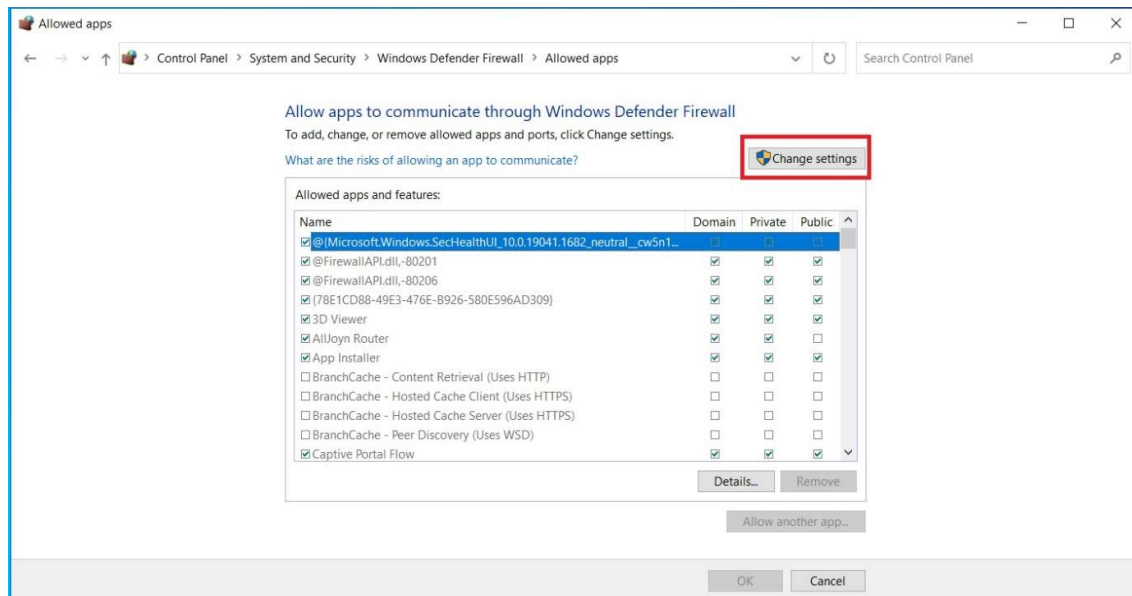

- Step 1 : Go to Start → Windows Defender Firewall

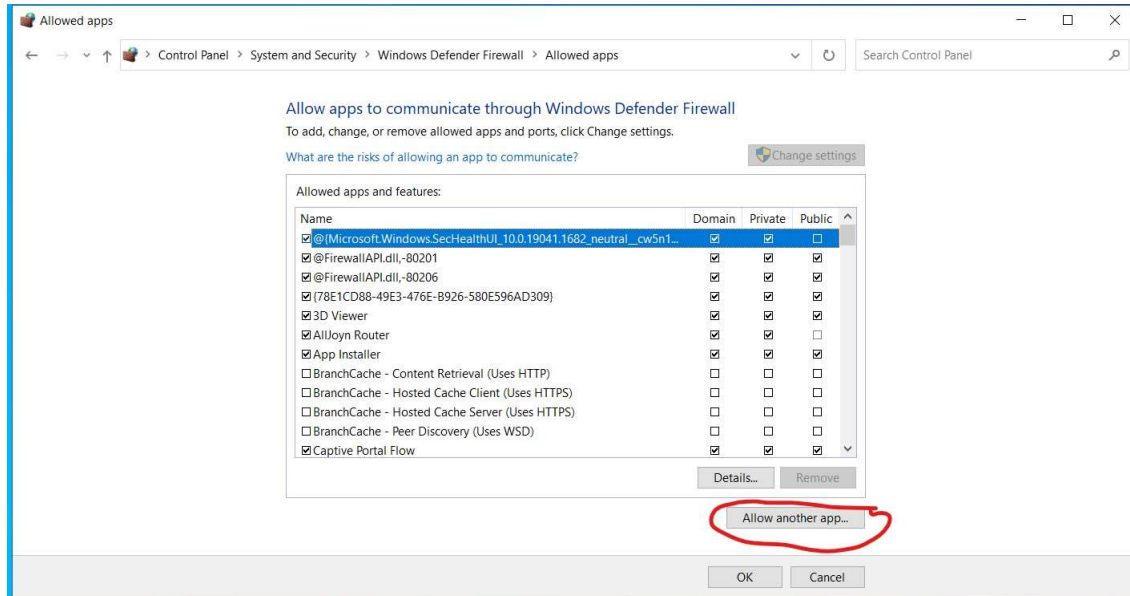

- Step 2 : In the left panel, click on “Allow a program through windows firewall”

