General Information

Packaging

Most of our packaged items (Units) come in glass jars (Serums, toners and creams). There are more cost-efficient alternatives such as plastic which we can custom quote on. Customers may opt to provide their own packaging where we in turn would quote on a filling fee.

Pricing

Pricing for each item is first shown in packaged units, where below each product is the bulk bucket price.

Customisation of products

Kindly note that the below is merely a standardised guideline. We can (if required) entirely customise your skincare products, to your specific needs or requirements. This includes size, quantity and ingredients needed. Should you opt for your own packaging, we in turn would only quote on the manufacturing & filling fee.

Quotations

While we maintain competitiveness in the market, we guarantee that we will beat any quoted price, regarding that we have the formal quote and ingredients used in the quotation you have initially received. A friendly reminder that we intend on using the best and most effective ingredients when manufacturing your skincare items.

Delivery

Kindly note that delivery is a separate charge that will be quoted depending on location.

Face Serums

All Serums are packaged in (unless stated otherwise):

Bottle: 30ml Amber Dropper (Glass)

Closure/Cap: Black Serum pump
