

2022 ExtraOrdinary Technology Conference

Albuquerque, NM --\$-- Aug 10 - 14

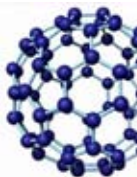

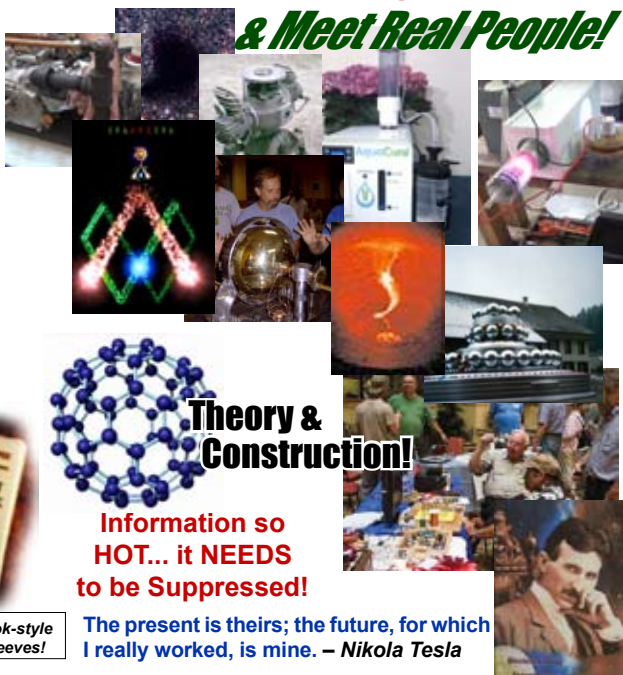

MEET THE SPEAKERS!

Jeremy Rys
 Sue Whittaker
 Karen Rice King
 Joe Blanton
 Mark Sokol
 Steven Ward Sr
 Russell Anderson
 Phil Wilson
 Robert Haralick
 George Wiseman
 Thomas Bailey
 David Pantone
 Sky Huddleston
 Marco Rodin
 Lucian Ionescu PhD
 Dr. Thorsten Ludwig
 Dale Pond
 Gary Peterson
 Mike Gamble
 Michael Leas
 Moray King
 Danny Dubrall
 Robert States
 Suzanne O. Price

ExtraOrdinary Topics Featured...
 Tesla Technology • Magnetic Motors • Zero-Point Energy
 Energy Savers • Cosmic/Radiant Energy • Brown's Gas
 Low Temperature Plasma • GEET • ElectroGravitation
 ElectroMedicine • Magnetic Healing

*Get UPCLOSE... & Personal
 with Working Hardware!
 & Meet Real People!*

Theory & Construction!

Information so HOT... it NEEDS to be Suppressed!

The present is theirs; the future, for which I really worked, is mine. – Nikola Tesla

2022 ExtraOrdinary Technology Conference

Crowne Plaza • Albuquerque, NM • August 10 - 14, 2022

TeslaTech, LLC reserves the right to make changes to this schedule without notice.

Wednesday • Aug 10

Session 1 (Evening) • An ExtraOrdinary Revelation

5:00PM: **Jeremy Rys** - UNCLASSIFIED... By Popular Demand!

8:00PM: **Conference Evening Social**

Thursday • Aug 11

Session 2 (Morning) • ExtraOrdinary Health Concepts

8:00AM: **Sue Whittaker** - *Application of Resonance on Bio-energy Fields*

9:30AM: **Karen Rice King** - *Dowsing Subtle Earth Energies*

11:00AM: **Joe Blanton** - *Better Living through Red Lasers!*

Session 3 (Afternoon) • ExtraOrdinary AntiGravity Technology

1:00PM: **Mark Sokol** - *Validating Alternative Propulsion Systems*

2:30PM: **Steven Ward Sr** - *Ward Force Antigravity*

4:00PM: **Russell Anderson** - *Antigravity Devices... The German Past thru Tomorrow*

Session 4 (Evening)

7:00PM: **Phil Wilson** - *ExtraOrdinary Far Infrared Technology!!!*

8:30PM: **Conference Evening Social**

Friday • Aug 12

Session 5 (Morning) • ExtraOrdinary Water Technology

8:00AM: **Robert Haralick** - *Subtle Energy Experiments With Water and Crystals...*

9:30AM: **George Wiseman** - *Brown's Gas For A Healthy Future*

11:00AM: **Thomas Bailey** - *The Carbon Revolution!*

Session 6 (Afternoon) • ExtraOrdinary Energy Technology

1:00PM: **Vendors - Vendor Showcase**

2:30PM: **David Pantone** - *GEET Evolution*

4:00PM: **Sky Huddleston** - *The Revolutionary Bourke Engine!*

Session 7 (Evening)

7:00PM: **Marco Rodin** - *VBM: Vortex Based Mathematics*

8:30PM: **Conference Evening Social**

Saturday • Aug 13

Session 8 (Morning) • ExtraOrdinary Concepts

8:00AM: **Lucian Ionescu PhD** - *On Gravity and Cold Fusion*

9:30AM: **Dr. Thorsten Ludwig** - *ZPE... the Source of Free Energy and Magnetism*

11:00AM: **Dale Pond** - *Dynaspheres... ExtraOrdinary Clean Energy Solution*

Session 9 (Afternoon) • True Tesla Technology

1:00PM: **Gary Peterson** - *Use of Tesla Coils for Wireless Transmission of Electricity*

2:30PM: **Mike Gamble** - *Tesla's Electric Car Power Supply... 2022*

4:00PM: **Michael Leas** - *Nikola Tesla's "Electric Universe"*

Session 10 (Evening)

7:00PM: **Moray King** - *How to Create a Zero-Point Energy Invention*

8:30PM: **Conference Evening Social**

Sunday • Aug 14

Session 11 (Morning) • ExtraOrdinary Physics Concepts

8:00AM: **Danny Durrall** - *The Large and the Small, Macrocsm & Microcosm*

9:30AM: **Robert States** - *Gravity Drives and Time Travel*

11:00AM: **Suzanne O. Price** - *Visionary Engineering the Tesla Way*

Pre Conference Workshop
Wednesday Afternoon
Aug 10-- 1PM
Free Energy Technology
William Alek BSEE

DVDs Will Be Available After Conference!

