# Club Notes

**Our Mission Statement:** Meetings of the St. Catharines & Area Aquarium Society are held on the first Monday of each month, 7.30p.m., at the Seafarers & Teamsters Union Hall, 70 St. Davids Rd. E. Thorold, Ont. No meetings are held on Mondays that are holidays. Those meetings are held on the second Monday. There are no meetings during the months of July and August. *The Society, established in 1958, is a non-profit, educational organization dedicated to the task of promoting interest in the breeding, raising, maintenance and study of tropical fish, both at the beginner and advanced levels.* The St. Catharines & Area Aquarium Society is a charter member of the Canadian Association of Aquarium Clubs Inc. (CAOAC) [www.caoac.ca](http://www.caoac.ca). SCAAS is also a member of the Federation of American Aquarium Societies (FAAS). More news and information about St.Catharines & Area Aquarium Society can be found at <http://www.scaas.info>

**Our next meeting will be held on December 01 at the Seafarers & Teamsters Union hall, 70 St. Davids Rd.E. Thorold. Start time is 7.30 pm ALL ARE WELCOME**  
**This month's program will be presented by Larry Johnson on African Cichlids**

Editors Notes November has been a busy month for me & a frustrating one at times. The worst part was when I started loosing corals & anemones in my marine tank. I couldn't remember doing any thing different until I thought back to adding a new multi-vitamin type concoction. I put a pad in that absorbs stuff out of the water & began doing water changes to reduce what ever was causing the problem. The tank is looking better, but it is aggravating to have lost the animals that died. The next disaster was when my computer died. Fortunately I had just finished the November Scat & had sent it too the printer so it was saved. I lost all of my programs but all of my documents, photos & music was still there. I made a quick trip to get a new computer. Thanks to Natatsha & Thomas at Summit for the great new computer. Anyone need a slightly used monitor? I understand they make great anchors for mid-sized ships.

We are missing some old newsletters from our archives. If you happen to come across any old SCAT newsletters from the 1960's, please give them to Bruce Hallet. He will copy them & return them to

## Presidents Message December 2008

**Well** here we are as the year closes and we are prepare for the Christmas season I just started wondering... do we buy our pets presents. Cat's get toys and treats. Dogs get coats, boots and treats. Fish get?

**Well** most likely they get new filters or maybe a bigger tank. But they don't get to unwrap it. So perhaps we should just appreciate the faithful undemanding fish. They surely are the best pets of all.

**More** seriously we have our Christmas meeting pot luck style treats and whatever you bring. I don't see any dog clubs doing that so we must be the nicest pet

## **Anagram for December**

*Example:*

*An anagram for this creature is: alpine alps*

*The creature is: applesnail*

**An anagram for this fish is: A wild sort**

**The fish is: \_\_\_\_\_**

Answer will be in the next newsletter.

**November's anagram answer:**

you if you want. We are taking a hiatus from "50 Years Ago" for this month.

**But**, enough of that. On to this month's newsletter. This month we have two articles I reprinted (with permission) from Microcosm Aquarium Explorer [Microcosm\_Aquarium\_Explorer@mail.vresp.com] The first article is an excerpt from a book "101 Best Saltwater Fishes, 101 Best Tropical Fishes". It's a good reminder to only buy fish that we can reasonably expect to keep alive in our aquariums Also from Microcosm Aquarium Explorer is an article on the results from an International Freshwater Aquascaping Contest. These aquariums are incredible – you will enjoy seeing them & you may get some ideas on how to aquascape your own aquariums.

**For** some great articles to read from other clubs make sure you read the Exchanges page on pg 6. A new feature that is done by Pam Dannyluck is "What SCAAS Members Are Keeping" It is just that – a list of what fish, plants, etc are being kept by SCAAS members. To get your stuff listed contact Pam Dannyluck.

*Dave*

owners. Wink, Wink. Santa even makes a special trip to our Aquarium club.

**It's** also a time to thank everyone. This includes the members and guests coming out to meetings because that's what it's all about. It includes the committees giving us our raffle, auction, food, membership records, library and setting up the room. Also a great thanks to the executive who are always paying attention and keeping an eye on the future. Without all of these participants we would be well just not the great club we are.

