## Mustafa Emre Inan

I was born in 28 may 1994 in Turkey . I gruduated from FSM University Architectural and Design Faculty in Istanbul . I can speak Turkish ( Native ), English ( Fluently ) and Espanol ( B1 ). I had been as an interner at Agaoglu Maslak 1453 Site for 9 mounths . After gruduated from university i went to Dubai for my first architectural vision researching for 1 year as an architect . After than i come back to Turkey and i started to prepare architectural design and application projects . I will show you this 11 projects at this portfolio .

Thank you

# OD VILLA

## Description.

This project was the result of our excellent teamwork. We have carefully chosen the levels, colors and textures of the facade. With the movement on the entrance facade, we have given a fluid appearance.

# GEDIK TWIN VILLAS

## Description.

In this project, our customer requested 2 twin villas at different levels. There was a big difference in level and I aimed to use the difference in the most efficient way. I love to take advantage of the difference in elevation because it gives us the opportunity to capture a beautiful view most of the time. All villas had to capture the most productive view and I achieved this in this project.

## CAR GALLERY SITE

### Description.

This is my only industrial project. A car dealership site consisting of 259 shops, each with 2 floors. I designed open and closed exhibition areas on the lower floors and office units on the upper floors. It has been a very enjoyable project for me.

# FA BUILDING SITE

## Description.

In this apartment complex project, the employer asked me to design a facade considering the cost of the facade. In such cases, I prefer to use floor mopping, joint gaps and sometimes wooden laths. I applied this in my project as well.
