WELCOME MESSAGE

MINISTER OF HIGHER EDUCATION OF MALAYSIA

YB Dato' Seri Diraja Dr. Zambrly Abd Kadir

It is my great honour to welcome all delegates to the Annual Scientific Congress of the College of Physicians of Malaysia, hosted at the remarkable Hospital Al-Sultan Abdullah, Universiti Teknologi MARA (UiTM). On behalf of The Ministry of Higher Education, we are truly honoured to have Duli Yang Maha Mulia Paduka Seri Sultan Perak Darul Ridzuan, Sultan Nazrin Muizzuddin Shah ibni Almarhum Sultan Azlan Muhibbuddin Shah Al-Maghfur-Lah in gracing and officiating the Annual Scientific Congress 2024. This distinguished event highlights the ongoing dedication of our medical community to enhancing healthcare standards through knowledge sharing, innovative research, and interdisciplinary collaboration.

As the Minister of Higher Education, I am proud to reaffirm the pivotal role of the Ministry in ensuring the production of highly skilled and compassionate medical specialists in Malaysia. Our Ministry is steadfast in its commitment to advancing medical education and maintaining Malaysia's global standing in healthcare excellence.

Through robust partnerships with esteemed institutions such as UiTM, we emphasize the continuous refinement of curricula to align with international best practices. This ensures that our medical professionals are equipped to address the complex challenges of modern healthcare. Additionally, fostering an environment of research and innovation remains central to our efforts, as it is through groundbreaking discoveries that we can improve patient outcomes and overall public health.

We also prioritize the development of healthcare educators and practitioners, who serve as the backbone of our medical training ecosystem. Through their expertise and dedication, Malaysia continues to cultivate a new generation of specialists who are both knowledgeable and empathetic. Moreover, our global engagement initiatives, including collaborations with international institutions, enable our professionals to exchange ideas and bring global perspectives to local challenges.

This Congress serves as a powerful platform to celebrate these collective efforts. It facilitates the exchange of groundbreaking ideas, strengthens professional networks, and reaffirms our shared commitment to advancing the field of medicine. The discussions and insights shared here will undoubtedly contribute significantly to the growth and improvement of Malaysia's healthcare landscape.

I extend my heartfelt gratitude to the College of Physicians of Malaysia and UiTM for their exemplary efforts in organizing this significant event. To all the delegates, I wish you an enriching and inspiring experience. May this Congress not only deepen your professional expertise but also allow you to enjoy the warm hospitality and cultural richness of Malaysia.

WELCOME MESSAGE

MINISTER OF HEALTH OF MALAYSIA

YB Datuk Seri Haji Dr. Dzulkefly bin Ahmad

On behalf of The Ministry of Health, I extend my warmest welcome to all local and overseas participants, Presidents of sister Colleges of Physicians and Heads of ASEAN Internal Medicine to the Welcome to the College of Physicians Annual Scientific Congress 2024. First and foremost I would like to express my utmost gratitude to His Royal Highness Sultan of Perak Darul Ridzuan, Sultan Nazrin Muizzuddin Shah ibni Almarhum Sultan Azlan Muhibbuddin Shah Al-Maghfur-Lah for granting the Officiating the College of Physicians Annual Scientific Congress 2024.

It gives me immense pleasure to welcome you to the Annual Internal Medicine Congress organized by the College of Physicians Malaysia. This gathering has become a cornerstone event for our internal medicine community, bringing together some of the brightest minds in the field to share knowledge, exchange ideas, and foster collaboration.

Let me first extend my heartfelt congratulations to College of Physicians Malaysia President Datuk Seri Dr. Paras Doshi and Congress Chairperson Dr. Rafiz Abdul Rani for their tireless efforts in making this congress a reality. Your leadership and vision have ensured that this annual scientific event continues to set new standards of excellence, and I am confident this year's congress will be no exception.

This year's theme, "Navigating Complexities in Medicine," reflects the challenges faced by healthcare professionals in today's rapidly evolving medical landscape. As internists, you are often at the forefront of diagnosing and managing complex, multifactorial cases. The nature of internal medicine requires not only a vast knowledge base but also the ability to adapt to emerging technologies and novel treatment paradigms. It demands critical thinking, a holistic approach, and a deep understanding of patient care that goes beyond mere diagnosis.

I am especially pleased and immensely proud that this year's congress coincides with the ASEAN Federation of Internal Medicine (AFIM) meeting, where Malaysia is set to be elected as the President-elect for ASEAN. This is a moment of great honour for our nation and a testament to the leadership and expertise of the College of Physicians Malaysia. This achievement underscores Malaysia's commitment to strengthening regional cooperation, advancing medical education, and improving healthcare standards across Southeast Asia. I am confident that under your leadership, Malaysia will continue to play a pivotal role in shaping the future of internal medicine in the region.

