

BEEHIVE UTAH NET – SUMMER VERSION

Calling the Beehive Utah Net. Calling the Beehive Utah Net. This is _____, Net Control Station.

The Beehive Utah Net meets daily at 1830 hours UTC on 7272 KHz. The Beehive Utah Net is a Section Level Net in the National Traffic System, and exists for the purpose of handling traffic. Stations checking into the Beehive Utah Net should be willing to handle traffic. Emergency traffic will be accepted at any time. This is a directed net. Stations are not to transmit unless directed to do so by the Net Control Station. A station may get on the roll by checking into the net 20 times in any calendar month. To remain on the roll, a station must check in 10 times during a calendar month. Any station with formal traffic for the net, check in now. Over.

Unless otherwise directed by Net Control, all stations are to remain on frequency until after roll call and all traffic has been listed. Relays will be accepted after roll call. The following is roll call:

This is _____, Net Control Station of the Beehive Utah Net. Any station with traffic not yet listed, please report into the net now. Over.

This is _____, Net Control Station of the Beehive Utah Net. I have traffic listed as follows:

(Assign any remaining formal traffic.)

This is _____, Net Control Station of the Beehive Utah Net. Late or missed member stations, please report into the net now. Over.

This is _____, Net Control Station of the Beehive Utah Net. Any station wishing to report into the net, please do so now. Over.

This is _____, Net Control Station of the Beehive Utah Net. The net is now free at _____ hours. Please keep this frequency clear until after I have given my report to the Net Manager, then we will take care of the scheduled informals.
