

Experience is the basis of innovation.

# TeLiCa

The new digital video-telescope with LED

# OPTEC

The new **TeLiCa** concept combines a rigid telescope with a powerful LED light source and a digital HD-CMOS Chip on the distal end. Connect it to any PC, laptop, tablet or mobile phone via the USB port to stream your video and document it on your connected devices. TeLiCa doesn't require any special software

It is the perfect system for all veterinary applications.

- Video Telescope with USB interface
- High resolution CCD at distal end
- 180 mm working length
- Diameter 2.7mm or 4mm
- Works with any PC, laptop, tablet, or mobile
- Remote button for recording
- Integrated LED light
- Attachable working channel
