

**HIGH IMPACT RESISTANT
DURABLE MIRROR PANELS**

**The ultimate in Mirror Panel
Technology has arrived**

Mirra Panels are ideal for demanding Residential and Commercial spaces where high impact and scratch resistance are required. These are delivered as balanced mirror panels that provide ease of on-site cutting and installation.

MirraPanels offer clear sharp reflections, whilst providing greater level of safety than glass mirrors which can be subject to breakage.

SAFETY, DURABILITY AND CLEAR REFLECTION:

- ✓ 20 times the Impact Resistance of standard glass mirrors in application
- ✓ High 4H Scratch Resistance
- ✓ Specialty surface that emit no VOCs
- ✓ No requirement for Glazier Trades. Can be cut and routed using regular tools*
- ✓ Greater design flexibility with pre-finished Mirror panels to suit Project needs
- ✓ Suitable for demanding and wet area Interior and Exterior applications
- ✓ Lightweight dimensionally stable composite substrate

* Sawblades and drill bits suitable for cutting acrylic panels must be used.

PRODUCT AVAILABILITY

MirraPanel is locally stocked in the following standard panel size:
10 mm thick: 2440 mm x 1220 mm

MADE TO ORDER :

Other panel dimensions and thicknesses are available upon request