As we come together for this congress, I encourage all to engage actively in the discussions and share your experiences. The agenda is packed with insightful sessions, covering a wide range of topics from cutting-edge clinical practices to the latest advancements in diagnostics and therapeutics. I am certain that the exchange of knowledge here will leave us all better equipped to navigate the complexities of our profession and provide the best possible care to our patients.

To the organizers, participants, and international delegates, thank you for your dedication in advancing internal medicine and for your contributions to this important field. The Ministry of Health remains committed to supporting your endeavours and ensuring that Malaysia continues to be a hub for medical excellence and innovation. We recognize the importance of investing in our doctors, as you are the backbone of our healthcare system.

In closing, I wish everyone a productive, enlightening, and successful congress. May this event strengthen our shared commitment to medical excellence and pave the way for new collaborations, innovations, and breakthroughs.

WELCOME MESSAGE

PRESIDENT COLLEGE OF PHYSICIANS OF MALAYSIA

Professor Datuk Seri Dr Paras Doshi

As the College of Physicians President it gives me great pleasure to invite you to the Annual Scientific Congress 2024 organised by the College of Physicians, Academy of Medicine of Malaysia.

This is a very special Congress for a number of reasons. Firstly we are truly honoured that this is our first Congress that is graced by our Academy Patron, His Royal Highness Duli Yang Maha Mulia Paduka Seri Sultan Perak Darul Ridzuan, Sultan Nazrin Muizzuddin Shah ibni Almarhum Sultan Azlan Muhibbuddin Shah Al-Maghfur-Lah. This is a matter of great pride for us physicians in Malaysia and we are indebted to His Royal Highness.

Secondly as a College we are pleased to note that we have established new links and strengthened our relationships with our regional and international counterparts. In addition to welcoming delegate registrations from overseas, we are also playing host to representatives from sister Colleges who have joined us from the UK, USA, Hong Kong, Indonesia, India and Pakistan among others. We warmly welcome our guests and look forward to learn from one another.

This Congress has seen the College of Physicians Malaysia hosting our ASEAN Federation of Internal Medicine (AFIM) meeting which is a gathering of Presidents of Colleges and Internal Medicine Societies from the ASEAN region. It is a proud moment for Malaysia, as we prepare to take on the role of President-elect for ASEAN. This opportunity not only underscores Malaysia's leadership in the region but also highlights the commitment of our healthcare community to advancing internal medicine on the global stage. I am confident that under the College's guidance, we will continue to foster regional cooperation and elevate the standards of healthcare across ASEAN as the College prepares to take over the Presidency in 2026.

Thirdly, we will proudly welcome our FCOPM recipients who will receive their awards today. The FCOPM award stands as a peer recognition of subspecialty training for Physicians. It is vital that we recognise and celebrate the achievements of our peers. This year will witness our largest ever conferment yet of Fellowships. The College welcomes our new esteemed Fellows into its fold.

Finally and most importantly, this Congress has witnessed numerous new collaborations. This Congress has been jointly organised with Hospital Al-Sultan Abdullah UiTM, MAAIMUS and MARP. Together, they are not only responsible for putting this Congress together but have also been instrumental in organising an exciting full day Bedside Clinical Skills Pre-Congress which has proved to be very popular with our participants.

At this juncture, it is vital to thank our Council member, Dr Rafiz Abdul Rani who has been an excellent Congress Chairperson and has succeeded in leading the Congress to fruition. In addition, the UiTM team with team with Professor Ahmad Izuanuddin Ismail has been instrumental in ensuring that no stone was left unturned in preparing for this event.

This Congress would not have been possible with the support of the Ministry of Health and the Secretary General of Health Datuk Seri Suriani binti Ahmad. I would also like to specially thank all the Council members and the College Secretariat who have worked tirelessly behind the scenes for this Congress to ensure that all delegates have an informative and beneficial experience at the Congress.

As we gather over these three days, let us embrace this opportunity to learn from each other, to engage in stimulating discussions, and to reflect on our shared mission: the provision of the best possible care for our patients. The practice of internal medicine is ever-evolving, and it is through our collective efforts, innovations, and shared expertise that we can navigate the complexities of our profession and improve health outcomes for all.

I encourage you all to actively participate in the sessions, network with your peers, and take full advantage of the wealth of knowledge that this congress has to offer. Together, we have the power to shape the future of internal medicine, both within Malaysia and beyond our borders.

In closing, I once again welcome all to this congress. May your time here be productive, enriching, and memorable. Thank you for your dedication to the field of internal medicine and for your unwavering commitment to the health and well-being of our communities.

Terima kasih and thank you.

WELCOME MESSAGE

VICE-CHANCELLOR OF UNIVERSITI TEKNOLOGI MARA (UiTM)

Professor Datuk Dr Shahrin bin Sahib @ Sahibuddin

Welcome to Hospital Al-Sultan Abdullah (HASA) Universiti Teknologi MARA (UiTM). It is an honour for us to host this significant gathering of scholars, professionals, and thought leaders. This event provides a valuable platform for exchanging ideas, fostering collaboration, and advancing knowledge within our community. We are especially thankful and honoured to be graced by Duli Yang Maha Mulia Paduka Seri Sultan Perak Darul Ridzuan, Sultan Nazrin Muizzuddin Shah ibni Almarhum Sultan Azlan Muhibbuddin Shah Al-Maghfur-Lah in officiating the Annual Scientific Congress 2024.

