

AI.R Monitor Quick Start Guide

Welcome to your AI.R Monitor! This device is designed to monitor air quality in real time and optimize your environment by detecting and measuring particulate matter (PM2.5), formaldehyde, volatile organic compounds (VOC), carbon dioxide, temperature, and humidity.

Getting Started

Step 1: Power On the Device

1. Connect the AI.R Monitor to a 5V/1A USB power supply using the provided USB cable.
2. Once powered, the device's indicator light will flash to indicate it's ready to connect.
3. If the light does not flash, press and hold the reset button on the bottom of the device for 5 seconds until it begins to blink.

Step 2: Install the SmartLife App

1. Download the SmartLife app:
 - **From Your Phone:** Use this link: [SmartLife App for iOS](#).
 - **From Your Computer:** Scan the QR code on this page with your phone: [SmartLife App QR Code](#).
2. Install the app, then create an account or log in.

Step 3: Connect the Device to Wi-Fi

1. Open the SmartLife app and tap the "+" button to add a new device.
2. Select the category "Sensors" and choose the "Air Quality Monitor" option.
3. Ensure your phone is connected to a **2.4 GHz Wi-Fi network** (not 5 GHz).
4. Follow the on-screen instructions to connect the device.
5. Once connected, the indicator light on the monitor will stop flashing.

Important Notes

- **Avoid Extreme Environments:** Do not place the monitor in direct sunlight or areas with strong airflow (e.g., near exhausts, vents or fans). These factors can distort pollution measurements.
- **Preheat Sensors:** After powering on, allow the monitor to warm up for 3-5 minutes to provide accurate readings.
- **Outdoor Use:** Make sure to use the weather-ready cover to help protect the monitor from outdoor elements.
- **Do Not Tamper:** Do not open the monitor's housing or tamper with internal sensors or electronics.