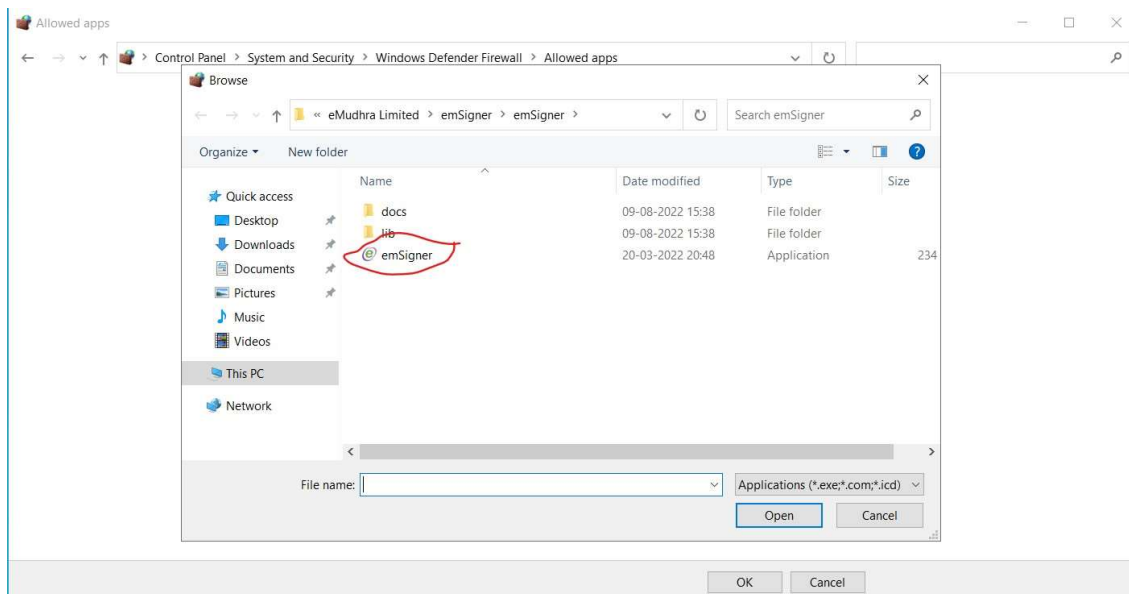

- Step 3 : On the top left corner click on “Change Settings”

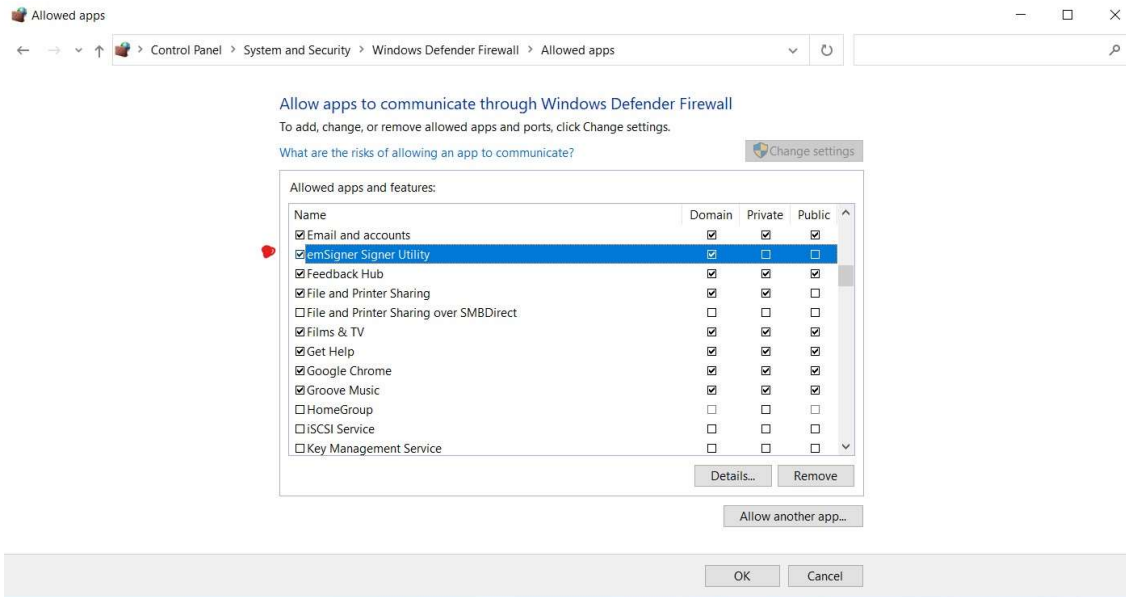

- Step 4 : Click on “Allow another app”