We are pleased to hold this event at HASA, UiTM's premier teaching and research hospital. HASA embodies our commitment to excellence in medical education, patient care, and research innovation. As a state-of-the-art facility, it provides an inspiring environment for both learning and collaboration. It is indeed tailored made for medical education, making it an ideal venue for an event of this calibre.

At UiTM, the values of excellence, synergy, and integrity are deeply embedded and underlines our approach to medical education and clinical services. These principles guide our commitment to providing top-tier education, fostering collaborative environments, whilst upholding the highest ethical standards in healthcare. By integrating these values, we ensure that our graduates are not only skilled and knowledgeable but also compassionate and ethical practitioners dedicated to improving patient care and advancing medical sciences. All of these ensures we remained rooted while ensuring we moved forward towards achieving success at the global stage.

We are delighted to have you here and look forward to insightful discussions, innovative solutions, and meaningful connections that will emerge during this event. Thank you for being a part of this occasion, and may it be a memorable and enriching experience for all.

WELCOME MESSAGE

ORGANISING CHAIRPERSON

Dr Rafiz Abdul Rani

A very warm welcome and Selamat Datang to all our delegates and distinguished luminaries to the College of Physician – Annual Scientific Congress 2024! This year's edition taking place at the beautiful Hospital Al-Sultan Abdullah, Universiti Teknologi MARA at Puncak Alam, Selangor.

Merafak Sembah Menjunjung Kasih di atas limpah perkenan Kebawah Duli Yang Maha Mulia Paduka Seri Sultan Perak Darul Ridzuan, Sultan Nazrin Muizzuddin Shah ibni Almarhum Sultan Azlan Muhibbuddin Shah Al-Maghfur-Lah berangkat bercemar duli bagi menyempurnakan majlis perasmian persidangan. It is indeed our great honour to be graced by His Royal Highness in officiating the congress.

ASC2024 – Navigating Complexities in Medicine continues the tradition of being the premier scientific congress for internal medicine in Malaysia, catering on the breadth and scope of internal medicine; from acute internal medicine through to the respective subspecialties and ending with the rehabilitation period. Psychiatric topics ensures a more holistic approach in this day and age. Thank you to our esteemed speakers, the Malaysian Advanced Acute Internal Medicine and Ultrasound Society (MAAIMUSS) and the Malaysian Association of Rehabilitation Physicians (MARP) for their collaboration. Completing the congress are informative sessions giving glimpses into the future, from technological advances to issues regarding training and employments for doctors.

Featuring 45 participants and 15 facilitators at the pre-congress workshop on interventional insights. We are thrilled to have more than 300 delegates registered for the main congress, with attendance including Presidents of College of Physicians worldwide, respective Heads of Internal Medicines from ASEAN countries as well as international participants. A fierce competition would see 8 teams vying to be the champion and battling to lift the prestigious Khoo Kah Lin Physician's Cup.

A massive congratulations to the new College of Physicians Fellows on their conferment and to the honoured Lifetime Achievement Award recipients and the eminent Dato' Dr Lim Kee Jin Orator recipient for their extraordinary accomplishments. These collective individuals serves as exquisite iconic role models in the pursuit of excellence.

I would like to extend my heartfelt gratitude to the College of Physician Malaysia, Hospital Al-Sultan Abdullah UiTM, the organising committee, scientific committee and the various organising teams. A special mention goes to Secretariats from both College of Physicians Malaysia and Hospital Al-Sultan Abdullah UiTM. Lastly, a big thank you to our sponsors and industry partners for their unwavering support.

Sit back, enjoy the atmosphere, make new friends, reconnect with old acquaintances and enjoy the congress! Terima kasih!

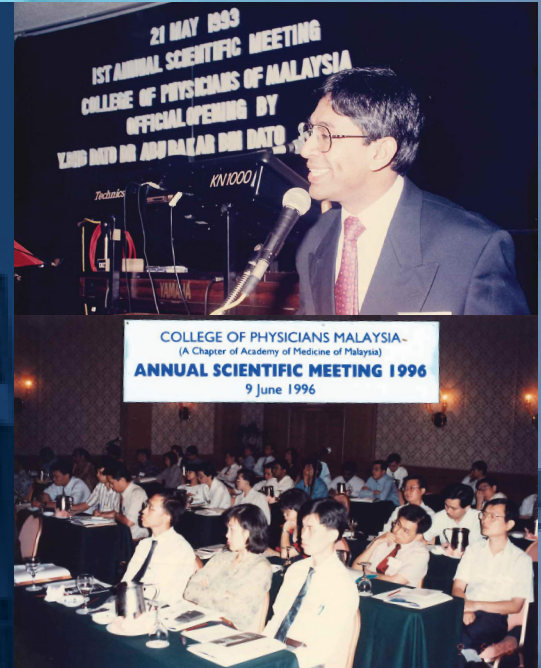

HISTORY OF THE COLLEGE OF PHYSICIANS OF MALAYSIA

Foundation and Early Development (1972-1993)

