

Vexa Privacy Policy

Effective Date: July 11, 2026

This Privacy Policy describes how Vexa ('the Bot') collects, uses, stores, and protects information while operating on Discord servers. This policy is intended to satisfy Discord Developer requirements.

1. Information Collected

Vexa collects only the information necessary to provide requested features. Depending on which features a server enables, this may include: Discord user IDs, server IDs, channel IDs, role IDs, message IDs, thread IDs, interaction metadata, command inputs, configuration settings, reputation records, giveaway entries, achievement progress, ticket metadata, scheduling information, and links provided by users. Vexa does not request or use Discord's Message Content privileged intent. Standard messages are not read or stored for command processing.

2. How Information Is Used

Data is used solely to provide bot functionality such as moderation, ticketing, giveaways, reaction roles, achievements, reputation, custom commands, scheduled messages, sticky messages, AFK status, and other server features.

3. Data Storage

Configuration and feature data are stored in a database controlled by the bot owner. Data is retained only as long as needed to operate enabled features or until deleted by administrators or the bot owner.

4. Data Sharing

Vexa does not sell personal data. Data is not shared with third parties except as required to operate through Discord's platform or when required by law.

5. User Controls

Server administrators control most stored configuration. They may delete or reset many features directly through bot commands. Users may contact the bot owner to request removal of personal data where technically feasible.

6. Security

Reasonable administrative and technical measures are used to protect stored data. No system can guarantee absolute security.

7. Children's Privacy

Vexa is not intended for children under the minimum age required by Discord's Terms of Service.

8. Changes

This policy may be updated periodically. Continued use of Vexa after updates constitutes acceptance of the revised policy.

9. Contact

For privacy questions or data requests, contact the Vexa developer through the official Vexa support server or the contact information provided with the bot.