- Step 5 : Add “emSigner”

- Step 6 : You will see, emSigner Singer Utility is added to Allow Apps.

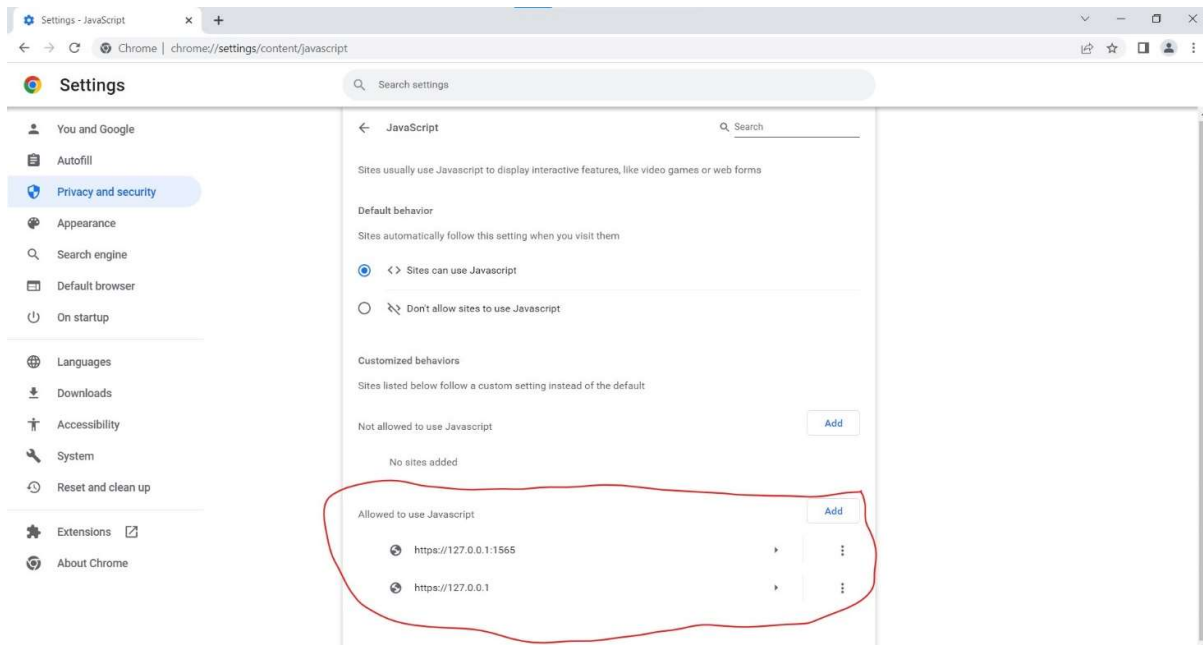

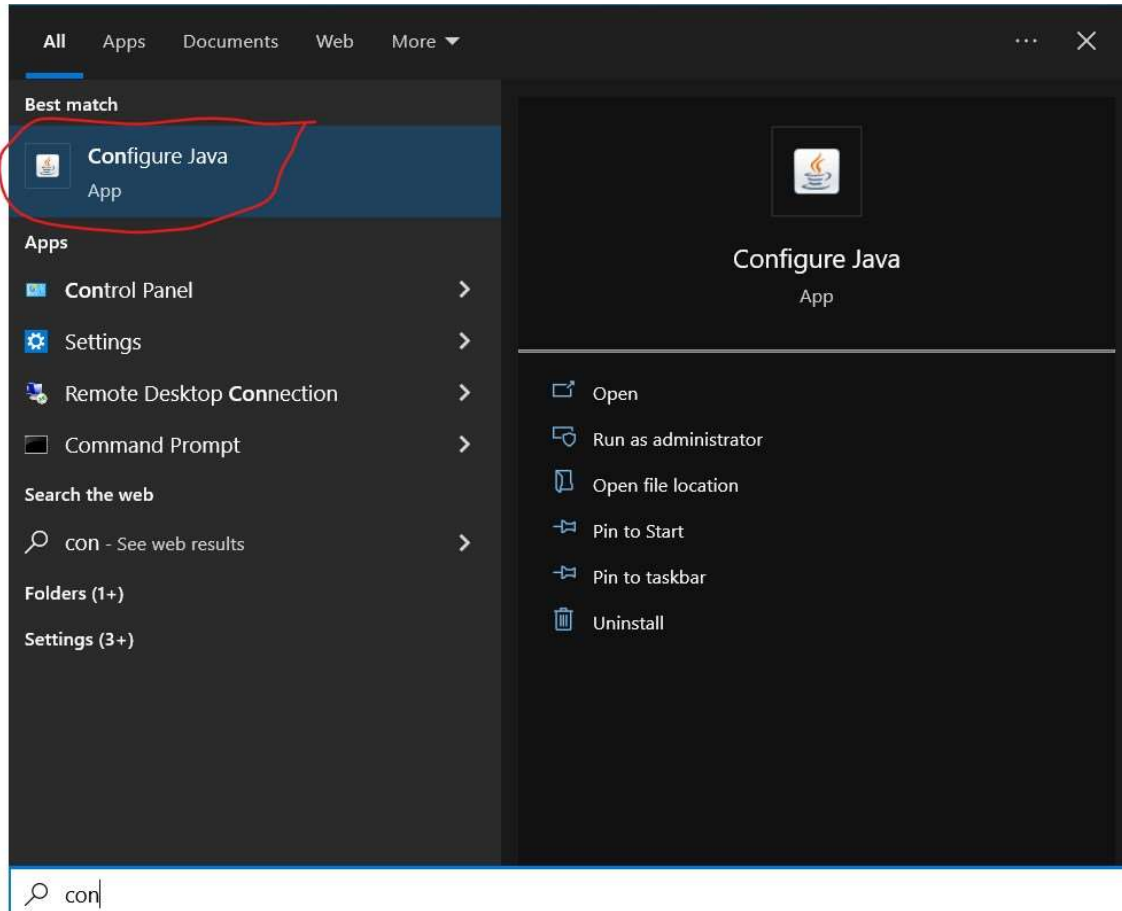

## 2. Java Version Required : Latest 32 bit or 8.0.1620.12

- Step 1 : Download the latest 32-bit Java Version from Java website or down 8.0.1620.12 version.
- Step 2 : Install the above downloaded version on your PC.
- Step 3 : Open Google Chrome
- Step 4 : Settings or type in chrome://settings/content/javascript in the address bar of chrome browser
- Step 5: Site Settings
- Step 6 : JavaScript
- Step 7: Allow the following sites to **Allowed**
  - <https://127.0.0.1:1565>
  - <https://127.0.0.1>