The College of Physicians of Malaysia was established in 1972 with the formation of a Pro-Tem Committee, led by Tan Sri Datuk Dr. R. P. Pillay as President and Dato' Dr. Amir Abbas as Secretary. The primary objectives of the college were to advance the study and practice of medicine, promote clinical research, and foster collaboration among physicians. A key focus was on supporting local medical education and facilitating scientific discussions and demonstrations to enhance medical knowledge.

In 1973, the college received temporary registration from the Registrar of Societies (ROS). Collaborative discussions with the College of General Practitioners and the College of Surgeons were held to address shared concerns within the medical community. These efforts culminated in a joint meeting with the Malaysian Minister of Health in 1978, where challenges such as the high cost of overseas training and the limited availability of local postgraduate medical education were discussed. Although the college advocated for parliamentary involvement in postgraduate medical education, the universities were ultimately assigned this responsibility.

The first Annual Scientific Meeting of the college took place from 21st to 24th May 1993, marking a significant milestone in its academic engagement and professional development initiatives.

Donation of land & working together with the College of Surgeons to create the Academy of Medicine (1992)

One of the most transformative developments in the history of the College of Physicians was the working together with the College of surgeons to create the Academy of Medicine of Malaysia in 1992.

This decision, formalized on 23rd June 1992, was driven by the desire to foster greater integration, cooperation, and coordination of specialist activities within the country.

The College of Physicians and the College of Surgeons, together with the Academy of Family medicine physicians donated the land upon which the first Academy building was constructed along Jalan Tun Razak. This noble and grand gesture, in the greater interests of the medical profession, provided the impetus for the creation of the first home for the Academy of Medicine Malaysia.

This development strengthened the position of the college in the broader medical landscape and enhanced its capacity to support the professional growth of Malaysian physicians.

Till today, the College of Physicians remains a major voice in the Academy of medicine as well as in the management of the new Academy of medicine building in Putrajaya.

Modern Achievements and Initiatives

Since its inception, the college has evolved into a significant institution within the Malaysian medical community. Notable achievements and ongoing initiatives include:

- **Publication of The Internist**

The college's official newsletter, providing regular updates and insights to members.

- **MRCP Courses and Examinations**

The college has played a key role in organizing MRCP (Membership of the Royal Colleges of Physicians) courses and mock examinations in collaboration with the Royal College of Physicians, helping to maintain high standards in postgraduate medical training.

- **Collaboration with the Ministry of Health (MOH)**

The college has co-organized several conferences with the MOH, reinforcing its role in shaping national healthcare policies and standards.

- **Credentialing Physicians**

Through the National Specialist Register (NSR), the college is actively involved in accrediting and credentialing physicians, ensuring the continued competence of specialists in various fields.

- **Sub-Specialty Engagement**

The college has established sub-specialty chapters to promote collaboration and integration among different medical disciplines.

- **Educational Outreach**

The college streams academic seminars in partnership with the Royal College of Physicians of Edinburgh and organizes "Saturday Teach-ins" aimed at medical students and junior doctors, reinforcing its commitment to high-quality medical education.

- **Fellowship and Awards**

In 2015, the Fellowship of the College of Physicians, Academy of Medicine of Malaysia (FCPAMM) in Clinical Haematology was established, followed by the introduction of the Lifetime Achievement and Innovation Awards in 2016, with Dato' Dr. Amir Abbas and Tan Sri Dato' Seri Dr. Haji Ismail Merican as the first recipients.

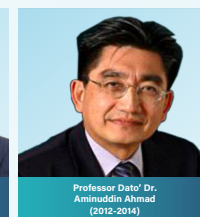

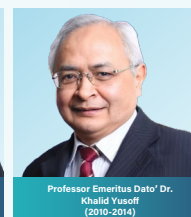

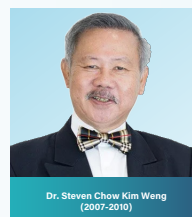

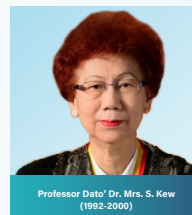

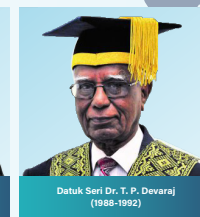

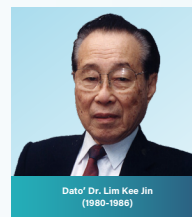

Leadership Legacy (1980-2022)

