
RECALIBRATE- RECONNECT-REDIRECT

M⁴ Marilyn's Monday Morning Message

Every leader hits moments where they need to **recalculate**. You start the year with a vision and direction, but mid-year realities often shift the landscape. Priorities change, new obstacles emerge, and opportunities appear that weren't on the original map.

GPS Leadership invites a strategic pause to:

Recalibrate: Take a fresh look at your destination. Are your current actions aligned with your most important goals? Is your energy going where it matters most? **Reconnect:** Touch base with your team, stakeholders, and mission. Reengaging relationships and rechecking signals ensures you're not leading in a vacuum. **Redirect:** Be willing to adjust. The fastest route isn't always the original one. Agility and clarity go hand in hand when stakes are high and time is tight.

July is the perfect time to step back, scan the dashboard, and make smart course corrections. Leadership isn't just about driving—it's about navigating.

MAJOR POINT

Strong leadership isn't just about moving forward—it's about knowing when to pause, reassess, and choose the best path forward. In a fast-paced world, GPS leadership helps you adjust your route without losing momentum.
