

## Education Program

We believe that preparing children for the future starts with a solid education. Our education program encompasses three main categories—scholarships, The Gift of Books and tutoring—through which we serve children aged elementary through college.

**Scholarships** are gifted to those who are in secondary school as well as those entering college and universities or persons continuing their education. These special people have impressive GPAs, have a need and are positively connected to their community. We want to assist them in building a strong future.

**Giving Hope to  
Children in the  
U.S., Africa and  
the Caribbean**

**The Gift of Books Project** involves collecting, sorting, and shipping surplus books and educational supplies for library and learning resource centers in the most disadvantaged communities in Africa.

**Tutoring** is a major component of our partnerships with communities, both locally and internationally. We work with the students that our partners have identified as having a need. Our tutors act as mentors and are a select group of experienced and retired educational professionals, college students and specialized teachers.