The college has been guided by a series of distinguished leaders who have contributed significantly to its growth and development. Past presidents include:

1. **Dato' Dr. Lim Kee Jin (1980-1986)**
2. **Dato' Dr. Amir Abbas (1986-1988)**
3. **Datuk Seri Dr. T. P. Devaraj (1988-1992)**
4. **Professor Dato' Dr. Mrs. S. Kew (1992-2000)**
5. **Tan Sri Dato' Seri Dr. Mohd Ismail Merican (2000-2004)**
6. **Dato' Dr. Zainudin Md Zin (2004-2007)**
7. **Dr. Steven Chow (2007-2010)**
8. **Professor Emeritus Dato' Dr. Khalid Yusoff (2010-2014)**
9. **Professor Dato' Dr. Aminuddin Ahmad (2012-2014)**
10. **Professor Dr. G. R. Letchuman Ramanathan (2014-2022)**
11. **Professor Datuk Seri Dr Paras Doshi (2022-Current)**

These leaders have played pivotal roles in shaping the college's direction and ensuring its enduring impact on the Malaysian medical landscape.

The College of Physicians of Malaysia continues to be a driving force in advancing medical education, research, and professional standards, playing a critical role in shaping the future of healthcare in the country.

INTRODUCTION OF MALAYSIAN ADVANCED ACUTE INTERNAL MEDICINE AND ULTRASOUND SOCIETY (MAAIMUSS)

The Malaysian Association for Advancement in Internal Medicine, Ultrasound, and Systems Science (MAAIMUSS) is a pioneering professional body dedicated to elevating the standards of Advanced Acute Internal Medicine in Malaysia. Founded with the aim of integrating innovative diagnostic techniques and multidisciplinary approaches, MAAIMUSS focuses on the synergistic application of ultrasound technology and acute medicine within clinical practice. By promoting advanced education in Acute Medicine and clinical skills development, MAAIMUSS seeks to empower physicians and improve patient care outcomes.

Advanced Acute Internal Medicine has proved to be a gamechanger in Hospital care. In Malaysia, acute medicine has developed into a vital subspecialty focused on the rapid assessment and management of patients presenting with urgent, often life-threatening conditions. The field addresses the needs of complex and undifferentiated patients—those with unclear diagnoses who may present with multiple, overlapping symptoms.

Health care facilities that implement Acute medicine have reduced admission rates and have a shorter length of stay. The reduced length of stay contributes to less complications for the patients as well. For the hospital this leads to a lower bed occupancy rate and better utilisation of hospital resources. Ultimately this results in major cost savings for the government and improved delivery of healthcare.

A central pillar of MAAIMUSS is the advancement of ultrasound as a core diagnostic tool. MAAIMUSS supports this evolution by advocating for the use of point-of-care ultrasound, a critical tool in the hands of acute care physicians, aiding in the swift identification of underlying issues without the delay of traditional imaging

MAAIMUSS has introduced specialized training programs and workshops, helping clinicians adopt cutting-edge ultrasound techniques that enhance diagnostic accuracy and treatment decisions. These workshops first launched in 2020 during the height of the COVID pandemic revolutionised the way Point of Care Ultrasound was taught with online modules and remote mentoring. These workshops have been rolled out all over the country and have been very well received. In addition to ultrasound, MAAIMUSS has also led the way in developing Acute Clinical Skills workshops for medical officers and junior internal medicine specialists.

In recent years, MAAIMUSS has achieved notable milestones, including impactful research initiatives, collaborations with national and regional medical bodies, and contributions to the ASEAN healthcare community. Of note, MAAIMUSS has collaborated closely with Brunei, Singapore, Sri Lanka, Thailand and the UK in advancing the widespread adoption of Acute Medicine within ASEAN. Its efforts have positioned Malaysia as a leader in the region for Acute internal medicine, showcasing the country's commitment to excellence in clinical practice and patient care.

INTRODUCTION OF MALAYSIAN ASSOCIATION OF REHABILITATION PHYSICIANS (MARP)

The Malaysian Association of Rehabilitation Physicians (MARP), established in 2011, is dedicated to advancing rehabilitation medicine across Malaysia. With over 120 members MARP comprises rehabilitation physicians from both private and public sectors. MARP serves as a collaborative platform for enhancing care for individuals with disabilities and chronic illnesses.

The association emphasizes education, research, and advocacy to improve patient outcomes through interdisciplinary approaches. It organizes workshops, conferences, and training programs to keep members updated on the latest rehabilitation techniques and technologies. MARP also collaborates internationally with organizations such as Asian Rehabilitation Medicine Association, International Society of Physical and Rehabilitation Medicine, and Asia-Oceanian Society of Physical and Rehabilitation Medicine.

Additionally, it engages with policy makers to advocate for improved access to rehabilitation services nationwide. By fostering a network of committed professionals, MARP raises awareness about the importance of rehabilitation in enhancing quality of life and contributes to a more inclusive healthcare system in Malaysia.