Wednesday Workshop • August 10 • Free Energy/OverUnity Wkshp

efficiency of the same transformer to approach, but never exceed 100%. These losses show up as wasted heat energy.

Another type of transformer called a Split-Flux Inductor (SFI) / Transformer (SFT), embodied in US Patent 9620280B2 has efficiencies far exceeding 100% due to its unique construction. Driven by AC Power applied to the single primary winding, the flux produced is split equally into two identical cores. Two secondary windings, set up an opposing flux action in a third core. This action forces the input phase difference between the voltage and current to increase as a function of frequency.

This phase difference can easily reach 90° causing the efficiency of the SFI / SFT to reach infinity. Increasing the frequency further causes the phase difference to go beyond 90° which in turn, causes the efficiency calculation to flip into the negative region.

As part of the live workshop demonstration, all this is captured using a Tektronix TPS 2024B Isolated 4-Channel Oscilloscope in conjunction with customized software specifically developed to read the oscilloscope information, calculate and display the efficiency of the SFI / SFT device on a standard notebook pc.

Demonstrations of Real FREE Energy/OverUnity Electrical Technology

William Alek BSEE

All conventional transformers utilize a principle of transferring electrical energy called Faraday's Law of Induction (1831), which permits a near equal amount of REAL AC Power to be transferred from the input coil to the output coil. This "near equal amount" is the result of imperfections or losses in the transformer causing the operating

Conference Lodging Facilities

Limited space...
Please register by June 30!

Crowne Plaza Albuquerque

1901 University Boulevard NE
Albuquerque, NM 87102

Be sure to request our special
**2022 TeslaTech
ExtraOrdinary Technology
Conference rates!**

\$82⁰⁰ per night!!*

* \$86 for 2 people

Hotel Reservations:
(505) 884-2500

Use Code: TES

Special rate expires July 15!!!

Conference Evening Social

Meet the Speakers
... and New Friends!

Wed/Thu/Fri/Sat
~8:30PM

Every night provides an opportunity to meet the speakers and other attendees in a relaxed social setting. Its a great opportunity to make new friends that share your interests. We even provide some refreshments!

Hotel Amenities

Special hotel amenities for conference attendees include:

- Free Breakfast
- Free high speed internet
- Clean, fresh, modern rooms
- Complimentary Self-Parking
- On-Site Fitness Center
- Free local calls
- Variety of restaurants

TeslaTech YouTube Channel

30 Years of Innovative Ideas in Energy and Health

TeslaTech Channel features 600+ presentations with Q&A, spanning over three decades, from major conferences including:

-  • ExtraOrdinary Technology Conference (2004-2021)
-  • Exotic Research Conference (1998-2001)
-  • Global Science Congress (1987-2002)

WHAT THE RED-INFRARED LASER DOES FOR YOU

- DE-STRESS Your body by Penetrating directly into Your Cells, Tissues, Blood, Nerves, Rods & Cones of the Eyes, the Brain and into the Bones
- Enhancing the Function of Your Mitochondria (ATP) (*about half your body weight is Mitochondria!*)
- Adds about 30% Life Force Energy into Your blood
- Up-Regulate Gene Expression for Healthier Proteins, (*proteins are responsible for Structure & Function*)
- Enhanced Cell to Cell Communication
- Enhanced Micro-Circulation & Oxygenation
- Modulate-Lowering Inflammation
- Cells Re-Generate Faster (*stop bleeding 1/3 time/no swelling*)

TheRedLaserGuy.com

Wednesday Aug 10 -5PM

UNCLASSIFIED By Popular Demand!

**Evidence of new propulsion
methodologies at work!!!**

Jeremy Rys

In 1998 Former Area 51 Employee Edgar Fouche revealed the existence of advanced technology programs that were developing among other things: Metamaterials, Quasicrystals, and a Rotating Mercury Plasma-based AntiGravity drive which was allegedly developed back in the 1970s. The technology was so advanced that many assumed they must be reverse-engineered from aliens as other former Military Officers like Philip Corso have alleged.

After spending the last 2 decades studying physics and diving deep through the academic literature on these subjects, Jeremy Rys has carved out the murky path from theory, to experiment, to discovery within these Top Secret Programs which have remained hidden from public discussion thus far even though these technologies could explain Unidentified Aerial Phenomena (UAP) and launch us into a new age of space travel and transport.

Thursday Aug 11 -7PM

ExtraOrdinary Far Infrared Technology!

The Secret is in the chip!

Phil Wilson

Saunas have been used for centuries by all cultures for spiritual and body purification, for healing, and for achieving optimum health. Research on *far infrared light energy saunas* began about 60 years ago in Japan. In 1987, the Relax Sauna Company was commissioned to create a healing spa-like energy similar to the healing waters of southern Japan, out of electricity. It took 10 years for the company, using semi-conductor chips, to find a way to filter out the near and mid infrared energies to generate a pure far infrared energy between 4-14 microns. Only this energy resonates with our water molecules and organic cells. This major achievement to this day has not been duplicated.

