antodi

Your Trusted Partner for Industrial IoT & Automation Solutions in Saudi Arabia

✦ Empowering Industries with Smart IoT Solutions

Antodi Logic provides cutting-edge IoT solutions tailored for industrial automation, seamless system integration, and intelligent monitoring. Whether you manage a large-scale manufacturing plant or a smaller industrial facility, our expertise ensures that your operations run smoothly,efficiently, and with minimal downtime.

Our Solutions

Seamless IoT Integration & Centralized Dashboard

Connects industrial machinery, sensors, and control systems to a single, intuitive dashboard that provides real-time insights, operational data, and alerts.

This eliminates silos and enhances decision-making across all levels of your organization.

Real-time Data Monitoring & Alerts

Enables operators to track equipment performance, environmental conditions, and operational efficiency from anywhere. Get instant alerts for anomalies, ensuring a proactive response to potential issues before they escalate.

Edge Computing for Uninterrupted Operations

Our edge computing capabilities ensure that critical functions continue even when internet connectivity is lost.
This allows local data processing and automation to run without delays, avoiding costly disruptions.

Preventive & Predictive Maintenance

Reduce unexpected failures and extend asset lifespan. Our preventive maintenance solutions automatically schedule routine servicing, while predictive maintenance uses advanced analytics to detect early signs of equipment wear and prevent costly breakdowns before they happen.

Why Antodi Logic ?

Founded by Former Tesla Engineers

Our leadership team consists of ex-Tesla automation and controls engineers, bringing world-class expertise in industrial automation, robotics, and IoT implementation.

Local Expertise

Deep understanding of Saudi industrial environments and regulatory requirements.

End-to-End Support

From initial setup to long-term optimization and maintenance.

Secure & Reliable

Industrial-grade security and compliance with global standards.
