

BASIN STREET SECURITY

**BASIN STREET CYBERDEFENSE SERVICES POWERED BY TABIRI ANALYTICS:
The First Practical Cybersecurity Solution for Small-Medium Entities**

“The cyber worker shortage is a particular problem with smaller organizations, everything from municipalities and law firms to hospitals and businesses, that can’t offer high enough pay to attract high-skilled workers.”

Max Shuftan, Director, Mission Programs and Partnerships, the SANS Institute

CYBERSECURITY: A HUGE PROBLEM FOR SMALL-TO-MEDIUM ENTITIES

Public Agencies Public Power & Water Companies Healthcare Mid-sized Firms

FEATURES: BASIN STREET CYBERDEFENSE SERVICES

- **Your Outsourced Cybersecurity Team:** Our SMEs work closely with your IT Team, and continuously monitor your systems, 24X7X365, using Sensors and Agents to reduce delays and costs to you. We assign cyber tasks to SMEs based on their own cyber specializations.
- **Unprecedented Pricing Economies For Small-Medium Entities:** You pay a fraction (3-5%) of the cost of an in-house Cybersecurity Team (3-5 SMEs), made possible by powerful cyber process automation, and less than full-time SMEs. Your costs are much more predictable.
- **Continuous Cyber Monitoring:** We monitor metadata of all traffic in and out of your network and systems, watching for potential problems, 24X7X365.
- **Weekly Vulnerability Assessments** for your network and individual PCs/computing systems.
- **Organizational Cyber Maturity Program** to enable your organization to reduce your cyber risk over time by improving and managing your cyber operations and practices, increasing the value and insurability of your organization.

BENEFITS: BASIN STREET CYBERDEFENSE SERVICES

- **Measurable Benefits Your Management Team & IT Team Will Understand:** Number of identified anomolous events, Number of recommended corrective actions, are documented.
- **Plain English/No Cyberspeak, that Your Management Team & IT Team Understand.**
- **Timely Detection of Cyber Threats:** Deployed sensors and agents collect system, application and network log metadata, and our systems analyze it, for cyberthreat indicators.
- **Identify Actions to Mitigate Business Impact:** We analyze real-time metadata to spot potential threats before they can take root.
- **Recommendations to Reduce Business Risk:** We identify potential threats & recommend corrective actions, 24X7/365.
- **Powered by Machine Learning:** Our automated cyber processes dramatically reduce the human effort & cost required to provide these Cyberdefense Services.
- **Priced for Small-to-Medium Entities:** 3-5% of the cost of hiring your own internal Cybersecurity Team—which typically costs \$1Million+ annually for 3-5 full-time SMEs.
