HH HENDEL & HENDEL

VERLIN HOUSE

Inspired by heritage, designed for modern living, built to endure.

Since 1971, we've redefined what cabinet hardware can be, by combining British craftsmanship with bold, considered design. Every curve, texture, and finish is crafted to transform interiors and elevate everyday interactions.

HENDEL & HENDEL

Inspired by heritage,
designed for modern living,
built to endure.

Foreword

The Hendel & Hendel story is one that has always been built on people; our family, our team, our makers, and the communities who choose our products for their homes and projects.

What began in 1971 as my grandfather's small fittings business has grown into something none of us could have fully imagined at the time. Yet the values that shaped those early days; craft, curiosity, and a belief in doing things properly still guide every decision we make.

This product guide represents far more than a collection of handles. It reflects the evolution of our craft, the ideas developed in our Lincolnshire studio, and the energy of our new London Experience Studio. It is a reminder that thoughtful design matters, and that the smallest details can transform how people experience their spaces.

Thank you for being part of our story.
We're proud to share this next chapter with you.

Terence Haughton
Creative Director

A journey shaped by craft, heritage and thoughtful design

Hendel & Hendel was born from a simple belief: the details you touch every day should go beyond the ordinary.

Our story began humbly in 1971, when what started as a family effort grew into a trusted name built on integrity, hard work and a deep respect for craft.

Over three generations, that foundation has only strengthened. Each chapter added new skills, joinery, engineering, manufacturing and together they shaped the way we design today. Hendel & Hendel emerged as the natural evolution of this journey: a British brand reimagining cabinetry hardware as an intentional detail, rather than an afterthought.

The power of small details

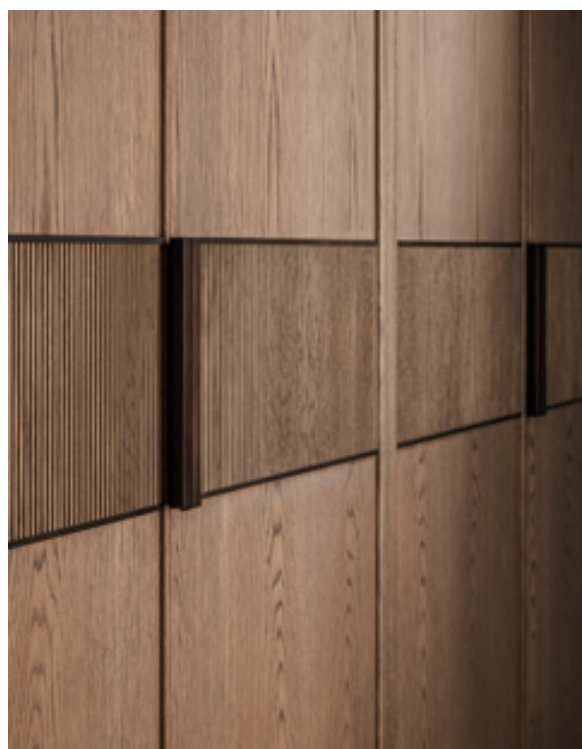

We believe the smallest details often hold the greatest influence.

A handle is the point where design meets everyday life, the part you reach for without thinking, but notice the moment it feels right. Every collection begins with an idea: a sketch, a texture, an unexpected reference.

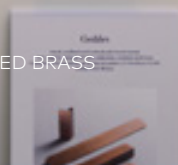

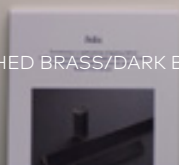

From there, the form is shaped through exploration and refinement, ensuring each piece strikes the perfect balance between proportion, weight and tactility. This is our rebellion against the ordinary: creating designs that feel familiar but distinctive, modern but classic.

BROKK, DARK BRUSHED BRASS

AUSTIN, BRONZE

HH HENDEL & HENDEL

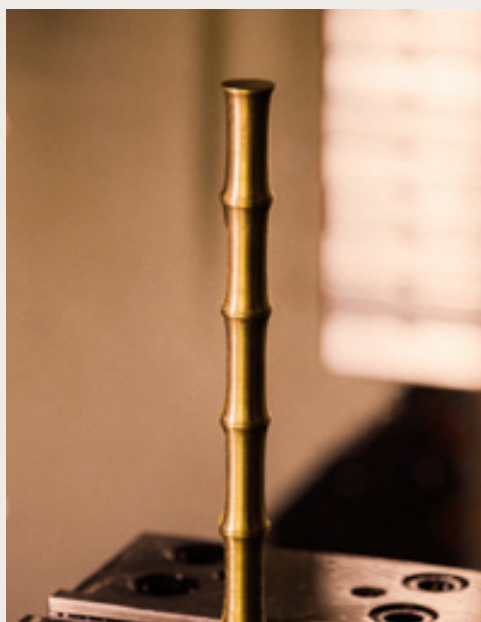

Made with intention

Craft is not a single step in our process; it's the foundation that guides every decision. Each piece must earn its place, moving through a precise journey led by our designers, engineers and craftspeople. Materials are chosen with purpose, forms are engineered for longevity, and finishes are refined until they meet the highest standards we hold ourselves to.

Only when every element aligns; function, feel and finish, does it become part of the Hendel & Hendel collection.

Our design & manufacturing journey

CONCEPTUALISE & INSPIRE

Our inspiration comes from architecture, material culture, or an unexpected detail observed in everyday life. These early ideas are explored through sketches, references and conversation.

PROTOTYPE & DEFINE

Early prototypes allow us to refine proportion, ergonomics and balance, ensuring the design feels considered in both appearance and tangibility.

TOOLING DEVELOPMENT

Bespoke tooling is developed to translate the design into a form that can be produced with meticulousness and consistency.

SAMPLE TESTING

Pre-production samples are tested and refined, assessing weight, tactility and finish in real-world settings.

MANUFACTURING & FINISHING

Each piece is manufactured using carefully selected materials and finished with precision to enhance both durability and character.

QUALITY ASSURANCE & TESTING

Every product is thoroughly inspected to ensure it meets our uncompromising standards before becoming part of the Hendel & Hendel collection.

The people behind the craft

Hendel & Hendel is shaped by the people who make it what it is. Across every team, whether in design, making, development, or supporting our customers, our people bring experience, curiosity, and care to everything they do.

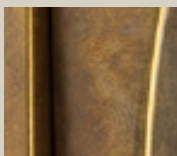

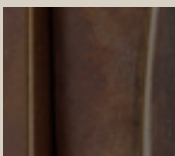

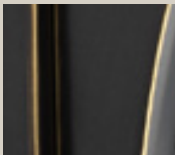

It is their knowledge, collaboration, and shared pride in the work that allow our ideas to flourish, our collections to evolve, and our brand to connect with designers and homeowners around the world.

Our collections are thoughtfully grouped into distinctive design families, each offering a different expression of form, texture and character.

From considered interpretations of classic design to bold, modern silhouettes, each category reflects a considered approach to how hardware shapes a space.

“Our collections are built on curiosity,
care and generations of knowledge”

SPATIAL MINIMALISM, REFINED BY PROPORTION

The image features two elegant, cylindrical brass objects, likely pens or styluses, positioned diagonally across the frame. Each object is supported by a small, rectangular, tapered brass block. The background is a dark, solid color, which makes the metallic objects stand out. The lighting is soft, highlighting the smooth texture and reflective surface of the brass.

Contemporary

Clean lines and sculpted silhouettes designed for modern interiors.

Conic

Conic is defined by controlled curvature and a recessed face, where precise detailing and smooth contours create a clean, contemporary profile.