The Relax far infrared sauna increases core temperature, employs principles of hyperthermia, and has a profound impact on the parasympathetic nervous system, giving a euphoric feeling as well as feelings of great joy... not to mention pain relief!

Friday Aug 12-7PM

Vortex Based Mathematics

**Want to find the answers
to the unknown???**

Marko Rodin

Vortex Based Mathematics is a new and different type of mathematics. As Russell P. Blake, former director for Microsoft's Advanced Future Operating Systems said, *this has never existed before in academia and has been overlooked by all conventional science.* Blake has been very clear in stating he believes it will transform all technology and science. It is well-known that a civilization cannot evolve further than their level of mathematics. The name is Vortex Based Mathematics because it is based upon whether the underpinning nested vortices are staggered or aligned, which determines the function of the molecule and creates the ultimate quantum computer that obsoletes all existing quantum computers. Marko Rodin will be sharing the most recently made advances in VBM concepts highlighted in his new book coauthored with Karen Elkins... the extraordinary result of 4 years of intense collaboration!

Saturday Aug 13 - 7PM

How to Create a Zero Point Energy Invention

Follow the plasma!

Moray King

There are basic principles for creating excess energy that can be used to create a net energy producing device whose power is sourced from the zero-point energy. Foremost is ion motion in a plasma. Ion-acoustic oscillations in plasma produce energetic anomalies like run-away electrons, high voltage spikes and excess heat. Abrupt ion surge can induce vortex ring (plasmoid) formation which traps excess energy. Over the years inventors utilized plasma ion action in their energy devices. Ion oscillations were used in Moray's plasma tubes and Brown's resonant nuclear battery. Pulse plasma action occurred in Correa's pulsed abnormal glow discharge tube, Farnsworth's shaped-electrode discharge tube, and Gray's pulsing "cold electricity" tube. Vortex phenomena was utilized in Rockwell's vortex implosion engine, Polifka's Windhex pulverizer, and Pantone's GEET manifold. Harvesting plasmoid acceleration was used in Papp's noble gas engine and by Walt Jenkins.

Application of Resonance on BioEnergy Fields

Sue Whittaker

The interest in programmable, vibrational medicine (PVM) is growing with an increasing number of versions hitting the market and making great claims. Some of these are better than others, so there are things you need to know to help you get the benefits you want. PVMs come from a breakthrough in science and medicine achieved through the application of three principles to a concept foreseen by Nikola Tesla: non-chemical

medicines. PVMs stem from the observably real power of intentions (e.g. speaking kindly to plants helps them grow), morphogenesis (universal principles that guide the dynamics of growth in living organisms) and particle entanglement of quantum physics that allows “these particles” to act like “those particles”).

Now, an enhancement for the use and effectiveness of PVMs is possible through the bioresonant frequencies of the Qest4 technology. This makes it possible to apply the specific bio-energy patterns of complex resonant signatures discovered and used in Russia for over 40 years. We are also seeing adaptations for using PVMs coming from the fields of radionics and even intercessory prayer. Many well known and ancient principles and practices can be combined in this new way.

DOWSING...

One Method for the Detection of Ley Lines & Subtle Earth Energies

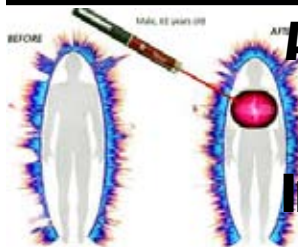

Karen Rice King

Earth energies can be bad, good or neutral. The term ‘geopathic stress’ is used to describe negative energies, also known as ‘harmful earth rays’, which emanate from the earth and cause discomfort and ill health to those living above. Ley lines on the other hand are conceived by some researchers as positive ‘lines of power’ girdling the earth connecting ancient megaliths with some form of spiritual force or energy accessible to our ancient ancestors but now lost to narrow-minded twentieth-century scientific thought.

Dowsing is a means to detect energy emanating from objects. Dowsers use various tools (rods, sticks, pendulums, etc) to amplify the energy making it easier to detect various targets. In her practice, Karen uses dowsing to locate and mark all of the negative polarity lines on a property. Once the energy is detected, it can be neutralized through a process she has designated as *Earth Energy Acupuncture*.

Using tools developed by Slim Spurling and others, she helps neutralize energies from WIFI, radio waves, electricity, unground water, fault lines and personal stresses. She installs copper-clad L-rods with Egyptian sacred measurements all around, leaving the Ley lines and the positive lines. Removing Geopathic stress from a property enables the residents to live a healthier life.

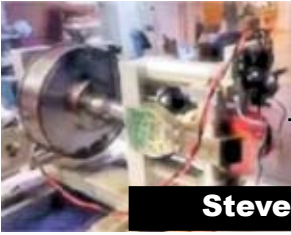

All Energy Is Frequency Vibrating Information!

Joe Blanton

Future medicine will be the medicine of frequencies. *All energy is frequency vibrating information* that is either *coherent* (helpful) or *incoherent* (harmful) to our body. All discomfort and disease come from a lowering of the frequency from optimal wellness and the information becomes incoherent or harmful to our body. ALL healing comes from raising the frequency back up to optimal wellness, *no exceptions!* Learn

how to use the power of our red infrared laser to help your body heal itself naturally.

Presentations include the GDV camera test Dr Beverly Kune did on tap water, showing the red infrared laser pen increases the life force energy in water about 30% in 30 seconds, neutralized the toxins and made the water wetter! The significance here is our blood is 94% water, our brain is 78% water, our eyes are 98% water. I will also present the Live Blood Analysis showing how the frequencies we’ve added, not just to the red infrared laser pen, but all of our products, transmute the harmful to helpful elements in our blood, raising the vibration, separating the red blood cells in free flowing blood (not sticky blood), which gives the body better microcirculation and better detoxing and oxygenation when going thru the lungs and much more.....

