

100% HEMP TEXTILE

Sustainable textiles for
luxury hotels

www.stevahemp.com

Cotton and polyester are the most common textiles used in the HO.RE.CA industry.

The production of these textiles is not sustainable, because they require high amount of chemicals, pesticides, water and energy.

Infact, textile industry contributes significantly to CO2 emissions in their production and lifecycle.

**“more than 90%
of textiles
used in hotels is
not sustainable”**

A photograph of a lush green hemp field. The plants are tall and have serrated leaves. In the background, there are rolling hills or mountains under a bright, slightly cloudy sky. The text "There are more sustainable alternatives" is overlaid in the center in a bold, white, sans-serif font.

**There are more
sustainable
alternatives**

Hemp is the most sustainable natural fiber

Hemp (*Cannabis sativa* L.) has **long history in the textile industry** and was used for centuries for clothing, bedding and technical textiles.

Hemp grows **without** use of **pesticides** and **chemicals**. It requires very little amounts of **water**, it is **biodegradable** and be easily recycled.

After a long prohibition, hemp textiles are experiencing a renaissance due to the growing demand for sustainable materials.

**“Sustainability is the
new luxury”**

Sustainability as Mega Trend in Hotel Industry

Guests increasingly perceive the impact of their traveling and appreciate **eco-friendly practices, materials and experiences.**

Sleeping and resting well, especially in outside from home, is gaining more importance, also considering that more than 60% of travellers resent from first night effect.

Sleep tourism is also becoming an new topic in the hotel industry, together with experiencesbased on time, authenticity and well-being.

Back to the roots: old is the new “new”

Hemp was traditionally used for bedding as it allows to maintain a **constant temperature** of the body over night, which guarantees good night's rest.

Hemp is **naturally resistant to bacteria, fungi and mould**. It requires washing at **lower temperatures** than conventional textiles, thus using less water, energy and chemicals.

Integrating hemp textiles into your hotel, is an environmental and strategical decision, that aligns with the evolving preferences of high demanding guests and long-term cost optimization.

Our collection

Why hemp?

We produce 100% hemp bedding, tablecloths, napkins, SPA articles and decorative textiles for eco-friendly and luxury hotels.

Compared to conventional fabrics, hemp fabrics offer **higher** textile **quality**, are **ecologically sustainable** and easily **recyclable**. In fact, our production waste is transformed into hemp paper.

The use of hemp textiles demonstrate your commitment towards sustainability and fulfill the highest guest expectations and sensorial experience.

Benefits for your hotel

For your **Guests**

- soft and durable
- temperature controller (no sweating)
- healthy on the skin and hygienic
- micro-massage for goodnights sleep

Made to order

On your request

We have our **standard** bedding and tablecloths models, but on request we can develop **specific models for our clients.**

We are producing only on request, because there is too much over-production of textile products that end up in the landfill.

Production times: 6-8 weeks after the order confirmation.

Contact us for a dedicated quotation.
