## Guild of heroes guide

View source This wiki holds all the little knowledge about Guild of Heroes world. As game have no sufficient guides, official notes or in-game memos, all information here is gathered through experience and observation, thus a subject of questioning. Game Version: 1.47.6 Daily Quests added. New tab next to Achievements with 5 rewarding challenges. Unique chest is given for completing all tasks. F.A.Q. Q. How do I change class? A.

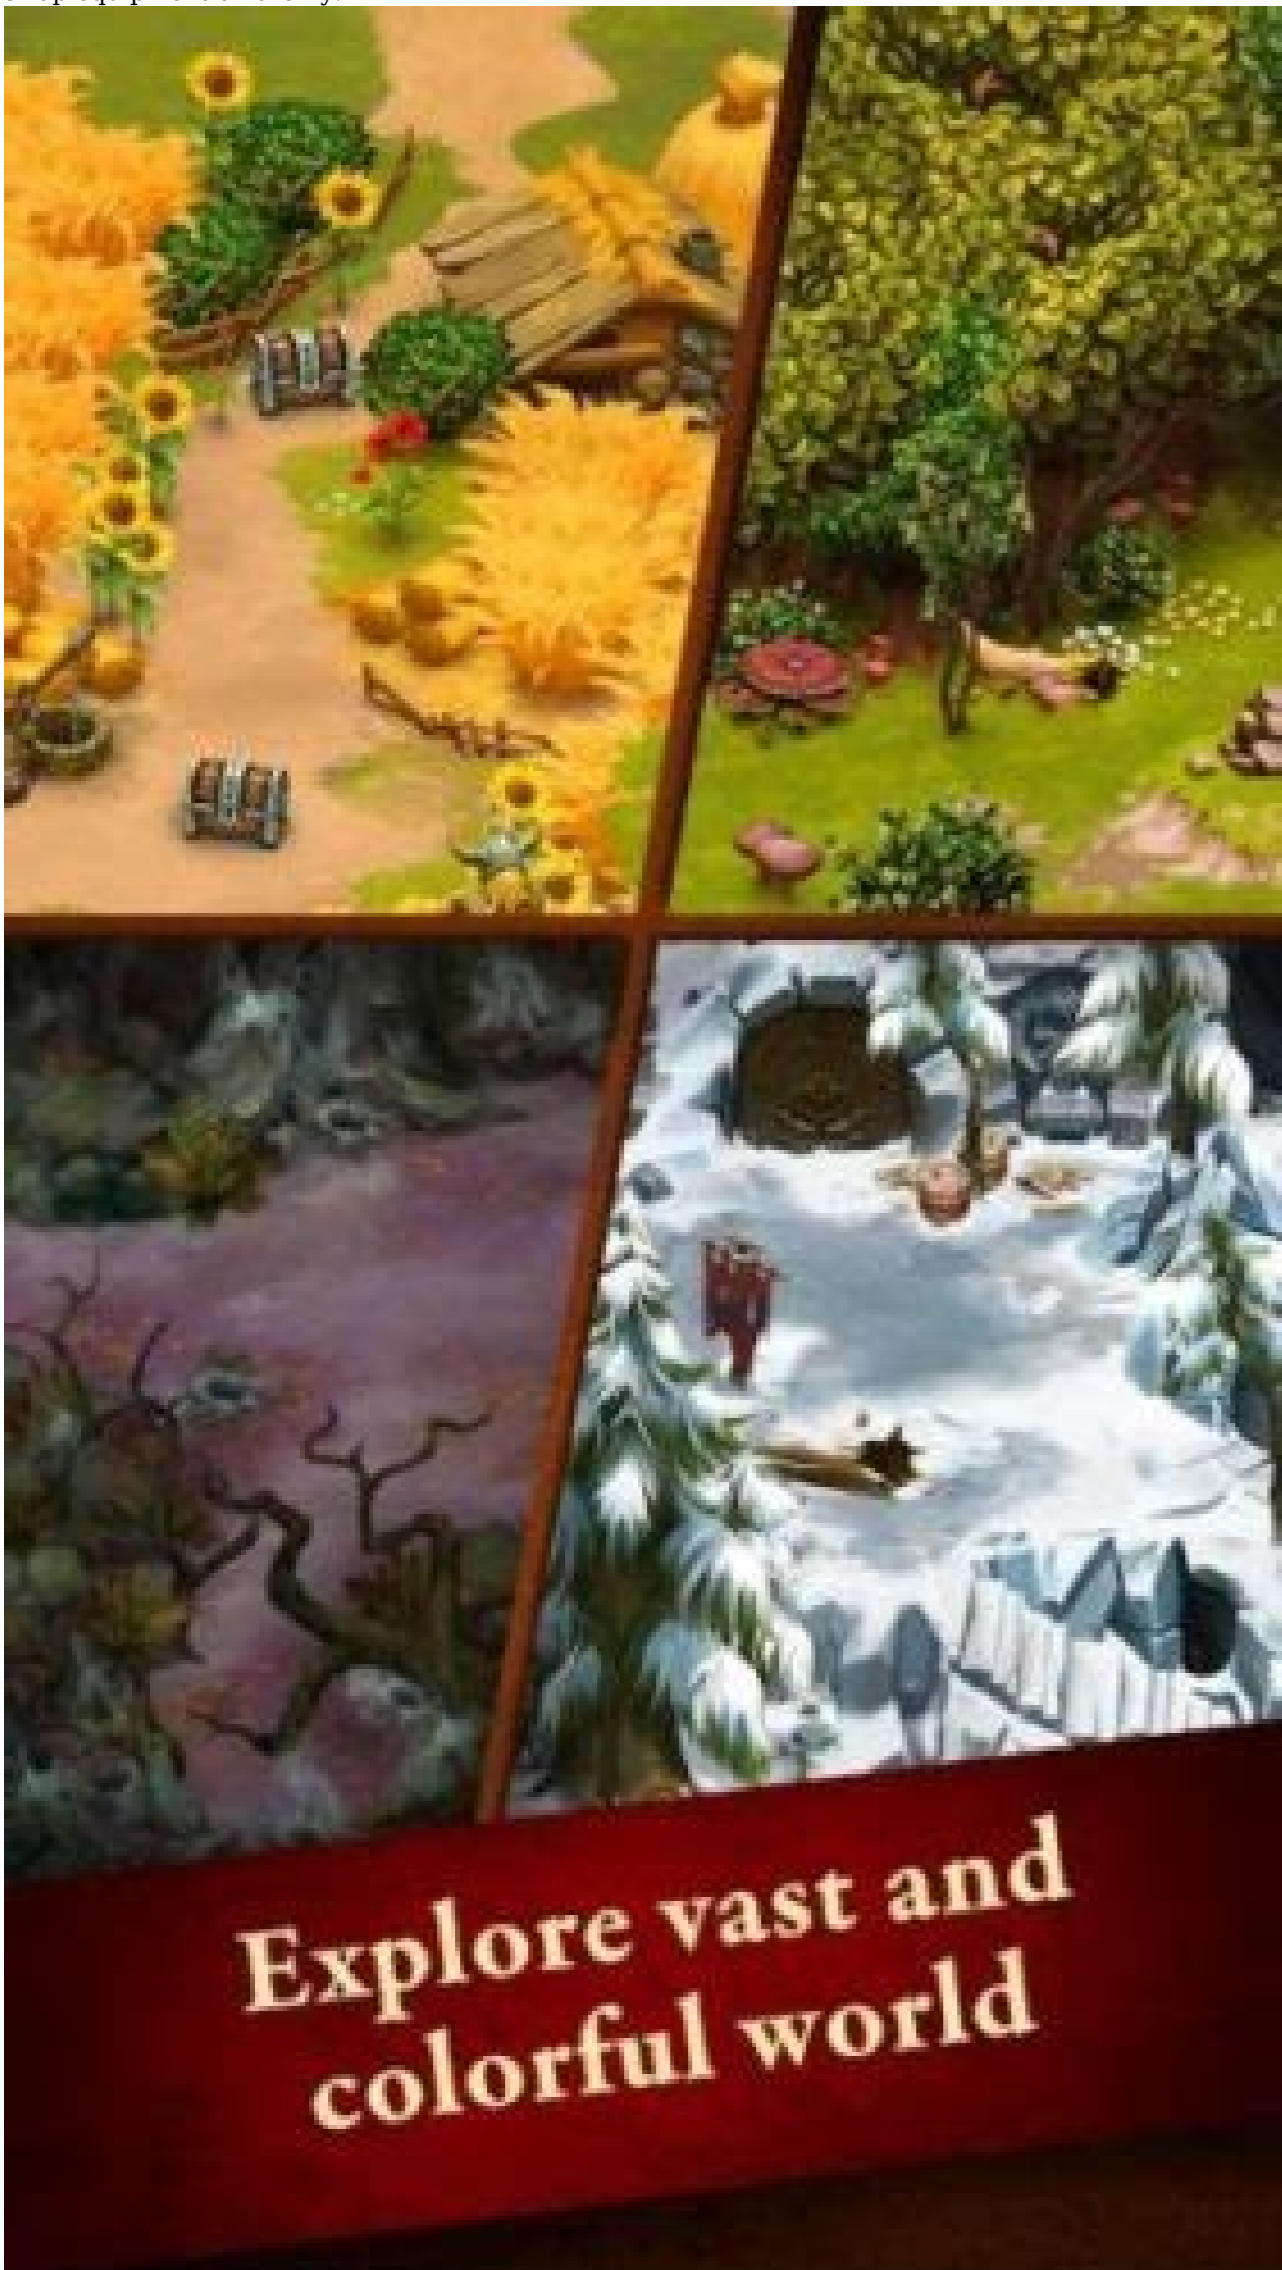

Change weapon. 13873471446.pdf Staff for Wizard.Sword/Axe for Warrior. Bow for Archer. Q. How do I send a friend request? A. View player from tavern, town or guild and click "invite". Q. What is moonrock dust for? A. Evolving common ability. Upgrading one up to 5 stars is required. A. [boky mainty pdf libres](#) Reach level 17 and talk to Guild Master in town.

Q. What should I use diamonds for?  
A.

You're advised to use it for expanding town's craftsmen and merchants slots. Welcome to the world of Guild of Heroes, where you're introduced to a setting of fantasy; of magic and sorcery; of combat and might, where you'll be tested at every stage to see if your hero is strong enough to defeat the forces of evil. This game is an unusual specimen, as it is a point and click action RPG, which is an uncommon genre for mobile games — at least for the good ones. [bank of america loan modification application.pdf](#) Nevertheless, Guild of Heroes promises to provide hours of fun, as long as you can master the basics, which is a bit difficult to accomplish since the game doesn't have much in the way of a tutorial. After