

ALLEGRO MISR

**Allegro For Export, Manufacturing
And General Trading**

Allegro for export, manufacturing and general trading is an Egyptian owned company growing (our own farms), packing and frozen vegetables & fruits.

Our Expertise is based on more than 20 years of experience in highly demanding and competitive sector frozen vegetables & fruits. Allegro is proud to be one of the biggest growers companies in Egypt, a financially stable organization where our core values are integrity, transparency and partnership.

Our Mission

We in Allegro are committed to provide high quality and competitive products through our experienced team. We do believe that our mission will only be accomplished by our authentic management system.

Our Commitment

Fresh produce is often a tricky industry to work in and requires a great deal of commitment from a first class team to get it right.

Our Destination

We are proud of having a long list of customers who show a great deal of interest in our products all over the world. They are mostly from the demanding supermarkets of Western Europe, Asian Countries, Russia, Far East Countries, Gulf Area countries as well as the arising African markets.

Our Farm

Our Farms are of the most fertile and fresh soil in Egypt which guarantees the best quality of fresh fruits and vegetables.

Our Customer

We do what we say and we say what we do, we respect our customer, we don't just talk about quality and transparency, we live it.

Our Frozen Product

Enjoys a rich and diversified products basket of frozen fruits range, vegetables range.

Strawberries:

The product which contain multivitamins so it considered as treasure, we keen to supply this one during all the year as it is demanded by most of partners regarding to its value so we proud to offer it in best high stander quality. Strawberries are supplied to us by specialized plantations which apply the best techniques known in the agricultural field during and after planting and at harvest.

Mango:

Sliced mango is manufactured from selected fully ripe mangoes thermally processed and aseptically frozen for retaining color, taste, flavor and aroma of the fresh mango.

Pomegranate:

Pomegranate is harvested at the peak of the season to ensure you are getting only an extra fine fruit. Only best quality pomegranate having appropriate ripeness are chosen. Each piece is washed, cut, deseeded and seeds are quick frozen.

Guava:

Guava is a common tropical fruit in many tropical and subtropical regions, Psidium. Although related species may also be called guavas, they belong to other species or genera such as the pineapple guava.

Molokhia:

Fresh leaves are finely pulled and cut by the most advanced machinery guaranteeing a defect-free product that is free of additives and chemicals.

Okra:

Fresh Okra in maturation stage, prepared by removing crown, thorough washing, thermal treatment (enough to deactivate oxidation enzymes)

Okra Extra
Okra Zero
Okra Momtaza (fine)
Okra One

Mix vegetables:

A mixture of peas and carrots, green beans and corns that have been specially cultivated for this purpose rich in mineral salts, vitamins and dyes that increase the nutritional value needed by the human body.

Peas:

They are picked when they are fresh and tender. Peas washed to grant 100% clean product and quickly frozen to maintain their taste.

Green beans:

Green beans are known for being fresh, tender free of veins and especially tasty manufacturing is carried out in two methods whole beans and cut beans.

Spinach:

Spinach Leaves are processed with the utmost care to minimize damage. They are frozen and packed straight away to preserve their best possible taste, smell, and nutritional properties.

Cauliflower:

We select the most tender product. The small flowers are then washed, blanched and immediately frozen in order to preserve all their natural nutritive and taste characteristics.

Broccoli

Broccoli processing is being executed by the most modern techniques to preserve its good shape and length of stems. Manually trimmed, washed, blanched and immediately frozen to keep its vitamins mainly existing in its stem.

Colocasia:

Colocasia is a genus of flowering plants in the family Araceae, native to southeastern Asia and the Indian subcontinent. Some species are widely cultivated.

Artichokes:

Our artichokes are selected among the best quality free of any filaments or insect's damage.

Eggplants:

After a strict selection of the best eggplants varieties, they are sorted washed, cut, grilled and then immediately frozen in order to preserve all their natural nutritive and taste characteristics.