Ward Force Antigravity

**Patented Device
Unlocks Gravity!**

Steven Ward Sr

An energy producing magnetic converter patented and published by the US Patent office in 2009, is only one very small benefit from the discovery of **Wardforce**. The first sentence in the abstract of USPTO 7531930 states:

An energy producing magnetic converter is provided that outputs both electrical and mechanical energy.

Nowhere in the world will they patent perpetual motion applications. I had to prove that **Wardforce** existed, before the USPTO would accept my application for US Patent 7531930.

Wardforce can be defined as the force part of the magnetic field that controls forward and backward motion, attraction and repelling. Pinch you finger, a current goes up your arm... in simple terms a current is defined as the Magnetic Field in motion. This which controls that motion is **Wardforce**. I can demonstrate energy from magnets using junk.

Incredibly, space travel can be demonstrated on a bench right in front of you. When demonstrating, space travel, gravity and anti-gravity are defined by duplication. It also proves that gravity can be made. Think of what this knowledge can do for the space program. Keep in mind that I am using junk for these ongoing experiments and demonstrations. Image what could be done with the proper resources and personnel!

Validating Alternative Propulsion Systems

Mark Sokol

Various methods of achieving the near magical effects exhibited by flying saucers have been proposed over the years. Many of these come from highly accredited academic sources such as Fredrick Alzofon 1981 paper "Antigravity with Present Technology" while others are a bit more speculative and fringe. Falcon Space and affiliates concentrate on lab ready theories that have not yet been fully investigated by other researchers that can possibly explain how UAP operate.

Antigravity Devices...

**The German Past
thru Tomorrow**

Russell Anderson

Prior to WWII, Germany apparently made great strides in successful force field-based antigravity propulsion, tachyon field (G-field) converters, and alternative energy. German societies such as the Thule and Vrill societies received funding from clandestine sources and the German Government to build flying disc prototypes that produced levitation, and heavy-lift antigravity. Successful researchers and inventors such as Schriever, Habermohl, Bellonzo, Mieth, Fleissner and Schauburger produced working free energy devices and flying discs. A great deal of documentation on these devices has been available since the early 1990s.

Human origin of UFOs /UAPs was overlooked, and the ET origin was attributed to ALL UAPs, effectively covering up the free-energy power sources at the heart of the onboard power-plants of these devices. But European research/development by secretive inventors and societies appear to be the source of most UAP sightings in postwar Europe and other places.

Their relationship to current electrogravitic devices such as from Brown, Carr, Searl and others, as well as links and similarities to other successful electrogravitic devices will be shown and demonstrated with working equipment, LIVE, with updates on the ongoing R&D into electrogravitics we have been developing over the last few years!

Recent government disclosure has expanded the variety of devices and their operating characteristics. Some of the more prominent theories currently being investigated include...

- Dynamic Nuclear Orientation (Alzofon)
- Frolovs Hat
- Banduric complex HV fields.
- TT Brown Gravitator.
- Mercury Vortex Engine.
- Complex Gyroscopic motion device.
- Podklenov Gravity Impulse
- Poher Gravity Impulse
- Laser beam deflection
- Electrets
- Boyd Bushman magnetic Beamer

And more !

A short update will be given on each experiment as well as the challenges and future variations we have planned.... *ad astra!*

Subtle Energy Experiments With Water and Crystals

Robert M Haralick

We have a laboratory instrumented with scientific measuring instruments to objectively measure changes in different kinds of water and crystals as a function of their exposure to things like 2 or 3 dimensional shapes, designs in 2D, strings of numbers, short phrases in English, magnetic fields, longitudinal EM fields, laser lights, magnetic vector potential fields, and different kinds of music. Some of these experiments may depend on the conscious state of the experimenter as it is hypothesized that

the conscious intention of the experimenter can imprint water and crystals. Every experiment will have a written protocol and be repeated multiple times with a control. Environmental variables such as temperature, pressure, humidity, time of day, and phase of the moon be noted.

Laboratory instruments accurately measure pH, ORP, conductivity, dissolved oxygen, liquid temperature, spectral transmission, refractive index (598nm), dielectric impedance (up to 6 GHz), impedance analysis (up to 13MHz) density, specific heat, surface tension, and rotational viscosity.

The talk will discuss some of the properties of water, including structured water, coherent domains, including hypothesized quantum interactions. Detailed experimental protocols will be provided so that other people can replicate the experiments on their own... or perhaps at the lab!

Brown's Gas Applications

The Next Generation

George Wiseman

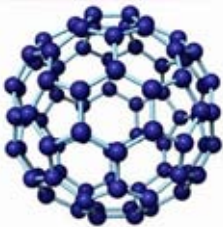

Working with Brown's Gas since 1986, George Wiseman developed practical technology that optimized a number of various Brown's Gas applications (fuel saving, torch fuel-gas, radioactive neutralization, etc). In 1996 a 'WaterTorch' customer claimed he had cured a melanoma using Brown's Gas. Wiseman shared this information with other customers and many of them tried it on their various ailments, and they reported as-

tonishing results back. They convinced George to build Brown's Gas machines that were optimized for health applications.

Brown's Gas is a MIXTURE of several variations of hydrogen and oxygen, including a negatively charged cold plasma form of water he named Electrically Expanded Water (ExW). ExW works synergistically with hydrogen to make hydrogen more therapeutic.

