

To whom it may concern:

My Name is Adriana Lopez and I am writing again about the use of [78 Micro Nutrients™](#). This time I am writing about my daughter Gaby Lopez and her using the pills. At first as a teenager she did not want to take the pills, but as her mother I encouraged her to take them for her overall health. I told her she did not have to continue taking them. Within 3 weeks of taking the pills we noticed her acne had begun to noticeably clearing up, we had not anticipated that this might be a result of using the pills.

She continued using the pills for another 2 weeks and her skin on her face was completely clear. In the usual fashion of a teenager she began to stop taking the pills daily and at one point for almost a week her acne began to reappear. So needless to say at this point she does not miss taking her pills

She and I are so grateful for the pills and we feel much better in overall health and Gaby is so pleased by her results and clear skin. Also for my sister and myself I have noticed a decrease in appetite as well both of us no longer get the shakes from low blood sugar between meals which at times caused us to eat every few hours. But we both no longer get the shakes since we have been taking [78 Micro Nutrients™](#).

I would recommend this product to anyone for its healthy benefits.

Thank you,
Adriana Lopez
