

1. Security

- a. Any personal data you provide to us is securely stored in a database held by The Auction House to which only The Auction House employees have access.
- b. The Auction House has in place administrative measures to ensure that the access which The Auction House employees have to personal data on our server is limited to the extent necessary, in order to perform their functions.
- c. The server holding your personal data is protected against both unauthorized physical and electronic access. These measures include an electronic firewall and various other protection measures that involve virus scanning, installation of security patches, vulnerability testing, backup and recovery planning, employee training, security audits and other steps designed to constantly improve the data protection posture.