**Merry Christmas and A happy New Year!**

*Ken*

**Crayon pad = Panda cory**

# JAR SHOW

Here is a Fish of the Month list so you can plan ahead to have an entry each month.

Fish Of The Month
September-----Corydoras & Catfish
October -----Guppies & Tetras
November-----Cichlids over 4”(old & new world) Not including Angels & Discus)
December-----Swords, Platies, Mollies
January-----Barbs & Anabantids
February -----Loaches & Sharks
March -----Plants
April -----Angels & Discus
May -----Dwarf cichlids (old or new world)
June -----Goldfish & Koi

## Jar Show Results

*Point structure – 1<sup>st</sup> – 6 points, 2<sup>nd</sup> – 5 points, 3<sup>rd</sup> – 4 points. 1 point for showing*

### Results from the November meeting meeting.

There were 2 entries.

**Fish of the Month:** 1<sup>st</sup> Claudia Carthew with a "Yellow Lab/Metallic Blue"

**Open Class Senior:** 1<sup>st</sup> – Pam Danyluck with a Gold Mystery snail

**Best in Show** - C. Carthru with a Yellow Lab/Metallic Blue

**Fish of the Month  
First Place**

**Open Class Senior  
First Place**

## **7 Questions to Ask Before Buying A New Fish**

Reprinted from Microcosm Aquarium Explorer

Question: Would you buy this fish? (See bottom of page.)  
JJPhoto.d

Do not be shy about asking these questions at your local fish store. These are exactly the same questions that experts and professional aquarists consider when thinking about acquiring a new fish species.

**1. How large does it get?** When it reaches adulthood, will it fit into the tank you intend to set up?

**2. How aggressive is it?** What sort of tankmates might it harm?

**3. What does it eat?** Does it have specific dietary requirements that will be difficult to meet or does it have a generalized diet?

**4. Is it piscivorous (a fish eater).** For marine fishes, is it reef safe if you have corals and ornamental invertebrates? For freshwater species, will it graze on the prize plants you want to keep or devour your prize shrimps or snails?

**5. What are its habitat preferences?** Is it a fish that demands lots of space? Does it have any special aquascaping requirements?

6. Is it susceptible to disease?

**7. Is it considered easy or difficult to keep?** Do you have the skills (and resources) to be sure it has a chance to thrive?

Excerpt from: [101 Best Saltwater Fishes](#), [101 Best Tropical Fishes](#).

Retrieved from

["http://en.microcosmaquariumexplorer.com/wiki/7\\_Questions\\_to\\_Ask\\_Before\\_Buying\\_A\\_New\\_Fish"](http://en.microcosmaquariumexplorer.com/wiki/7_Questions_to_Ask_Before_Buying_A_New_Fish)

Answer (from top of page): Most experienced aquarists steer away from the [Bucktooth Tetra](#), known for attacking tankmates of all sizes, up to and including large Oscars. See [species profile](#) for details.

## Member Profile

*By Pam Danyluck*

Gary Phelps was born in St. Catharines in 1963 and grew up in the north end. He currently lives in Beamsville, and has for the past fourteen years with wife Jackie and their two sons Jake and Matt.

He is a Heavy Duty Diesel Mechanic for Defasco and has been with them for the past two and half years. Prior to working for Defasco he was employed at United Rentals for twenty years.