LIFETIME ACHIEVEMENT AWARD

DATO' DR ARIS CHANDRAN ABDULLAH

Citation by Dr Rafiz Abdul Rani

Dato' Dr. Aris Chandran Abdullah, also known as **Dato' Dr. Chandran Krishnan**, stands as a distinguished luminary within the Malaysian medical fraternity, celebrated for his profound contributions to clinical practice and medical education.

Graduating with an MBBS from Universiti Malaysia in 1979, Dato' Dr. Aris Chandran commenced his illustrious career at Hospital Ipoh (now Hospital Raja Permaisuri Bainun) as a house officer, medical officer, and registrar. His pursuit of excellence led him to Central Middlesex Hospital, London, where he gained invaluable experience under the mentorship of Dr. Martin McNicol and achieved Membership of the Royal College of Physicians. As a Consultant Physician, Dato' Dr. Aris Chandran played a pivotal role in enhancing the services at several key hospitals, including Hospital Kuala Kubu Baru, Hospital Pekan, Sarawak General Hospital, and Hospital Ipoh. Being the Head of Department of Medicine in the Hospital Ipoh; the State Hospital of Perak, his responsibilities involves advising the State Health Director and coordinating the Internal Medicine Specialty for the whole state. His guiding principle, "to facilitate, not frustrate," was instrumental during his tenure as Head of the Department of Medicine at Hospital Ipoh (1999 – 2014), fostering an environment where both physicians and healthcare professionals could thrive.

Dato' Dr Aris Chandran also had the distinct honour of serving as the personal physician to the Sultanate of Pahang Darul Makmur (1986-1988) and Sultanate of Perak Darul Ridzuan (1993-2014). Dato' Dr. Aris Chandran's dedication extends to medical education and organisational leadership. He has chaired numerous prestigious conferences, including the National Infection and Infection Control Meeting, ASEAN Primary Care Conference, and SEAGMA Annual Scientific Meeting. In recognition of his extensive contributions, Dato' Dr. Aris Chandran was honoured with the Darjah Paduka Mahkota Perak (DPMP) in 1996.

Presently, Dato' Dr. Aris Chandran serves as an Associate Professor at UniKL – Royal College of Medicine Perak, where he continues to inspire through his passion for teaching and his impressive portfolio of research and publications. An avid badminton player since his university days, Dato' Dr. Aris Chandran remains active in sports, serving as the Vice President of the Perak Badminton Association and striving to achieve a single handicap in golf.

For his remarkable contributions to medicine as a clinician, researcher, administrator and contributions off the field of medicine, The College of Physicians Malaysia proudly honours Dato' Dr. Aris Chandran Abdullah with the College of Physician Malaysia Lifetime Achievement Award.

LIFETIME ACHIEVEMENT AWARD

EMERITUS PROFESSOR DATO' DR. RAYMOND AZMAN ALI

Citation by Dr Rafiz Abdul Rani

Emeritus Professor Dato' Dr. Raymond Azman Ali stands as a paragon of excellence in Neurology. His illustrious career began with a medical degree from Monash University, Australia, followed by a Master of Medicine from the National University of Singapore in 1989. He was the pioneer of the Master of Medicine in Malaysia, where he earned the degree in 1991. His distinguished career includes a research fellowship at the Hospital for Neurology & Neurosurgery, Queen Square, London, before completing an MD in Neurology from Monash University.

Prof. Dato' Dr. Raymond has been instrumental in advancing epilepsy treatment in Malaysia. His unwavering dedication to clinical practice and academic excellence is reflected in his extensive publication record, comprising over 100 journal papers and clinical practice guidelines. He is a highly sought-after speaker, sharing his profound knowledge, experience and research insights both locally and internationally.

His exemplary leadership is evident in his current role as Chairman of the UiTM Research Ethics Committee, and his previous positions as Chairman of the Malaysian Epilepsy Council, Chairman of the Conjoint Board of Master of Medicine, and Dean and Hospital Director of Universiti Kebangsaan Malaysia to name just a few. His contributions have significantly elevated the standards of neurology and internal medicine, inspiring countless medical professionals.

Prof. Dato' Dr. Raymond's remarkable achievements have been recognised with numerous distinguished accolades, including the Anugerah Akademik Negara (2009), Tokoh Merdeka (2011), Malaysian Society of Neurosciences Lifetime Achievement Award (2019), and the prestigious Asian and Oceanian Outstanding Achievement Epilepsy Award (2022). He has been honoured with the Darjah Johan Negeri Pulau Pinang (2008), Darjah Dato' Paduka Negeri Sembilan (2010), and was appointed Emeritus Professor in Neurology in 2021.

In recognition of his extraordinary achievements, contributions, and unwavering dedication to medicine, The College of Physicians Malaysia proudly bestows the Lifetime Achievement Award upon Emeritus Professor Dato' Dr. Raymond Azman Ali.

