

Sometimes we all need to go an
Emergency Room (ER).
But **most injuries & illnesses** can be
managed without a trip to a hospital.

We help you navigate **urgent and
emergency medical** needs.
Our **advanced practice paramedics**
and **providers** respond to you!

What do we treat?

*Acute Pain. Cough. Dehydration. Fever. Infection. Laceration.
Nausea. STDs. UTIs. Vomiting. Just to name a few!*

What can we do?

*Point-of-Care Assessments & Diagnostics. EKG. Ultrasound. Rx
Administration. Telemedicine. And so much more!*

*In our model, we're not replacing 911.
We're not replacing ERs.
We're not replacing Primary Care.*

*We are complementing all of those services,
and we're adding a protective layer over all of them,
to fill the gaps where they exist,
not to replace current services.*

*We're not competing with hospitals.
We're not competing with primary care docs.
We're not competing with concierge medicine.
We're complementing. We're physician extending.*

*That one person,
that one agency that they can call 24/7
with the aim of protecting their health security.
That one group, that's us.*

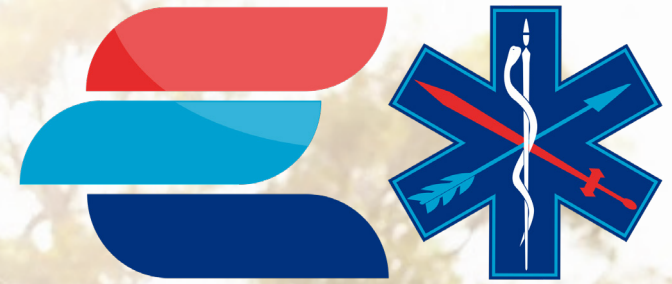

**- Anthony A. Barone, M.P.S., M.P.H., NRP
CEO & Protective Paramedic Practitioner**

Do you need medical care at home or in the office? Are you golfing, at a social event, or dining with friends? No sweat, we come to you.

Protection + Care

Custom protective medical services. Discounted medications and diagnostics. Adventure off-grid & Travel Rx. Simply better medicine.

Welcome to EMERGILITY™
where our medicine is your protection

Individuals & Families | *More often than not, medical care can be brought directly to the patient. We help individuals & families address personal medical needs from the comfort and privacy of their home.*

Executives & Protectees | *Our mobile medical care services provide executives and protectees with private, secure, time-saving, and convenient care, without compromising security or protection.*

Businesses & Practices | *When it comes to business continuity, health protection matters. We help businesses & practices protect clients & employees through private mobile medical care.*

Communities & HOAs | *Communities are meant to be safe, secure, and protected. But you cannot have protection in the absence of medicine. We help secure communities with medicine as protection.*
