Subtract the nontaxable biweekly Thrift Savings Plan contribution from the gross biweekly wages. Subtract the nontaxable biweekly Federal Employees Health Benefits Plan payment(s) (includes dental and vision insurance program and Flexible Spending Account — health care and dependent care deductions) from the amount computed in step 1. Add the taxable biweekly fringe benefits (e.g., taxable life insurance) to the amount computed in step 2 to obtain the adjusted gross biweekly wages. Multiply the adjusted gross biweekly wages by the number of pay dates in the tax year to obtain the annual wages. Determine the exemption allowance by applying the following guideline, and subtract this amount from the annual wages: Exemption Allowance = \$2,375 x Number of Exemptions. Determine the additional allowance by applying the following guideline, and subtract this amount from step 5 to compute the taxable income: Additional Allowance = \$1,000 x Number of Additional Exemptions. Multiply annual taxable wages by 4.95 percent to determine the annual tax withholding. Divide the annual Illinois tax withholding calculated in step 7 by the number of pay dates in the tax year to obtain the biweekly Illinois tax withholding.