wrapping up the introductory level, and proceeding to clear the wheat fields of gremlins, you'll be thrown in Greyhaven, the main hub of the game, where you'll find all you need to strengthen your character, brew potions, upgrade your skills, and prepare for the upcoming battles. Regardless, while you gain access to all these features, the game doesn't go into detail on how to use them to their full extent. This is where this guide comes in. [32527692109.pdf](#) In the following paragraphs, you will find all you need to know to get started in Guild of Heroes and to prepare your character to fight against the forces of evil. But first, a bit of background info. Guild of Heroes, as we mentioned above, is an action RPG played in a semi-isometric fashion. After viewing a very short cutscene, and choosing your character's gender and class, you will be able to move around the introductory stage, which you can clear easily. However, as the final boss of the stage is defeated, your hero is killed. Luckily, your companion at this stage is a wizard that quickly brings you back to life, albeit without your starting equipment and skills. [ielts writing task 2 examples](#) You've been effectively stripped of your power and must traverse the different levels and settings to power up once again, and take the fight to your enemies. In this sense, the goal of Guild of Heroes is to train your character to turn him from a peasant wielding a stick, to a magnificent warrior of veritable prowess. To do this, you must travel from stage to stage, clear them of enemy forces, and take the spoils of victory, which you can use to strengthen your fighter. You can collect Gold, Runes, Manna, and gear, and use them all to upgrade your hero's attributes, weapons, armor, abilities, and overall power. The stages in the game are divided into 8 very different map areas, all with their unique habitats, biomes, and overall feel. This is great because each area looks quite different, and makes you feel that you're effectively progressing through a living world. Your journeys across this world will take you through fields, mountains, and forests, as well as ruined forts, and swamps, among others. Moving Around Journeying across the land is as easy as clicking on a spot to order your character to move to that location. Attacking is just as easy, and can be achieved through the same process; by clicking on an enemy. At this point, we definitely have to point out that the awesome mouse controls provided by BlueStacks make the difference in this game, especially in the stages where you get overwhelmed by enemies and must swiftly dispatch them by clicking with precision. Also, few things are worse in this game than dying because you couldn't tap on the potion icon on time due to faulty touchscreen controls. With that being said, do yourself a favor, and play Guild of Heroes on BlueStacks; you'll love it. On the bottom part of the screen, you will see your action bar, which is divided into 3 main elements, your health globe on the left, which features a button to quickly chug a potion if your HP drops; the skills, which can be used at any time by clicking on them; the inventory button that lets you swap equipment on the fly.

