

Energy Independence through Hydrogen and Fuel Cells

# Media Release

April 5, 2022

## **BNG Clean Fuel Corporation Has Selected Engineering, Procurement and Construction, LLC (EPC) for a Second Exclusive Agreement in MENA.**

**Denver, Colorado and Cheyenne, Wyoming, USA** – BNG Clean Fuel Corporation (BNG) has selected Engineering Procurement and Construction, LLC (EPC) to be the exclusive supplier to provide design, permitting, fabrication, and construction management of green hydrogen projects for high horsepower and transportation markets in the Middle East and North Africa (MENA) region.

This follows a similar agreement this past February with EPC for the USA market.

The BNG management team has over 120 years of combined oil & gas operations experience across all the regions of the world with much more focus on MENA (Middle East & North Africa), Russia, Central Asia, South & East Asia, Far East, China and Australasia regions. The MENA agreement will tap into the BNG Team's high level of experience, contacts, and culture familiarity with the region to build business opportunities and fuel Company expansion.

### **About BNG Clean Fuel Corporation (BNG)**

BNG is focused on the production, storage, and delivery of hydrogen fuel to high horsepower Industries including power, marine, rail, oil & gas, mining, and transportation markets throughout the NAM and MENA regions.

BNG is currently in the process of developing an "integrator model" to design, develop, build, and operate facilities. The company plans to build a series of "**hub, spoke and wheel model**" facilities with hydrogen production, virtual pipeline networks, bulk cargo shipping, and fuel dispensing stations. BNG is in discussions with several major energy companies to help accelerate investment and buildout according to the Paris Agreement of Net Zero Carbon 2050.

## **About Engineering Procurement and Construction, LLC (EPC)**

With over 20 years' experience as a system integrator for hydrogen infrastructure systems, EPC is the industry leader in fabricating containerized hydrogen solutions. EPC has been instrumental in the design, development, and construction of over 120 hydrogen infrastructure projects, in California and throughout the world.

EPC is a one stop shop for turnkey engineering, design, and fabrication of your next hydrogen infrastructure project. EPC designs and builds containerized hydrogen solutions for a range of applications. EPC's shop installs these H2 systems into shelters and containers, test these systems in their fabrication facility to dramatically reduce field installation time and costs. Containerized systems range from small H2 high pressure storage packages, to 40-foot H2 production/storage/dispensing container systems.

EPC's engineering offices are collocated with their new 30,000 sq. ft. fabrication facility in Cheyenne, Wyoming.
