SECURITY. INTELLIGENCE. MEDICINE.

# Protection and care, wherever life takes you.

Private protective services and direct-access paramedicine designed around the people, places and circumstances that matter most.

## Security

Discreet protective security services, risk-aware planning and operational support.

## Intelligence

Investigative and protective intelligence that informs better security decisions.

## Medicine

Mobile paramedicine, direct-access care and protective medical capabilities.

## Who we serve

Individuals and families • Executives and protectees • Diplomats and dignitaries • Organizations and events • Clients who need mobile care and coordinated protection.

Northern Virginia-based • Discreet, mobile and mission-specific

# Protective Security & Intelligence

Two distinct disciplines, coordinated when the mission requires them.

## Protective Security Services (PSS)

Discreet personal and executive protection, protective advances, security operations and related professional services. Security plans are tailored to the client, threat environment and operating context.

**PERSONAL PROTECTION • SECURITY OPERATIONS**

## Protective Intelligence

Investigative research, situational awareness, vulnerability assessments and risk-informed planning help clients and protective personnel make sound decisions.

Intelligence supports protection; it is not a substitute for security operations.

## Protective Medicine / PSS-EMS

Protective agents and medical professionals can be integrated for missions that require both safety and advanced medical readiness.

EMERGILITY® integrates Security, Intelligence and Medicine without treating these professional disciplines as interchangeable.

# Medicine that comes to you

Paramedicine is a profession; EMS is an operational and regulatory environment.

## Direct-Access Paramedicine (daP)

Private, physician-directed paramedicine for community, concierge and protective settings. An initial Health & Wellness Evaluation establishes an ongoing direct-access relationship.

### Mobile Integrated Healthcare

MIH / direct-access Primary Care (daPC) provides Family Nurse Practitioner-led primary care alongside daP access.

### EMS / First Response

Licensed non-transport BLS/ALS capabilities support on-scene medical response and appropriate escalation; not a substitute for public 9-1-1.

### Diagnostics & Follow-up

In-home assessments, laboratory coordination, monitoring and follow-up may be arranged as clinically indicated.

### Continuity & Transitions

Support for chronic care needs, recovery, aging in place and coordination with existing physicians and clinical teams.

## Protective Medicine

Medical preparedness and support for protectees, travel and complex operating environments—integrated with protective services when appropriate.

# A clear way to begin

An ongoing relationship established before an urgent need arises.

**01**

## Explore your needs

Discuss the people, locations and requirements involved, and select medical, protective or combined services.

**02**

## Establish your baseline

For direct-access care, complete the appropriate Health & Wellness Evaluation (daP) or Family Health Examination (MIH/daPC).

**03**

## Activate access

Arrange annual program access, request clinical services as needed and coordinate any protective engagement separately.

## Published direct-access enrollment

| | | |
|---|---|---|
| **daP** | Adult $1,850 / year | Child $500 / year |
| **MIH/daPC + daP** | Adult $3,200 / year | Child $800 / year |

Annual examination and one year of access are included as described. Subsequent services are billed separately. Protective services are scoped and priced independently.

EMERGILITY® complements existing clinicians and public safety services. It is not health insurance and does not replace 9-1-1 in a life-threatening emergency.
