

DESIGNED TO KEEP YOUR CUSTOMERS COMING BACK

We take your customers' expectations seriously when we design your mobile truck. No short cuts or cookie-cutter layouts. Working closely with you, we define your operation, then custom design an efficient, highly functional and flexible box interior that's built to last. When you work faster and easier, you're the go-to-truck.

CUSTOMIZED FOR OPTIMAL WORK SAFETY, SPEED AND FLOW

1. New commercial-grade appliances and equipment. Made by top-reputation manufacturers for functionality, efficiency and safety.

2. Commercial hood with high-CFM up-blast exhaust fan. Draws air rapidly out of your truck interior.

3. Custom-designed, stainless steel work table. Installed at an optimal work height and depth. Its heat-resistant and easy-to-clean stainless steel surface is perfect for food prep. Under-table storage shelving is available.

4. Watertight lighting. Clearly illuminates workspace for better visibility. Made to withstand extreme temperatures, too.

5. Custom wall shelving. Designed for easy reach and safe supply transport. Choose from solid, wire or bin styles.

6. High-velocity, adjustable-speed RV vent. Offers more air movement to keep interior fresh. Fine-mesh screen keeps insects out.

7. 12-volt water pump. Keeps steady flow of water available.

8. 38-gallon fresh water tank.

Provides adequate water supply for most shifts, easy to refill as needed. Fill hatch has key lock to protect from contamination and pilfering.

9. Sink plumbed with p-trap, backflow preventer. Captures food debris for easier removal. Minimizes deep clogs and unpleasant interior odors.

10. Ansul hood sprinkler. Delivers fast, thorough protection of your business from fire.

11. New Onan Mobile 60 dB(A) generator. Switch-to-start makes operation easier. Available in quiet diesel or gasoline models.

12. Custom features. Describe your need, we'll add features such as this retail order well, to make it more efficient to interface with customers.

13. Custom window sizes. Optimize your customer service options and interior lighting. Tempered glass, screens and overhead awning.

14. Fully insulated wall with fire retardant materials and 24-gauge stainless steel finish throughout the box.

Helps control internal temperature. Stainless steel overlap minimizes damage from accidental fire flare-ups. Every design puts safety first.

15. Wiring through conduit. Ensures wiring withstands potholes and bumpy off-road parking lots so there are no shorts or disruptions of electricity.

16. Slip-resistant flooring. Lets workers move quickly from end to end of the box; it's easy to clean, too.

BUILT SPECIFICALLY FOR *your* MOBILE BUSINESS

CODE COMPLIANCE

The entire box meets your community's health and fire code requirements.

LOGICAL LAYOUT

Everything in your box has a place and is positioned so it's user friendly and maximizes your efficiency. This is never a low-end, one-design-fits-all interior. It's built for *your* business.

MODULAR FLEXIBILITY

Owning a mobile truck not only offers location flexibility, but interior design flexibility, too. Our modular design approach allows you to rearrange cupboards and cabinets so you can adapt storage and prep needs to new menu items or product lines.

NOT JUST FOR FOOD

We also custom design trucks for a range of retail or service businesses. Working with you, we'll create the brand ambience and customer interaction you want by adding windows, doors, walls, flooring, skylights, shelving, furniture and traffic flow that lets you serve the maximum number of customers.
