

Paramedicine — Reimagined for Modern Healthcare. EMERGILITY® is Northern Virginia's first and only Emergency Medical Services agency delivering **direct-access Paramedicine (daP)** — a physician-directed, advanced-practice model bringing personalized paramedic care directly to patients, physician practices, and private clients, 24/7, without a 9-1-1 call.

What Is Paramedicine?

Paramedicine at EMERGILITY® sits at the intersection of healthcare, emergency management, public health, and public safety. Delivered through licensed EMS and physician-directed Paramedic Practitioners, it extends clinical care far beyond traditional 9-1-1 response. Advanced-practice Paramedicine equips providers with the clinical depth to manage critical, emergent, and urgent patients in the field.

What Is direct-access Paramedicine?

direct-access Paramedicine (daP) removes the barrier of needing a 9-1-1 call to access paramedic-level care. Inspired by the Direct Primary Care (DPC) movement, daP gives Protected Members private, on-demand access to an advanced-practice Paramedic — at home, at work, or any private location. EMERGILITY® partners with DPC, concierge medicine, and private hospital systems for physician-extension support.

Our Three Paramedicine Delivery Models

Community Paramedicine

Provider-Led · Patient-Centered · CP

Community Paramedicine is a provider-led, patient-centered model that deploys specially trained EMS clinicians in an expanded role — rendering care, improving delivery efficiency, and connecting patients to community resources that address the social determinants of health.

Concierge Paramedicine

Membership-Based · Private Access · VIP

A private, membership-based model in which a VIP Member pays an annual retainer for priority access to an advanced-practice Concierge Paramedic and a dedicated EMS agency — personalized care, on your terms. Four membership tiers are available:

Private · Preferred · Executive · Exclusive

Protective Paramedicine

Protective Medicine · PSS-EMS

Protective Paramedicine unites a multidisciplinary skillset with proprietary practices — integrating Protective Security Services (PSS) and Emergency Medical Services (EMS) to safeguard a client's health and personal safety within one coordinated model.

Who We Serve

For Patients & Protected Members

■ Protected Members & Private Clients

24/7 private paramedic access for individuals and families who prioritize personalized, proactive care.

■ Executive & High-Profile Individuals

Integrated PSS-EMS model pairs Protective Paramedics with security professionals.

■ Travelers & Private Events

On-site or mobile medical support where standard EMS coverage falls short.

For Physician Partners

■ Direct Primary Care (DPC) Practices

Physician-extension support so your practice can always reach patients at home.

■ Concierge Medicine Physicians

After-hours home visits and urgent in-field assessments that match your standard of care.

■ Private Hospital Systems

Reduce ED overcrowding and preventable readmissions via coordinated MIH programs.
