REACH STATEMENT

CP Oat Avenanthramide Extract is currently out-of-scope for registration requirements under the REACH Regulation (EC 1907/2006).

Ceapro Inc. does not currently ship any substances into Europe under the scope of REACH registration over the one-ton threshold. Ceapro's products, therefore, can be imported by European customers without requiring pre-registration or registration.

Ceapro will pre-register and register substances as required when they breach the one metric ton threshold required under the regulation.

Substances that are naturally sourced (such as extracts) that do not undergo a chemical change during the manufacturing process are exempt per REACH Article 2.7(b) as they fall under Annex V. paragraph 7 as being a natural substance.

No natural substance exemption can be used where a chemical change may occur (as in the case of hydrolyzation to obtain peptides). However, as all substances are currently shipped in quantities less than one metric ton per year, no registration is currently required by Ceapro.

Yours sincerely,

Emily Wong

Quality Manager,

Ceapro Inc., a subsidiary of COSCIENS Biopharma
