

PROVIDER OF INNOVATIVE
MOLECULAR TESTING SOLUTIONS
RESPIRATORY | UTI | WOUND | STI
VAGINITIS | ANTIBIOTIC RESISTANCE

RAPID
•
ACCURATE

Precision Microbio

Questions and Answers

What does Precision Microbio do?

We install molecular testing labs in physician offices for Urinary Tract Infection, Wound Infection, Respiratory Infection, and Vaginitis. We handle licensing, equipment, SOPs, and personnel selection and training.

Who do we serve?

Our physician clients are Urologists, OBGYNs, Primary Care, and Urgent Care with 10 or more samples per workday. Hospital and Reference Labs as well.

Why would a physician install their own lab for this testing?

The molecular testing is very rapid (within 1 hour) and accurate for specific pathogens and antibiotic resistance markers.

What are next steps?

We first prepare a comprehensive information sheet. Then formal contracts are made, and installation and training are scheduled.

A room about 10' by 12' is needed.

Typical setup takes 2 to 3 months after contracts are signed.
