

Atlas Global Installers LLC

AGI's Comprehensive 25
Year Workmanship Warranty

The Longest Workmanship Warranty in the Industry!

AGI LLC Offers The Only 25 Year
Workmanship Warranty in The Industry!

*Why...because we are the best at what we do!
And...we know it's not just a house, it's your HOME!*

Experience

- When it comes to installing solar, experience matters.
- AGI's teams of installers have more than 50 years of combined experience.
- We talk you through each step along the way.
- Our installers are happy to share their insights and expertise with our homeowners.
- All points of the install are completely transparent and free for your approval.

Freedom

- The freedom of never having to worry about the safety and function of your system.
- Freedom of knowing that this warranty applies to the residential customer named in the solar system installation agreement.
- However, if you sell your home, or the installation premise has been transferred, AGI will transfer this workmanship warranty to the new owner of the premise for the balance of the warranty period on the same terms.

Protection

- You are PROTECTED!
- With Atlas Global Installers LLC, we offer an unmatched 25 year warranty on the installation services relating to our solar systems. This means that if a solar system installed by us fails or breaks within 25 years due to defective performance of our installation services we will fix it or replace it free of charge.
- In the event of a natural disaster in which your system needs to be replaced, your 25 year AGI warranty will start all over again.

Knowing

- Properly installed solar panels will not void any existing warranty that you have on your roof, and the work done to install your panels is fully covered under AGI's installers warranty. Solar panels can actually extend the life of your roof by protecting it from wear and tear caused by the elements.
- What if AGI was to go out of business? The most important components of your system – the equipment – will still be covered by manufacturer warranties, even if AGI isn't around to honor our workmanship warranty. In the unlikely event that there is an issue with the workmanship for your solar install, it will become apparent immediately.

Coverage

- If or when AGI penetrates your roof during a System installation we will warrant roof damage AGI caused due to our roof penetrations. This roof warranty will run the longer of (A) one (1) year following the completion of the System installation; or (B) the length of any existing installation warranty or new home builder performance standard for your roof (the “Roof Warranty Period”).
- Your AGI contract includes a roof warranty, which protects your roof from leaks or holes. Not all solar companies offer a comprehensive warranty like AGI.

Electrical

- AGI follows all standards and guidelines according to the (NEC) National Electric Code. All wiring, panels, conduit, fuses, buses, breakers and boxes, meet or exceed NEC requirements.
- AGI fully warrants any failures directly related to the installation of the electrical portions of the Solar PV System.
- All connections and installation of electrical components will be fully documented.
- Any electrical issues known PRIOR to installation, must be made known to AGI.
- AGI will likewise, make known any defects or hazards PRIOR to your installation.

Nature

- Mother nature can and sometimes does impact Solar PV Systems located on rooftops or ground mounts. AGI cannot warranty against these acts of God.
- Any extreme weather for the location in which the system was installed, including but not limited to: wind, lightening, fire, floods, power surges, pest damage, hail, falling debris, land or building movement etc. AGI cannot be held liable for such acts of nature.

Exclusions

- Improper use of the solar system.
- Failure to comply with manufacturer instructions or precautions.
- Work on the system (including modifying, moving or relocating any part of the system, even if temporary) performed by someone other than an AGI installer.
- Failure to adhere to maintenance requirements set out by the installer.
- Any act, omission, misuse, abuse, or damage (whether willful, accidental or negligent) caused by the customer or a third party.

Caring

- You are in good hands with Atlas Global Installers LLC. We actually DO CARE about our customers and see each installation as the beginning of a long-term relationship. You will know this from day one and your first interaction with any of our team members. Respect, honesty and integrity are critical to our success and your satisfaction.
- Things do happen, however. When they do, we ask that you give us the opportunity to resolve any issues. Even if AGI is not at fault, we will be glad to assist in any way possible.

Maintenance

- Solar panel maintenance is minimal, but important because insufficient care for solar panels can reduce the amount of energy that these panels generate for your home. Since a solar panel system needs to absorb energy from the sun, the most vital component of solar panel care is to keep the panels clean.
- AGI offers a variety of ongoing maintenance, cleaning, monitoring and system checks which are available to the homeowner at minimal cost. Please ask your AGI rep for more information.

Monitoring

- Most all systems are set up for monitoring performance, even from your own handheld devices.
- You can keep track of how much energy is being produced by your solar panels.
- Monitoring systems can show you how you are benefiting the environment, such as lower amounts of CO2 emissions.
- Diagnose problems through your monitoring system. Many of these devices will tell you which areas of your solar panel are not functioning properly and need repair. AGI monitors each system and will alert the customer to any issues that need attention.

Insurance

- Make sure you immediately notify your insurance company of your new Solar PV System. Add the system to your policy immediately to avoid any losses due to lack of coverage.
- AGI cannot and will not be held liable for any uninsured Solar PV System.
- Most rooftops are already over-insured so the cost of adding solar is usually quite minimal.
- Protect your investment now! Don't delay!

Thank You!

We know that when it comes to choosing your Solar Installer, you have lots of choices. We sincerely thank you for choosing AGI. We know you will be pleased with the results!
