

the *Beaumont*

*The ease and flow of the ever-popular split level design is perfected in the Beaumont. Enter a large and welcoming foyer, step down into a dramatic sunken living room, or an impressive recreation room, the highlight of which is a magnificent brick fireplace wall that stretches the entire length of the room. A large, separate dining room leads into an up-to-the-minute kitchen with separate breakfast room. Still on this first level, a powder room and laundry room. Upstairs: your choice of 4 bedrooms plus an unbelievable master suite with sitting room and dressing room, or 5th bedroom, 2 additional baths with vanities, and closets galore. Large attic storage area, basement, garage and air conditioning.*