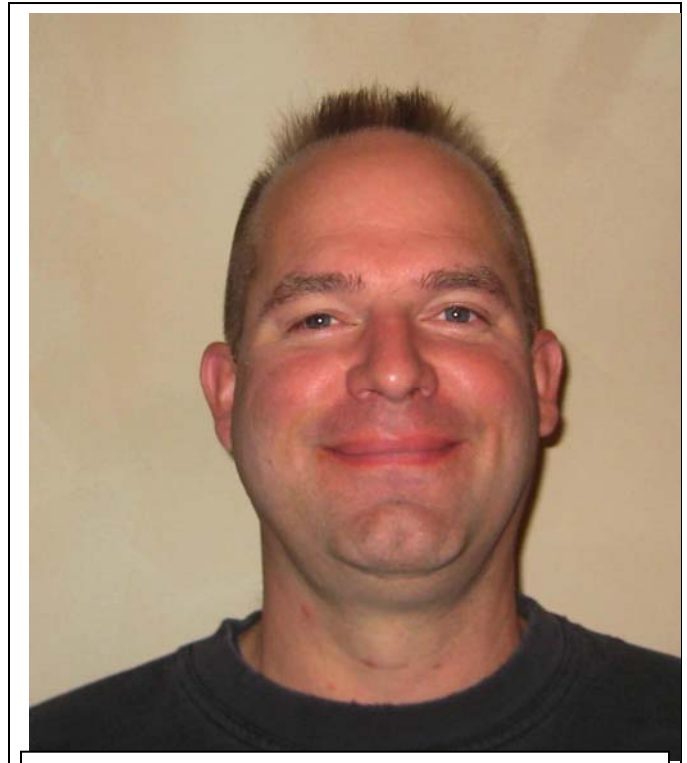

Gary became a member of our club in 2004 and has been interested in fish since childhood. His father always had fish tanks when he was growing up. He keeps about four tanks right now. He does not have a dedicated fish room. So far his wife will only allow him a corner of the basement “ha ha”. Gary keeps mainly tetras, but his favorites are Kulhi Loaches and Rummy Nose Tetras. He finds their colors quite unique and they tend to school together. He also kept a Pigeon Blood Discus for years.

As for filters Gary uses a Box Trickle filter.

Gary’s family enjoys his hobby. His wife likes the Discus, but prefers that Gary do all the work. His two sons enjoy coming to meetings with their dad.

The youngest Matt has an aquarium of his own, which he keeps in his room.

The occupants are an Algae eater and a tricolor shark.

Gary Phelps – photo by Jackie Phelps

Wanted 😊

Club members for newsletter profiles! I am still fairly new, so I don’t know all of you yet. It would be a big help if anyone willing to have his or her profile done would contact me. You do not need to be an expert fish keeper just interested in fish.

Please contact me at: [pjdanyluck@sympatico.ca](mailto:pjdanyluck@sympatico.ca) or 905-562-3290.

# International Freshwater Aquascaping Contest Winners

From Microcosm Aquarium Explorer

Detail of the 26th place finisher. Copyright © 2008 Aqua Design Amano Co., Ltd.

The 2008 "Olympics of Aquascaping"

**TOKYO:** In eight years, it has become perhaps the fiercest competition in the aquarium world, drawing 1,169 entries from 47 countries to compete for thousands of dollars in prize money and accolades for having aquascaped one of the best planted tanks on earth.

The International Aquatic Plants Layout Contest 2008 was hosted by Aqua Design Amano Co., Ltd. and its founder, [Takashi Amano](#), the planted aquarium genius who has inspired countless thousands of aquarists to attempt to create their own underwater scenes with plants, rock, and driftwood. The grand prize winner of the contest 2008 is Cheng Siu Wai of Hong Kong. *recreating a natural aquatic scene within the layout were highly graded this year again."*

Observers noted that the classic Zen-like simplicity of early Iwagami three-stone layouts is being pushed to new horizons, with craggy promontories capped with moss, sunken miniature forests, and depictions of waterfalls, cascading streams, and underwater

mountains.

**#1. Detail. Full view below. Copyright © 2008 Aqua Design Amano Co., Ltd.**

Grand Prize (World Ranking No.1)

Cheng Siu Wai (Hong Kong) **Title: Mount Donha**

**Evaluation:** This year's Grand Prize Winner is an Iwagumi layout, which uses hair grass and willow moss tactfully and expresses a unique world view. The color and texture of the stone is quite tasteful. The layout is highlighted by the arrangement of the materials with a fine attention to detail. The limiting of the variety of aquatic plants gives the layout a monotone green appearance which aids in the success of this layout. The choice of fish - Cardinal tetra swimming around a large 3 meter panoramic tank, matches the entire composition well. Many judges graded this composition highly, deducting few points allowing this composition to win the first prize. **Aquarium:** W300xD66xH84(cm) (W118xD26xH33 in)

**Aquatic Plants:** *Anubias barteri* var. *nana* "Petite" *Pellia endiviifolia* ,*Vesicularia* sp. ,*Eleocharis acicularis*

**Fish & Invertebrates:** *Paracheirodon axelrodi* ,*Hyphessobrycon haraldschultzi* ,*Otocinclus* sp. *Crossocheilus siamensis* ,*Neocaridina* sp.