LIFETIME ACHIEVEMENT AWARD

DATO' SRI DR AZHARI ROSMAN

Citation by Dr Rafiz Abdul Rani

Dato' Sri Dr. Hj. Azhari Rosman is a name synonymous with excellence in cardiology, both in Malaysia and globally. His esteemed reputation as a key opinion leader is well-earned, with wisdom and knowledge spanning clinical research, education, and international collaborations.

His academic journey began with a Bachelor of Science from the University of Aston, Birmingham in 1980, followed by an MD from Universiti Kebangsaan Malaysia in 1986. His early career was in Hospital Kuala Lumpur before election as a Member of The Royal College of Physicians (United Kingdom) in 1991. He served in various cardiology departments, including Hospital Kuala Lumpur, Hospital Klang, and as Senior Registrar at Institut Jantung Negara before his expertise was further honed at the Mayo Clinic, Rochester, Minnesota. Currently, Dato' Sri is a senior consultant cardiologist at the Institut Jantung Negara, with over 20 years of service.

Dato' Sri's specialties include interventional cardiology, cardiac defibrillator implantation, renal denervation, and cardiovascular risk reduction. He is deeply committed to educating both the cardiology community and the general public, frequently engaging in speaking and chairing roles at local and international scientific meetings. His role as principal investigator in numerous clinical trials underscores his extensive international network. His prolific publication record includes contributions to the New England Journal of Medicine and other international peer-reviewed journals, as well as several clinical practice guidelines.

Presently, Dato' Sri Dr. Hj. Azhari serves as Chairman of the CPR Committee and Director of Customer Experience at IJN. He holds several prestigious positions with currently being Vice President of Asia Pacific Society of Cardiology, Past President of National Heart Association of Malaysia, Malaysian Society of Hypertension and has been honored with multiple fellowships and awards, including the Darjah Dato' Paduka Mahkota Perak, Pingat Sultan Ahmad Shah and Pingat Panglima Jasa Negara.

In recognition of his outstanding achievements and lifelong dedication to medicine, Dato' Sri Dr. Hj. Azhari Rosman is a deserving recipient of the College of Physicians Malaysia Lifetime Achievement Award.

IMMINENT HEALTHCARE CHALLENGES - ARE WE READY?

Citations by Prof Dr Ahmad Izuanuddin Ismail

Tan Sri Datuk Dr. Ridzwan Abu Bakar, a prominent figure in Malaysian healthcare, has recently completed the new building project for the Academy of Medicine Malaysia, adding to his legacy of advancing medical education and infrastructure in the country. His role in this project highlights his dedication to creating a centralized facility where medical professionals can engage in research, training, and collaborative learning, essential for Malaysia's growing healthcare needs.

With an extensive background in medical academia and healthcare management, Tan Sri Ridzwan was well-prepared to lead this project. Over his career, he has served in key roles within the Academy of Medicine, including as Bursar and Scribe for more than a decade. His deep connection with the Academy and commitment to postgraduate medical education has earned him Fellowship recognition in the Royal Colleges of Physicians in London, Edinburgh, Glasgow, and Ireland. His experience in academia and healthcare administration, combined with formal management training from institutions like Wharton, NUS Business School, and Mayo Clinic, gave him the necessary expertise for such a significant endeavour.

Beyond academia, Tan Sri Ridzwan has held substantial roles in hospital management, having served as Group CEO of the Pantai Group of Hospitals, where he managed seven private hospitals. His leadership extended nationally as President of the Private Hospital Association of Malaysia (1998-2004) and internationally as President of the Asian Hospital Federation. In these roles, he worked closely with the Ministry of Health on key initiatives, including accreditation standards and health tourism.

In recognition of his contributions, he was honoured with the title "Datuk" in 1999 and "Tan Sri" in 2011. This latest achievement in the Academy of Medicine building project solidifies his commitment to fostering medical advancement in Malaysia. The facility will benefit generations of healthcare professionals and underscore Malaysia's status as a regional hub for medical expertise.

AWARDS

HONORARY FELLOWSHIP

PROFESSOR ANDREW ELDER

President, Royal College of Physicians of Edinburgh

Prof Dr Andrew Elder to become President of the Royal College of Physicians of Edinburgh.

An expert in the teaching and assessment of clinical skills, he was Medical Director of MRCP(UK) – the world's largest postgraduate medical examination – from 2013 to 2018.

He has been a visiting professor at a number of US institutions and in 2022 became inaugural Visiting Professor of Bedside Medicine at Johns Hopkins, Baltimore.

In 2021 he was awarded Mastership of the ACP, becoming the first doctor practising in Scotland to attain this honour since its inception in 1923.

PROFESSOR AYE AYE CHIT

President, Myanmar Internal Medicine Society

Professor Aye Aye Chit, a distinguished clinician and academic leader, is the Head of the Department of Medicine at the University of Medicine, Mandalay, and President of the Myanmar Internal Medicine Society.

