

Testimonial

using

78Minerals®

to treat Insomnia and Diabetets

It's vital that WE THE PEOPLE begin spreading the word on the amazing healing properties of Calcium Clay. It's time we stood up and refused to continue being guinea pigs for the pharmaceutical companies. We recently received this testimonial from Bob C. about the incredible results he's getting with clay use:

"I'm an elderly retired man who suffers from both diabetes and chronic Insomnia. I've spent years taking prescription sleep aids with un-satisfactory results. My son, a Naturopathic Doctor, sent me 16 oz. of 78 Minerals, I began taking the Clay internally and after two days my insomnia has all but disappeared. I've not slept this well in years! Furthermore, my avg. morning blood sugar readings are around 145; I've now been getting consistent readings of 75! I credit my newly found clay regime for both of these significant breakthroughs. It amazes me that such an affordable, natural, and effective cure has found me. I will tell everyone I know about this amazing clay." – Bob C.

Spread the word, people!