Full view

#2. Detail. Full view below. Copyright © 2008 Aqua Design Amano Co., Ltd.  
Gold Prize (World Ranking No.2)

Mr. Yutaka Kanno (Japan) **Title: Beyond the Silence**

**Evaluation:** The creator tactfully arranges slender pieces of driftwood and makes use of them within the layout. The present of *Eleocharis vivipara* in the background is visually effective and balanced well. We observe the highlights of the layout in the limited use of colors through stemmed plants and the dynamic application of slender driftwood. The use of moss in the layout contrasts the mossy wood with the barren wood nicely.

Full view.

**Aquarium:** W120xD45xH45 (cm) (W47xD18xH18 in)  
**Aquatic Plants:** *Fantinalis antipyretica*, *Eleocharis vivipara*, *Glossostigma elatinoides*, *Hemianthus calltrichoides* "cuba", *Vesicularia* sp., *Microsorium pteropus* var.

**Fish & Invertebrates:** *Paracheirodon axelrodi*, *Crossocheilus siamensis*, Genus *Neocaridina*, *Caridina japonica*

#3. Detail. Full view below. Copyright © 2008 Aqua Design Amano Co., Ltd.  
Silver Prize (World Ranking No.3)

Mr. Hsu Yung Lin (Taiwan) **Title: Passing Season**

**Evaluation:** The imagery of driftwood covered with moss resembling a pine tree demonstrates originality makes this layout quite unique. Not only is this layout impressive due to original and unique imagery, it also displays distinct angle and positioning of driftwood within the aquascape. The creator brings out his highly skilled layout technique with a dynamic quality of the composition and detailed use and positioning of the moss. We see a unique quality within the layout influenced by Taiwanese culture.

Full view.

**Aquarium:** W127xD60xH60(cm) (W50xD24xH24 in)

**Aquatic Plants:** *Cratoneuron filicinum*, *Vesicularia* sp., *Sasaokaea aomoriensis*, *Eleocharis minima* kunth., *Echinodorus tenellus*, *Juncus repens* Michx., *Glossostigma elatinoides*, *Eleocharis acicularis*, *Ludwigia repens* J.R.Forst.

**Fish & Invertebrates:** *Nematobrycon palmeri* var., *Paracheirodon simulans*

#4. Detail. Full view below. Copyright © 2008 Aqua Design Amano Co., Ltd.

Silver Prize (World Ranking No.4)

Mr. Cliff Hui (Hong Kong) Title: Destiny

**Evaluation:** In this layout, the creator's layout technique is notable. The combination of dynamic driftwood and stone on both sides is exquisite, and the opening in the center is very effective and successfully promotes perspective created between the foreground and background. Exposing the skin of the driftwood stretching out from *Glossostigma* is also visually striking. The layout composition as a whole is well balanced.

Full view.

**Aquarium:** W90xD45xH45(cm) (W35xD18xH18 in)

**Aquatic Plants:** *Elatine triandra* Schk., *Glossostigma elatinoides*, *Hemianthus micranthemoides*, *Eleocharis acicularis*, *Eleocharis minima* Kunth, *Liaeopsis novae zelandiae*, *Microsoienium tenerum* Griff, *Vesicularia* sp., *Hypnum plumaeforme* Wils

**Fish & Invertebrates:** *Petitella georgiae*, *Nannostomus nitidus*, *Otocinclus macrospilus*, *Caridina japonica*, *Caridina cf. serrata* "blue tiger"

#5. Detail. Full view below. Copyright © 2008 Aqua Design Amano Co., Ltd.

Bronze Prize (World Ranking No.5)

Mr. Long Tran Hoang (Viet Nam) Title: Tranquility Place

**Evaluation:** Simplicity of the composition is highly recognized in this layout. The creator has organized the layout well, even though composing a panoramic layout is challenging. Yet, he could achieve better compositional balance if the stemmed plants on the left grow a little more and add volume to the layout. What we see in this layout is a sense of sincerity without distraction.