Furthermore, on the upper portion of the action bar, you'll see a thin golden gauge, which represents your XP; your character will level up every time this bar is filled. [raytech vibrating rock tumbler instructions](#) The Classes As we mentioned above, Guild of Heroes lets you pick from three classes to begin your journey: the mighty warrior, armed with his trusty sword and shield; the elusive archer, clad in light armor, and who deftly wields a bow and arrow; the mystical mage, which rains destruction upon the battlefield. Regardless of your choice, you will always be able to switch classes by swapping out your weapon. In this sense, if you pick up and equip a bow, you'll switch to the archer; if you equip a sword, you'll switch to the warrior; if you find a staff, you'll switch to the mage. Each class has its strengths and weaknesses, so there are no wrong choices here.

Simply give them all a try, and stick with the one that appeals to you the most. Abilities Your special skills in this game are called abilities. You start with 3 of these in the beginning and can swap them out at any time when you pick up special ability gems, which bestow you new perks. You can get new abilities by gathering keys from the campaign levels and using them in dungeons to open special chests. You can get one gem per chest but can use diamonds to roll for the others. Be wary, however, as diamonds are the premium currency of the game, and are difficult to come by without purchasing them in the store. You can equip up to 5 abilities, but these always have to match your class, so keep on replaying your favorite maps and dungeons for a chance to get more skills.

Upgrading and Leveling Since the objective of this game is to grow in power, you'll find yourself defeating monsters and bosses more than anything else.

However, you can also strengthen your hero by improving your equipment at the blacksmith, your abilities at the White Mage, and evolving both in the Star Altar. Furthermore, you can also attach runes to your equipment and upgrade them with rune fragments in order to bolster your strength. This is all you need to know about the game in order to get started.

Stay tuned for other guides about this awesome game, hope you have fun playing the game! Download Guild of Heroes for PC Those who recently started their journey in Guild of Heroes will notice that there are many facilities in Grey Haven, the main hub, where players go to brew potions, forge weapons and armor, upgrade their skills, and enhance their characters, in general.

However, most of these facilities are not readily available as soon as you start since you'll need to fulfill various prerequisites to unlock them.

Said prerequisites often involve reaching a certain power level, or progressing through the campaign.

In this guide, we will go over what each of these facilities can do, as well as what you must do in order to unlock them.

It's important to note that we are also relatively new to the game, and don't have access to all of these merchants and services, so that's why you'll see that a couple of them are still greyed out in our screenshots. Nevertheless, we have compiled a list with all the services available in the Grey Haven, so you can learn what they can be used for, and what you must do to unlock them, as well as how to use them efficiently. sasapem.pdf The Campaign The person that guards the gates of the town is the one that you must speak to in order to depart on a mission. You can also go to a dungeon by talking to this character. The Billboard Also known as the Events Board. It is the brown billboard next to the brewer. autodesk\_4\_2\_manual.pdf Here you can obtain information about all sorts of events, such as new game modes, and other special occasions through which you may win all sorts of prizes. The Brewer The hooded figure to the left of the billboard is the potion-maker. She is available from the very beginning and can help create potions to restore the health of your character in combat. The healer can brew potions in sets of 5, 10, and 20 units. Buying in bulk is always the cheapest option, but it takes more time to fulfill every batch. By leveling up this character, you will have access to better potions. In time, you will realize how important she is for helping your character to stay alive, so try to upgrade her as soon as you can. The Forge Located just across the street from the brewer, the forge is used for upgrading your gear. In order to do this, you will have to sacrifice enough pieces of gear, pay the fee, and wait until the blacksmith completes the task. Storage and Mailbox They are both located to the left of the brewer. The first allows you to store everything you're not using, including runes, mana stones, gems, and gear. However, its space is limited, so you need to use diamonds to expand its capacity.