Hydrogen is literally our most important nutrient; comprising 62% (by volume) of the average human body. But hydrogen is a FOOD and is inert by itself. Hydrogen cannot do anything without energy. Most sick people have compromised energy generation systems and have used up their energy reserves. ExW provides bio-available energy that helps the body use hydrogen for healing and health.

The Carbon Revolution!

Tesla Advocated the Need to Unleash Carbon's Potential Through Advanced Chemistry!

Tom Bailey

Carbon runs today's world: petroleum, coal, natural gas, plastics, photosynthesis. However, pure carbon holds value beyond energy considerations as distinct allotropes with unique properties: diamond and graphite with different structures derived from different bonding natures. The fullerene allotrope was discovered in 1985 in a volatile molecular spherical form of 60 carbon atoms. Its popularity grew in its resemblance to a soccer ball. It's known as the buckyball, C60 fullerene, a nano-scale soccer ball, named after the iconic architect of geodesic dome fame, Buckminster Fuller.

In 1980, an enclosed pressure detonation of graphite led to the production of small nano-onions following thermal conversion of initially isolated less thermodynamically stable nano-diamonds. These small individual concentric-shelled onion fullerenes of 6-8 layers were expanded to 20-30 layers by a new process that also fuses the onions into chains. These chained onions disintegrate and reintegrate to form a new allotrope of carbon we call crossene of extraordinary thermodynamic stability. Though nondiamond allotropes of graphite (graphene), fullerene and crossene involve trigonally substituted carbons, each bears its own bonding system. New bonding concepts for the nanocarbon allotropes are introduced.

These new allotropes fed to mice compare to ormus materials through unparalleled biological antioxidant and anti-inflammatory activity *increasing mice lifespans 3-5 fold.*

ExtraOrdinary GEET Fuel Processor

... a new type of carburetor with a miniature refinery built in!

David Pantone

Plasma, the fourth state of matter, is a field whose boundaries are being expanded by studies made possible by the GEET engine technology invented by Paul Pantone. GEET is based on a self-generated low temperature plasma field. Using GEET devices, Paul discovered 181 new phenomena. At least eight "Unidentified Fields of Energy" around GEET have been observed. The lack of a common terminology and methodology makes it difficult to validate and replicate new discoveries. Here are some fundamental observations...

To locate where the Reactor Rod is positioned while running, use a hand held digital thermometer. When the thermometer reads it is the hottest, this indicates the center of the Reactor Rod. This is a false reading. Though the thermometer indicates a hot spot, it is not the hottest spot. Something "inside" the reaction chamber is causing the false reading that allows us to determine that the Rod is at that exact location.

Another strange observation is the Auric Field. Once a Reactor Rod is used for 30-minutes, it holds a signature indicating if the fuel was matched to the Reactor Rod for maximum efficiency. A test to validate the correct length, is by using a compass. When the Rod is "broke in" the compass will show it has a North and South!

Revolutionary Bourke Engine

... clean efficient power in a compact, lightweight package from the 1920s!

Sky Huddleston

Today, the Russell Bourke engine is still one of the most intriguing powerplants of all time. Unlike conventional engines, this revolutionary engine is designed to handle high speed, violent hydrogen-oxygen reactions. The engine speeds he achieved rivaled those of a turbine, requiring him to invent the triple-slip ring bearing... which also saved the aerospace industry! The revolutionary single-stroke hydrogen cycle concept provides clean efficient power in a compact, lightweight package. Only 14 of the 30-cubic inch twins were produced before Bourke's death.

Russell Bourke was way ahead of his time! He wanted to prevent and reverse the devastating results and problems that conventional engine technology was and still is causing to our environment and our bodies today! He knew what has happened today was going to happen decades ago and unfortunately, it has happened!

What is this Bourke Cycle? It is a unique cycle that is not dieseling contrary to what some people have led themselves to believe and it has nothing to do with the Otto cycle that normal internal combustion engines run. It is something entirely different. After the piston reaches top dead center, the fuel is no longer burning and has instead built up a flame free high pressure charge ready to send the piston on it's down stroke! It is what separates the Bourke Engine from every other engine technology that has ever been invented.

Vendor Showcase

Not all of the new and exciting technologies make it on stage. Often, some of the best technologies are in the expo area. As a feature, we allow the vendors an opportunity to give a 5-10 minute presentation on the products that they brought to the conference. This activity is restricted to the vendors who are not speaking at the conference.

From Elementary Particles to Gravity Control

Technology vs. Human Mind

Lucian M Ionescu PhD

Ether, EM vector potential and Biofield, Chi Flow / Prana / Pneuma etc, are different facets of the same universal "Life Force" that drives all things in the Universe. Gravity emerges as a quantum effect at the level of elementary particles, essentially nucleons. Their quark structure, with six quark flavors corresponds to Platonic symmetries. The latter also accounts for the three generations of fermions. This break of rotational symmetry, from continuum to discrete, makes possible to control

Gravity via Dynamic Nuclear Orientation (DNO) by aligning the spin directions of nucleons explain the relation between the two topics above, and look at technological means to control Gravity. Specifically, Dr. Frederick Alzofon used microwaves and the electron precession resonance for DNO, with parameters obtained from USAF data obtained while chasing an UFO.

Other methods used by ancient civilizations, include sound interference by Tibetan monks or *sacred geometry*, which channels and focuses the etheric flow, to align the spin directions. One may even use meditation, to control one's chi flow to achieve coherence and alignment of nuclei for this purpose. The evidence gathered from the work of Tesla, Grebenikov, Hutchison, Alzofon, Searl and the Chekurkov graviflyer, will be analyzed in light of *Alzofon-Ionescu Theory of Gravity*.