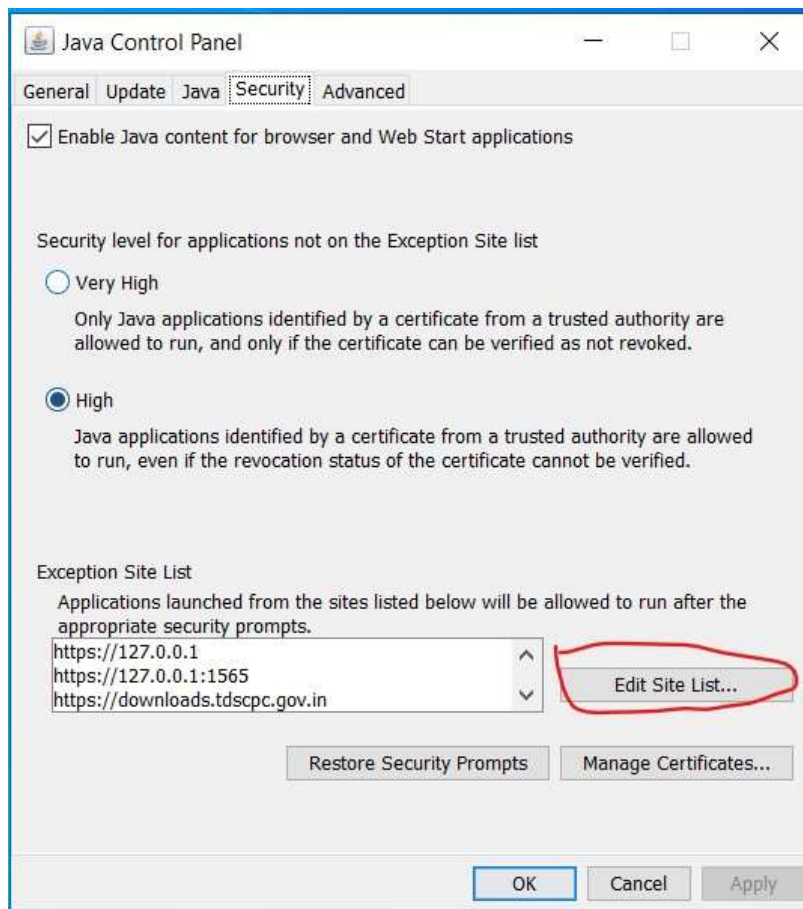

as below:

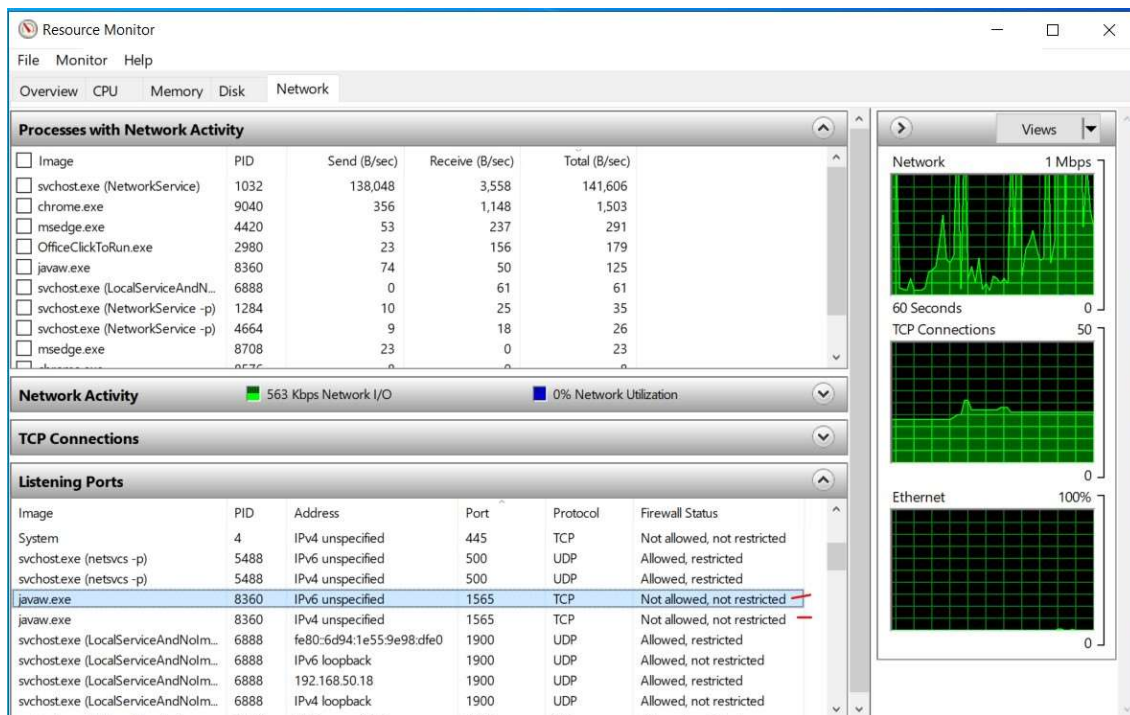

- Step 8 : Start->Configure Java → Security

- Step 9: Edit Site List:
  - Add following sites
    - <https://127.0.0.1:1565>
    - <https://127.0.0.1>
    - <https://tdscpc.gov.in>
    - <https://downloads.tdscpc.gov.in>
    - <https://files.tdscpc.gov.in>

- Step 10: After above changes, kindly restart emSigner in admin mode (i.e., Run as Administrator) and verify whether Emsigner is running without being blocked by Windows firewall.
  - To check and confirm
  - Step 1: Go to Start → Resource Monitor → Network → Listening Ports

Now its complete.

Check the Traces portal it should function properly.