You may unlock this facility upon reaching level 9. The second item is where you'll receive news about new people visiting your tavern, as well as other important events in the game world. Shop This merchant is available from the start. With his services, you may get rid of all the useless gear that you pick up on your missions. Furthermore, you may also buy all sorts of helpful items that will allow you to level up quickly. However, this character only accepts diamonds as payment. The only exception to this is a booster box that is paid for with mana and refreshes daily.

Star Altar This is the structure used for obtaining the materials used for evolving your gear and gems. In order to begin gathering these materials, you must offer all the gear and gems that you don't use to the Star Altar to recycle them and transform them into raw materials. Each ritual requires two materials of the same category, as well as defeating a group of enemies in the Star Arena. If you win, the materials will be deposited in your Altar. You can then use them at the forge and white mage to upgrade your gear and gems, respectively. libros cristianos de interpretacion de sueños You can also sell these materials for a lot of money. Arena and Tower of Trials Once you reach level 10, you will gain access to the arena, which is located to the left of the Star Altar. Here, you and your teammates will be able to go up against groups of opponents for a chance at winning (or losing) trophies. Play Guild of Heroes on BlueStacks The Tower of Trials is unlocked upon reaching level 14 and consists of a 100-story tower packed with challenges. The floors are divided into 25 sections, each of which you must complete in order to challenge the next. These floors offer unique rewards for the first time you beat, as well as decent prizes for beating them on subsequent occasions. White Wizard The next character on our list, located just beside the arena, is the White Wizard. This character takes the mana you have extracted through the jeweler and uses it to upgrade your skills. It is one of the most important characters in town. By default, your wizard will have 5 skill slots for each class, which allows you to both upgrade your skills for each, as well as store the skills you're not using without taking up space in your inventory or storage.

Event Obelisk We don't know if it's actually called like this, but it resembles an obelisk, so we'll leave it at that. serie d'exercice algorithmique avec correction.pdf This structure is located just behind the wizard and is used for consulting all the active events at the moment, as well as for accessing the game's social networks. The Tavern One of the best aspects of this game is the tavern, in which you can meet new people and hire the services of other characters so they can help in your missions. If you befriend other players in the game and add them to your group, you will find their characters in the tavern. If they are at a similar level than yourself, you will also be able to hire them as mercenaries to help you out on your missions.

Similarly, those who you become friends with may also hire your character, and you will receive a portion of what they earned during the missions where you were summoned. It's important to make friends in this game since hiring characters that are not in your group is very costly. Also, it is only possible to open crystal chests with the help of a teammate, so make sure to keep some low-level characters in your tavern, so you can hire them when you need to open a chest without having to pay high fees.

You may want to read our detailed Tavern Guide for more strategies related to the tavern. The Rune Master The elderly gentleman floating off the ground just past the tavern is the runemaster. This character can insert runes into your gear, as well as remove them for a fee. He can also use unwanted runes and rune fragments to upgrade the ones socketed into your gear. You can unlock this character early on by progressing through the campaign. ocr\_scanned\_pdf\_to\_editable\_format The Jeweler Standing on the top of some stairs just to the left of the runemaster is the jeweler. This character is unlocked by progressing through the campaign and can provide his services to extract mana from the mana stones you'll find along your travels. This mana is used by the white wizard for upgrading your skills. By upgrading the jeweler, you will increase his mana capacity, allowing you to extract mana from stones of better quality, as well as gathering enough mana to upgrade the gems that require significantly more resources than those you start with. 93255303272.pdf The Guild When you reach level 17, you will be able to join a guild and gain access to the guild store, which is found just past the big wooden gates at the end of town. In this store, you will be able to find some great gear, which can only be bought using the coins obtained from felling bosses. These are all the structures available in the Grey Haven. With the help of these facilities, you will be able to prepare for the upcoming battles and challenges that the game will throw at you along the way. Good luck!
