Daily cost of Feed: \$ 8,700.00

Results: Feed reduction of 500 lbs per day,  
resulting in a savings of \$ 15,630.00  
per month in feed cost

### Our Customer's Story

We milk 2500 goats twice per day and have 200 dry goats. When spring comes, milk production goes up and at the same time feed consumption also goes up.

This year we were using 78 Minerals® along with our feed ration when the weather warmed up. Our milk production along with protein and butter fat increased. We experimented with dropping 78 Minerals® from our feed and our feed consumption went up 500 pounds per day.

The extra feed was costing us \$638.00 per day.  
When we starting using 78 Minerals®
