**NOTE:**

You may register and take tests (except for the X1 test) before you have the necessary experience. If you do so, you will receive a score report, but you will not earn certification or receive certificates until you fulfill the experience requirement.

To become ASE certified, you must pass an ASE test and have relevant hands-on work experience. ASE recommends submitting the Certificate of Completion after you've registered to take an ASE certification test.

Books are bought in bulk, which allows AOGRC to keep tuition low for Students/Veterans who buy the books through the Academy versus on their own. The program cost is higher when books are purchased from the vendors.