Zero Point Energy The Source of Free Energy and Magnetism

Dr Thorsten Ludwig

Zero point energy is the sea of energy that we live in. Dr Ludwig, a scientist from Germany, has studied zero point energy (ZPE) in experiments and free energy devices for ~30 years. This quantum energy fills everything from empty space to matter. All particles, waves, systems and even space itself are pervaded with this energy. These quantum fluctuations hold matter together, give rise to the magnetic moment of elementary particles and to magnetism in general. The zero point energy could be the power source of the future.

Several theoretical/experimental approaches to harnessing zero point energy will be highlighted.

The Hans Coler Current generator that produced 6 kw back in the 1940's was reproduced and replicated several times... it is a working technology. Coler found a way to build resonant circuits that tap zero point energy. The current generator consists of two stacks of large copper plates with flat coils in between. There is also an exciter circuit of soft iron cores with several layers of coils around it. Since power may be generated by electrons passing through a premagnetized ferromagnetic material, the link will be made to vacuum fluctuations and ZPE as a possible energy source. New physics shows that the quantum energy of space (ZPE) is the power that leads to and sustains magnets. Be prepared for a wild ride into real science theory, experiments and actual device efficiency measurement.

Dynaspheres: ExtraOrdinary Clean Energy Solution

Dale Pond

Dynaspheres, sometimes called Musical Dynaspheres, Globe Motors or Sphere Motors, were originally built ~1870s by John W. Keely. They were made as a power source to drive industry and to demonstrate the principles by which they operated. Then, a global effort of hundreds of inventors attempted to develop a power system sufficient to power the world's industries. Keely was among them. Eventually Tesla's AC power won out with powerful backing by George Westinghouse.

Over the years the Dynasphere Project has evolved to demonstrations of certain principles and forces of nature, humanity and machines. For years those gathered around a dynasphere have sensed feelings and energies not normally associated with mechanical machines. One can wonder...

- What is this energy?
- What are these feelings people experience?
- Is this a tangible force that can be harnessed for the betterment of humanity?
- Can the nature of this force be explored, quantified and purposefully engineered?
- Can this unknown force be transformed into an ordinary kinetic force capable of actuating machinery perhaps for making practical electricity?
- Are there other forms to derive health benefits?

That this force is real has been demonstrated countless times. It has been shown it can be incorporated into mechanical devices, repeatedly.

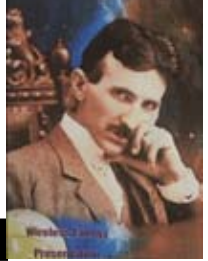

Nikola Tesla's Electric Car Power Supply --- 2022 --- Michael Gamble

There are numerous stories about Nikola Tesla's fabled electric powered Pierce-Arrow car. If the stories are factual, then sound engineering should be able to reproduce it. In the past, it was demonstrated that a working demo model could be reverse engineered from those stories. The "Series Resonate" and "Dual Resonate" system demo models I demonstrated at TeslaTech 2018 and 2019 both showed a large increased resonate efficiency (30% to 90%). However, the "Resonant Transformer" system demo model has more promise as the entire system resonates instead of only the load. My design goal for this year is to place an active closed loop control system around the entire resonant load to further increase the "Q-factor".

I know of two ways to increase the "Q" factor of a resonate system. The first is to increase the reactive component by adding a large (10x) inductor in series with the motor impedance. I built a working "Series Resonate" demo model of this method and presented it at the 2018 conference. The second method is to decrease the real component by removing the motor impedance from the resonate circuit. The motor is now bridged between two out of phase resonate circuits. The preliminary numbers indicate this "Dual Resonate" system should increase the system "Q" factor even more. Tesla stated that his resonate systems ran near unity (99.8%) but not over it!

Nikola Tesla's Electric Universe The Man, Myth, and Mystery Michael Leas

Nikola Tesla's futuristic thinking transformed our world. His visionary thinking was unique in its time. His alternating current generators built our modern society. However, few people really understand his contributions to our world and what was lost. In this Tesla energy presentation, Michael Leas will explain his Tesla research. It will help us understand why Tesla should be rightly regarded as the "Electrical Genius" of our times. He will discuss his own research and experiments with "zero point" technology... and its relevance to our past, present and future society. Along with how "Energy" is the foundation of our body, mind, and spiritual evolution.

This unique presentation will demonstrate lost concepts of Tesla's "Electric Universe". Michael will present his "Tesla" wireless energy display, energized by his *Magnevex* motor/generator. This wireless energy presentation will demonstrate on a small scale, the type of power system Nikola Tesla envisioned and used in his large Wardencliff Tower.

In a time when our "Energy" sources are being questioned as to their ability to sustain the masses upon the world, it is time to move beyond the old reactionary ways of "burning fuels" and move into a new method of scientific reasoning where we have connected our electrical systems to the "wheel work of nature" as once stated by Nikola Tesla.

The Use of Tesla Coils for the Wireless Transmission of Electricity

Gary Peterson

From the starting point of the commercial iron core induction coil transformer this presentation tells the story of Tesla's development of the World Wireless system transmitter over the years between 1891 and 1936. His original improvement of the commercial coil driver circuit, and improvements to the transformer itself resulted in

the high-potential, high-frequency induction coil bearing his name... the Tesla Coil.

Tesla coil circuits were used commercially in spark gap radio transmitters for wireless telegraphy until the 1920s. Tesla experimented with numerous configurations using two, sometimes three, coupled resonant electric circuits. These circuits were used for innovative experiments in electrical lighting, phosphorescence, X-ray generation, electrotherapy, and ultimately the transmission of electrical energy without wires.