With extensive qualifications, including MRCP (UK) and FRCP from Edinburgh, Glasgow, and London, she has excelled in medical education, research, and clinical practice. As a Federation Lead Examiner for MRCP (UK) PACES, she has elevated assessment standards. Her research focuses on infectious and non-communicable diseases.

A dedicated mentor, Professor Aye's visionary leadership has advanced healthcare delivery, education, and internal medicine in Myanmar and beyond.

PROFESSOR MING-SHIANG WU

President, Taiwan Society of Internal Medicine

Ming-Shiang Wu is a distinguished professor and superintendent at National Taiwan University Hospital and President of the Gastroenterological Society of Taiwan.

A 1989 graduate of National Taiwan University College of Medicine, he earned a PhD in 1998. Specializing in Helicobacter pylori-related diseases and gastrointestinal malignancies, he has published over 450 papers and three book chapters.

His accolades include the Outstanding Research Award (three times) and the Emerging Leader Award (Asia Pacific Digestive Week 2008). Professor Wu has been on the editorial boards of Gut and Gastric Cancer, reflecting his global contributions to gastroenterology research and education.

AWARDS

HONORARY FELLOWSHIP

PROFESSOR MOHAMMAD SHAHIDULLAH

President, Bangladesh College of Physicians and Surgeons

Professor (Dr.) Mohammad Shahidullah is a retired neonatology professor at Bangabandhu Sheikh Mujib Medical University (BSMMU) and President of the Bangladesh College of Physicians and Surgeons (BCPS).

With an FCPS in Pediatrics and international experience in neonatal care, he has chaired several national health committees, including the National Technical Advisory Committee on COVID-19.

As a researcher, he has led multiple global studies on neonatal health and preterm birth, supported by WHO, USAID, and UNICEF. A pioneer in neonatal education, he introduced Bangladesh's first MD program in neonatology. He has over 82 publications and has actively contributed to global health policies.

ASSOCIATE PROFESSOR DR VALY KEOLUANGKHOT

President, Lao Internal Medicine Association

Assoc. Prof. Valy Keoluangkhot is the President of the Lao Internal Medicine Association, Vice President of the National Immunization Technical Advisory Group, and a member of the Lao Health Professional Council. She received the Honorary Fellowship of the Royal College of Physicians of Thailand in 2019.

With over 25 years of experience, she has served as Head of the Internal Medicine Department at the University of Health Sciences and Head of the Infectious and Tropical Diseases Centre at Mahosot Hospital. She has taught and mentored at both the University of Health Sciences and Lao Tropical and Public Health Institute.

Her research focuses on infectious and tropical diseases, in collaboration with the Lao-Oxford-Mahosot Hospital-Wellcome Trust Research Unit. She has authored national guidelines on tropical diseases, including HIV.

DR ISAAC O. OPOLE

President, American College of Physicians

Dr. Isaac O. Opole, Associate Vice Chancellor of Student Affairs at the University of Kansas Medical Center, is a medical educator dedicated to fostering professionalism and student development.

After earning his medical degree from the University of Nairobi and a Ph.D. from UC Irvine, he completed residency at Kansas University Medical Center, joining its faculty in 2005. He directed the award-winning Internal Medicine Clerkship and led the development of the ACE curriculum.

A Fellow of the American College of Physicians, he served as Kansas Chapter Governor and ACP Regent. Dr. Opole has received numerous teaching awards, including the Ruth Bohan Professorship.

AWARDS

HONORARY FELLOWSHIP

DR JYOTIRMOY PAL

President, The Association of Physicians of India

Professor (Dr.) Jyotirmoy Pal, MD, FRCP (London, Glasgow), is a renowned physician and educator. He is a Professor in the Department of Medicine at the College of Medicine and Sagar Dutta Medical College and President-Elect of the Association of Physicians of India (2024-25).

A former Dean of the Indian College of Physicians and an ex-Secretary of the Indian Medical Association, he has published over 70 articles in national and international journals. As an editor, he has contributed to multiple medical textbooks, including Progress in Medicine and McMaster Book of Internal Medicine.

His expertise spans tropical medicine, respiratory diseases, and clinical methods.

DR SALLY AMAN NASUTION

President, Indonesian Society of Internal Medicine

Sally Aman Nasution, MD, PhD, FINASIM, FACP is an Indonesian Internist-Cardiologist, primarily working as the Doctor of Intensive Cardiac Care Unit – Integrated Heart Services Unit of Dr. Cipto Mangunkusumo Hospital, Jakarta, Indonesia. She is also a senior lecturer in the Cardiology Division, Department of Internal Medicine, Faculty of Medicine Universitas Indonesia.

Throughout her career, she has treated various cardiology and critical care patients in the national referral hospital of Indonesia while simultaneously trained multiple internists and cardiologists.

In the field of research, she has contributed in 20+ international publications. Her primary research interest includes acute coronary syndrome, arrhythmia, and hyperglycemia.
