### **Copyright Registration**

---

Copyright is a type of intellectual property protection such as trademarks and patents. Copyright registration is done in accordance with the Copyright Act of 1957. With the copyright registration, you become the legal owner of your creative work regarding books, paintings, music, website, etc. Registering copyright with the authority ensures that the author's creative work cannot be copied. No person may use the same without the permission of the author or creator. The author has the right to charge others for using or changing his work. The copyright registry protects the inventor's rights from infringement.

In India, registration gives its owner exclusive and individual rights to distribute, replicate, reproduce, or authorize another entity for the work. It offers many rights: communication to the public, rights of reproduction, adaptation and translation of the work. However, ideas, procedures, methods of operation or mathematical concepts cannot be copyrighted.

---