Demonstrations include operation of Ford "buzz box" automobile ignition spark coil, single wire operation of light/motive devices connected to a high frequency induction coil, and wireless transmission by electrostatic induction using an ungrounded dual terminal Tesla coil transmitter. The latter foretells development of the "disturbed charge of ground and air" wireless method.

Relax Far Infrared Saunas

700 + Testimonials 
relaxsaunas.com/YouTube

More Energizing and Relaxing than any other Infrared Sauna

Relax Sauna can Increase Body Temperature 3° in 25 Minutes, Significantly More than Any Other Sauna

"Find me a way to create sweat or fever and I will cure disease." ~ Hippocrates

Increasing Core Temperature

- Mobilizes Lymphatic and Immune Systems
- Increases Circulation and Microcirculation
- Activates Parasympathetic Nervous System
- Oxygenates Cells, Giving Greater Absorption
- Helps Mitochondria Create ATP + Nitric Oxide

Thursday Evening - 7:00 P.M. Extraordinary Tech Conf - Albuquerque - 2022

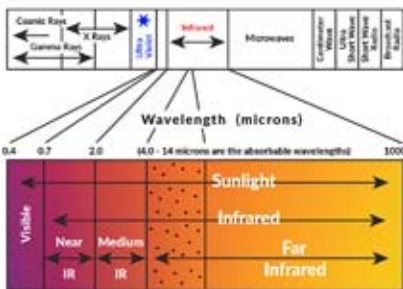

Talk: Extraordinary Far Infrared Technology

President of Relax Saunas of Momentum and Author of the upcoming book: "Pictures of the Mind - Freeing Yourself from Beliefs that No Longer Serve You"

After receiving an honors degree in mathematics in 1970 and spending four years in graduate school, Phil had many out of body experiences. This propelled him into getting involved in fasting and holistic health.

Phillip A. Wilson

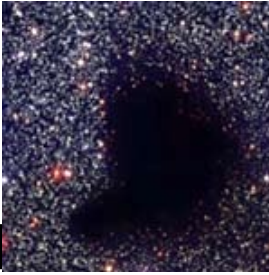

**Get the Best
Detox with more
Loving Light
Than Any Sauna**

It took 10 years for the Relax Sauna company to discover how to filter out the near and mid infrared giving you only pure 4-14 micron far infrared light.

Use code: **TESLA22** get **\$100** off any **Relax Sauna**

THE LARGE and the SMALL Macrocosm & Microcosm

Danny Dubrall

This presentation on concepts of Cosmology and the creation of the universe asserts our universe isn't the first one and universes have a cycle to them estimated at 300 to 500 billion years. Voids/white holes (there are many) are fountains of matter creation and drive galactic formation (black holes). The creation we experience is a duality composed of Aether (Dark Matter) and physical matter formed from compressing the Aether in white holes. Between the Aether and Matter, there is a process between them – they pour into each other because black holes leak Aether back into the system. Conduits and channels are formed for new rivers of Hydrogen matter and leaked Aether, moving in opposite directions, creating cosmic filaments, structures, and pathways.

As the thickness of space changes (I refer to the Aether), time, speed, frequencies, and energy needs change. When applied to an ultra supermassive black hole, its size would be much larger than expected – another class unto itself. This single class evolves until there is no longer any energy remaining in the core to support matter. The core then reverts to Aether, rapidly expanding outward, producing a big bang. This process may take a million years to complete. The primordial matter spreads, and a new cycle begins. This repeating cycle supports the concept of the multiverse.

GRAVITY DRIVES and TIME TRAVEL

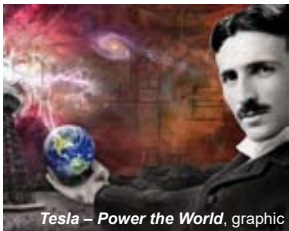

Robert States MS³

University physics classes teach Einstein's theory of special relativity and general relativity. To work, these would consume huge amounts of energy and are impractical for gravity drives or time travel. Rob will talk about gravity drives and time machines that use completely different principles and are well documented.

Three time travel devices have been fully disclosed in the public's domain: the Hamel, Markum and TR3B devices. We also know about the Philadelphia Experiment, torsion fields, and alien space ships as viewed by 'abductees'. All of these systems are related and will be presented.

Abductees are sometimes treated to a tour of an alien space ship's power system, gravity drives and ship construction. Rob will take the "cream of the crop" of these alien devices, explain how they work, and compare their mode of operation with known physics and other proven devices above.

Also, Rob will describe large scale devices for which we have credible information on how they work. They do not violate any laws of physics, and could satisfy civilization's power requirements without straining Earth's environment. They do not require exotic materials, merely engineering effort. Send these to your favorite politician as an alternative to big oil, fragile wind farms and parties at four star hotels.

Visionary Engineering ... the Tesla Way Suzanne Price

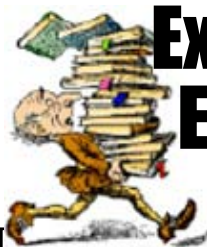

Tesla – Power the World, graphic courtesy of James Anshutz

Can anyone enhance their own innate abilities and intelligence to continue exploring the vision Nikola Tesla aspired to 100 years ago? Science suggests we all possess the potential to tap into our inner knowledge and super-consciousness. The question remains, how?

Tesla, one of the most celebrated 20th century geniuses, received brilliant insights that helped him design and construct numerous inventions that catapulted the world into the modern era. He had a natural ability to tap into the realm of 4D information. His extraordinary visions enabled

him to “see” an alternative future utilizing subtle energies and to completely imagine how inspired inventions operated before ever creating blueprints or devices.

