- Designed by chefs for chefs
- Food-safe formula
- Rice vinegar & lemon oil
- Sanitary alternative to linen & cleaning service
- Great for final touch ensuring perfect plates every time

XL Funn-Flex Straws

100ct bag: FG192STW2000

- Assorted Colors
- Recyclable
- BPA-free plastic construction

Canister Bracket

MS-RCK02

- Powder coated steel construction
- Fits Handyclean™ 120ct canister and above
- Install on wall for easy dispensing

Towel Warmer

FTWR18

- Keeps hand wipes warm before serving
- Already set for optimal temperature, no need to adjust any dial

Handyclean™ Rinse-Free Sanitizing Wipes Technical Bulletin

Sanitization Data (Food Contact Surfaces)

Test Method	AOAC Germicidal and Detergent Sanitizing Action of Disinfectants
Test Conditions	Ready-to-Use (RTU) 60 second contact time 5% organic soil load 400 ppm active quaternary tested on glass and textured HDPE surfaces

Results	Total Bacterial Counts/ % Kill vs. Exposure Time				
	30 seconds		60 Seconds		
Test Organism	Sample	TBC*	%Kill †	TBC*	%Kill †
Escherichia coli (ATCC 11229)	A	≤850	>99.999	≤40	>99.999
	B	≤420	>99.999	≤660	>99.999
	C	≤670	>99.999	≤130	>99.999
Staphylococcus aureus (ATCC 6538)	A	≤920	>99.999	≤580	>99.999
	B	≤870	>99.999	≤650	>99.999
	C	≤1090	>99.999	≤1140	>99.999

* TBC = Total Bacterial Count, cfu/ml (cfu = colony forming units)
† % Kill calculated based on parallel inoculum control count of 81,000,000-100,000,000 cfu/ml for Escherichia coli and 120,000,000-260,000,000 cfu/ml for Staphylococcus aureus.

Conclusion

Under the conditions of these investigations, Handyclean Rinse-Free Sanitizing Wipes demonstrated sanitizing activity on food contact surfaces against Escherichia coli (ATCC 11229) and Staphylococcus aureus (ATCC 6538) according to criteria established by the U.S. Environmental Protection Agency for registration and labeling of a disinfectant product as a sanitizer.

Sanitization Data (Non-Food Contact Surfaces)

Test Method	Sanitizer Test for Inanimate, Non-Food Contact Surfaces
Test Conditions	Ready-to-Use (RTU) 30 second contact time 5% organic soil load 400 ppm active quaternary tested on glass surface

Results	Total Bacterial Counts/ % Kill vs. Exposure Time		
	30 seconds		
Test Organism	Sample	TBC*	%Kill †
Klebsiella pneumoniae (ATCC 4352)	A	≤930	>99.9
	B	≤260	>99.9
	C	≤470	>99.9
Staphylococcus aureus (ATCC 6538)	A	≤610	>99.9
	B	≤20	>99.9
	C	≤40	>99.9

* TBC = Total Bacterial Count, cfu/ml (cfu = colony forming units)
† % Kill calculated based on parallel inoculum control count of 20,000,000 cfu/ml for Klebsiella pneumoniae and 65,000,000 cfu/ml for Staphylococcus aureus.

Conclusion

Under the conditions of these investigations, Handyclean Rinse-Free Sanitizing Wipes demonstrated sanitizing activity on non-food contact surfaces against Klebsiella pneumoniae (ATCC 4352) and Staphylococcus aureus (ATCC 6538) according to criteria established by the U.S. Environmental Protection Agency for registration and labeling of a disinfectant product as a sanitizer.

FAQ

HANDYCLEAN™ RINSE-FREE SANITIZING WIPES

Q. What is this product?

A. Handy Clean Food Contact Surface Safe Rinse-Free Sanitizing Wipes

Q. Why is this product necessary?

A. CDC (Centers for Disease Control) estimates that over 48 million people get sick in the US each year due to foodborne illness.

Q. What does this product do?

A. These wipes clean and sanitize both food and non-food contact surfaces to prevent cross contamination that can cause foodborne illness.

Q. How does this product work?

A. By cleaning, sanitizing, and killing over 99.9% of common bacteria that can cause foodborne illness.

Q. But does this product really work?

A. These quaternary-based wipes are EPA-approved and registered, with proven efficacy claims. Refer to the previous page for details.

Q. Some competitive products claim that 175ppm of quaternary solution is what makes their wipes food code compliant without a rinse. Your product contains 400ppm. Is it safe?

A. Current EPA standards have deemed and approved this product to be safe for cleaning & sanitizing non-porous food contact surfaces without a potable water rinse. This product is fast, safe and effective.

Q. Some competitive products claim to kill Salmonella. How come I don't see it on yours?

A. The Salmonella kill claim requires the treated surface to stay visibly wet for 5 minutes, requiring multiple applications. Under most circumstances, this is not reasonable or feasible.

Q. Is it easy to use?

A. Yes! Each premoistened wipe delivers the same amount of quaternary solution every time. No measuring or mixing required. No red buckets and no dirty rags. No need to test the mixed solution. Helps reduce the risk of slip and fall accidents caused by red bucket spills.

Q. How do you use it?

A. Just pull, wipe, and toss. You only need to make sure that the surface stays visibly wet for 30 or 60 seconds.

Q. Where can the product be used?

A. The product can be used on most hard, non-porous food and non-food contact surfaces in FOH (front of the house) and BOH (back of the house) in any foodservice environment.

Q. What about the cost?

A. These wipes will reduce ongoing operating expenses by replacing the costs of purchasing chemicals, laundering and replacing towels.

Q. What's in it for restaurant patrons?

A. The use of these wipes greatly improves guest perception of cleanliness and adds to a positive dining experience. Just imagine no more over-spray, no dirty rag, and no sticky or smelly tabletop.

Q. Our partners and patrons are increasingly concerned about going green. What can you say about this?

A. This product is produced in the USA, in our solar-powered, EPA Green Power Partner-certified manufacturing factories. Precisely measured and pre-mixed solution in each wipe helps conserve unnecessary use of water during cleaning and sanitizing. The canister packaging is easily recyclable through a conventional municipal or private recycling program.

Q. What is the bottom line for end-users?

A. Peace of mind...

HANDYCLEAN™ TABLE CLEANING WIPES

Q. What are these wipes?

A. These wipes can be used by wait staff or guests to easily clean tables and bar tops.

Q. What do these wipes do?

A. Handy Clean Table Cleaning Wipes instantly clean most non-porous hard surfaces. Proven effective in removing contaminants.

Q. Do they really wipe away contaminants?

A. These wipes are tested by an independent laboratory and proven to wipe away 99% of common contaminants from nonporous hard surfaces.

Q. How do I use these wipes?

A. Simply wipe desired hard surface areas to clean and let air dry. Perfect for tables, chairs, counter tops, and kitchen surfaces.

Q. Is this product EPA registered?

A. No. This product is a cleaning product and does not require an EPA registration.

Q. Does this product have any disinfecting, sanitizing, or kill claim?

A. No. These wipes are cleaning wipes.
