

To whom it may concern:

My name is Adriana Lopez; I am writing this letter regarding the use of [78 Micro Nutrients™](#). Due to the fact that my brother Jesus Martinez has been using [78 Micro Nutrients™](#), He came to visit me in March of 2012, which I did not realize how sick he really was, so I took him to the Dr. because he was having trouble seeing and his feet were turning black.

The Dr. stated after testing Jesus, “that he had only about 10% of his vision and his feet were black because he had type 2 diabetes”. He was also diagnosed with kidney failure and was placed on a waiting list for a possible transplant. Dialysis was the only option given until he could receive a new kidney. He was also placed on high blood pressure pills that needed to be taken twice a day, As well as receiving diabetes medicine and undergoing treatment to try and help his vision.

We also sought an opinion of another Dr. who was a specialist in this area and she gave us the same results of the previous Dr. She also stated that she did not believe he would have much time to live based on his condition and the test he had gone through she gave him 6-9 months to live.

Upon arriving home from the Dr's and the various testing that had gone on, I had my brother start taking [78 Micro Nutrients™](#) He would take 3 pills a day in the morning before eating breakfast and he continued taking the pills daily. He continued to receive treatment for his vision and he also continued to take his prescribed medicine for high blood and diabetes. My brother went in on August 14th to start his dialysis treatment and he was told that he would not need the treatment.

The Dr's themselves seemed quite confused at the results of Jesus not needing dialysis and they did not have much explanation as to why. His vision has also returned to normal and he has cut his use of high blood pressure pills in half.

I have no other explanation as to why my brother's health has returned but I believe the use of these naturally chelated trace minerals [78 Micro Nutrients™](#) have allowed the medicine and treatments to work and they have repairing his body.

Thank you,  
Adriana Lopez
