

PAPER + CLAY

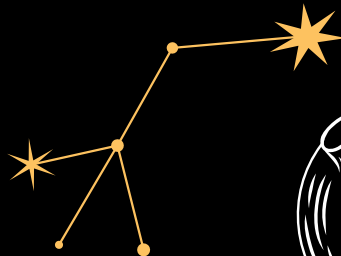

FOLD A FABRIC OF SPACE USING TIME

The fabric of space is like origami. Folds in spacetime through paper represent gravity, and the folding process represents the passage of time and the creation of matter.

ROLL A SPHERE USING CLAY

Planets and stars are spheres due to gravity. This spherical shape is the most stable configuration for a celestial body, as any other shape would have uneven gravitational forces pulling it towards the center.

CONSTELLATION

A young child with dark hair, wearing a plaid shirt, is looking through a large white telescope mounted on a tripod. The background is a vibrant space scene with a blue and green nebula, numerous stars, and a white wireframe globe with an orbital ring. The text "SPACE YOUR FACE" is written in a large, bold, white font with a black outline, and "SCIENCE + ART POPUP" is written below it in a smaller, similar font.

mission and value statement

Space Your Face aims to ignite a passion for cosmic wonder and the beauty of artistic expression. By blending the knowledge and tools of science and the human expression of art, our project offers a unique experience capturing the wonder of all ages.

We inspire curiosity, foster a love for science and art, while creating memorable educational experiences bridging the gap between the vast universe and personal creativity. Join us on this journey to see the universe up close and wear its beauty with pride.