Full view.

**Aquarium:** W220xD60xH65(cm) (W87xD24xH26 in)

**Aquatic Plants:** *Hemianthus micranthemoides*, *Rotala* sp., *Colorata*, *Micranthemum umbrosum*, *Glossostigma elatinoides*, *Eleocharis parvula*, *Didiplis diandra*, *Ranunculus inundatus*, *Fissidens* sp., Java fern sp.

**Fish & Invertebrates:** *Sawbwa resplendens*, *Parambassis ranga*, *Neocaridina heteropoda* var. red

## Contest Grading Guidelines

The International Aquatic Plants Layout Contest 2008 was closed for registration on May 31, 2008. A total of 1,170 submissions was received from 47 countries, this year; the number of contest participants outreached the last year's by 28 submissions, but the number of participating countries didn't quite reach last year's record-high 50 countries. The layouts were evaluated by 18 judges chosen internationally, and then, this year's world ranking was decided. The whole grading process was conducted impartially by the judges and so was the counting of scores by the contest committee. However, the evaluation of each judge primarily relies on his/her personal preference of the types of aquatic plant layout. It doesn't necessary become an absolute account of the layout.

**#6. Detail.** Full view below. Copyright © 2008 Aqua Design Amano Co., Ltd.  
Bronze Prize (World Ranking No.6)

Mr. Lee Do Jae (Korea) **Title: A Stony Mountain**

**Evaluation:** A very energetic layout with a dynamic stone arrangement and distinctive plant application. The silhouette and texture of the stone could be more appreciated if the form of the stone is a little more exposed. The way the creator uses stemmed plants is very unique. But, it also makes the evaluation toward this aquascape difficult because the balance of the layout might be ruined once the plants start growing.

Full view.

**Aquarium:** W100×D50×H50(cm)  
(W39×D20×H20 in)

**Aquatic Plants:** *Bolbitis heudelotii*, *Microsorium* sp. narrow, *Rudwigia brevipes*, *Rudwigia repens*, *Vesicularia* sp..

**Fish & Invertebrates:** *Hemigrammus erythrozonus*, *Gyrinocheilus aymonier*, *Neocaridina* sp., *Crossocheilus siamensis*

**#8.** Copyright © 2008 Aqua Design Amano Co., Ltd.

The highest score of grading is 200 points; judging criteria mainly consists of "Artistic Impression Point" (maximum 100 points) and "Technical Point" (maximum 100 points divided into 5 categories for 20 points). In this contest, aquarist's skill of a long-term maintenance of layout is also in judges' great concern. Since the planted aquarium hobby involves various forms of life, we don't just appreciate the beauty of a layout shown right after its completion, we pay careful attention to observe how long the layout has been kept in a healthy condition. In that context, the following aspects of layout were, especially, strictly screened by the judges. First, the use of emerged plants and house plants which hardly survive in the water becomes the subject of point deduction. In order to avoid misuse of plants in a layout, one needs not only the composition skill but a good deal of correct knowledge about aquatic plants. Moreover, it requires a higher level of technique to grow plants healthfully. These aspects

of layout are judged under the criterion of "Creativity".

There was a debate over the use of very fine white cosmetic sand, such as Rio Negro sand. Due to the nature of this type of sand, excretions of fish and shrimps become more recognizable on white sand. The color of the sand turns more easily to a unpleasant greenish or blackish color because of the growth of algae and the spread of anaerobic bacteria inside an aquarium. It was pointed out that it's hardly kept brightly clean for a long period of time. Although the cosmetic sand used in the layout looks elegantly beautiful in the picture, the layout receives a tough evaluation from the judges.

After going through the rigorous grading process, the top ranked layouts were finally decided.

Entries in the 2008 Contest included 1,170 layouts from 47 countries, the top five being:

- Japan (423)
- Malaysia (120)
- Taiwan (86)
- Hong Kong (65)
- Poland (63)
- Among the others represented: U.S.A. (48); United Kingdom (12); Canada (7 ).