It is possible to enhance one's ability to enter subtle information streams for creative solutions. First, it is necessary to understand the basics of how energy works in subtle and material realms including within human beings – the “wheelwork of Nature,” as Tesla called it. Many inventors are able to do that. One can also learn to access the ‘consciousness information stream’. Based on insights from the latest theories of energy and human awareness, we explore techniques to prepare one to tap into the super-conscious stream of collective intelligence to imagine new perspectives, invent or improve free energy devices, or solve perplexing engineering problems. Here, we will examine a variety of extraordinary techniques to explore one's own visionary genius.

SHAPE POWER

By Dan A. Davidson

SHAPE POWER

NEW!! -- Second Edition -- NEW!!

The fundamental discovery of how shape modifies undifferentiated universal space energy, the aether, into electricity, magnetism, and nuclear forces

— Dan Davidson —

The ability of multi-dimensional shapes to manipulate the local space energy is known as *shape power*. We are surrounded by natural and man-made shapes. From the remarkable geometry of the atomic and sub-atomic realm to the symmetrical beauty of flowers and seashells to the shape of planets and galaxies we find a kaleidoscope of shape which defines, in an infinite number of ways, our miracle universe. All of the natural shapes are the result of natural forces at work and, as such, are tuned into these natural forces because they are a part of these forces.

There are fields of study which are relatively unknown to the general public. Some of the key early researchers into Shape Power and the more specific Pyramid Power include Pavlita, Belizal, Turenne, Drbal and Flanagan.

Practical Aether Engineering is accomplished in nature by the use of various geometric forms and patterns as witnessed in the fibonacci series, fractals, tiles, cones and tetrahedral shapes. Entomologist Phil Callahan has shown how insects and some plants use geometric shapes to collect and transmit electromagnetic and acoustic waves.

When one understands that Aether, being the basic substrate of the universe, can be manipulated to any degree as to produce all manner of energy and matter aggregations, it follows that everything is a result of Aether Engineering to various degrees. Basic shape control functions are proven using very sensitive electronic instruments and clairvoyants who acted as visual instruments to prove aspects of SHAPE POWER.

Particle Mechanics Theory of Energy States

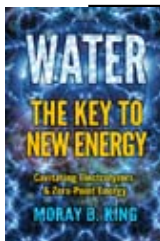

— Dannell Roberts —

This book may contain the unifying theory of physics. What is the Unifying Theory? It is an idea that will show the relationship between all energies and matter. That's exactly what this book does, starting by classifying the basic characteristics of energy and matter.

Building on these ideas, new models of the elements are introduced. We will show new ways of chemical bonding with new molecules introduced. These ideas leads to heat and cold causes. Gravity is introduced as a completely new concept. Gravity is far easier to understand than you can imagine. This theory will introduce new concepts of sound, light, electricity and magnetism. All of this is tied together to give you a picture of how the universe really works. The simplicity of this theory will amaze you. (372pp)

Water: The Key to New Energy Cavitating Electrolyzers & Zero-Point Energy

by Moray B. King

Cars and generators, that seem to run on water? Sounds impossible! Yet inventors some times stumble across huge energetic phenomena, which they unwittingly attribute to hydrogen as they explore water electrolyzers, Brown's gas, HHO and hydroxy. This book culminates ten years of research and discloses a surprising new explanation... In an engine's combustion chamber water nanobubbles or fog particles convert to microscopic ball lightning when subjected to a wide plasma abrupt electric discharge. For a few milliseconds thousands of tiny plasmoids manifest a huge anomalous force on the piston. The plasmoids self-accelerate due to their coherence with the quantum vacuum's zero point energy. The behavior mimics a thunderclap. Herein offers a path for inventors: Just create the conditions of a thundercloud in an engine's combustion chambers!.

2022 ExtraOrdinary Technology Conference

Albuquerque, NM • August 10- 14

Conference Early PreRegistration Form

Information so HOT... it NEEDS to be Suppressed!

Register by Jul 15, 2022 for 25% Discount on Registration!

Nikola Tesla set the stage for unparalleled technological advances in the 20th Century and the new millennium. In the tradition of Tesla, many of our researchers will be presenting new concepts that go against the status quo. Speaking slots are limited with priority going to those who have WORKING HARDWARE! We challenge you to come and see many of these advanced concepts demonstrated at this conference.... *many of them are so unbelievable, you have to see them for yourself!!!*

- Tesla Technology
- Tesla Coils
- High Energy Physics
- Scalar Technology
- Alternative Energy
- Fuel Saving Products
- Alternative Medicine
- New Health Products
- Extreme Physics

Get inside technical information you won't find on the internet!

Conference Notes:

- **Video Recordings.** DVDs will be available during and after the conference. *Private taping is not allowed.* Conference fees do not include DVDs.
- **Family Discounts.** Spouse rates available to immediate family accompanied by *members*.
- **Individual Sessions.** Individual session rates are available at the door on a *space available* basis only.

- **Hotel: Crowne Plaza...** includes free breakfast buffet and free internet.. This **IS** the best price/ service combination possible and convenient..

Make your reservations early at TeslaTech's special group rate starting at \$82 per nite.

- **Refund Policy.** Exchange only.. no cash refunds. Service fee of \$25 on all refunds. Refund credit for goods/services offered by TeslaTech only.

Cancellations after Jul 31, 2022 & "No Shows" are non-refundable

Conference PreRegistration Rates

Type Attendee	Rate	# Att	Cost
Member/Nonmember	\$ 399.95		
Spouse	\$ 349.95		
Students	\$ 299.95		
Teens (19 and under)	FREE		
Wed Workshop	\$ 49.95		

List spouse/student/additional attendees:
