

## AP Mode

1. In 'Select Device Type', select the device you want to pair.
2. Tap on AP Mode in the top right-hand corner of your App.
  - **Make sure your device is blinking slowly. (refer to 'Making your bulb blink slowly for AP Mode')**
3. Select your Wi-Fi 2.4Ghz network and enter your password to connect later and tap confirm.
4. Tap "Connect Now" to go to Wi-Fi in your phone settings. Choose the network named Smartlife-XXX and then return to your Genio App.
5. The Genio App has reconfigured and then once connected, the message "Add Successfully" will appear.
6. You are now ready to control your Mirabella Genio device.
