

How to make and attach a HANGING SLEEVE for quilts.

Cut fabric into 9" strips.

Sew them together end to end for the length the width of your quilt.

Fold the 9" ends under 1/4" twice to hem each end.

Fold the sleeve length wise wrong sides together and press with iron to mark the center.

Open and refold raw edges to the center fold mark that you just made. Then press both folded edges.

Sew a 1/4" seam wrong sides together the length of the sleeve. ***Back stitch both ends to secure..

Press the seam open without removing the previous pressed edges. The sleeve will now have a convex opening for hanging.

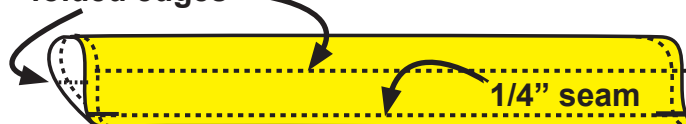

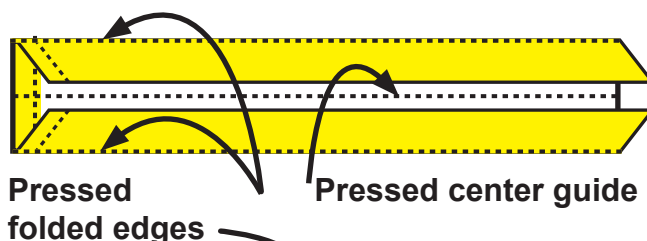

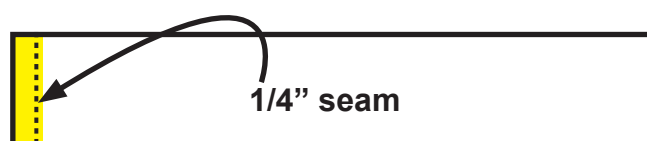

Pin sleeve along pressed edges to back of the quilt about 1/2" from the top of the quilt. Hand sew the top and bottom of the sleeve to the quilt backing. Do not stitch through the front.

Approximately 4" will be sewn down on the quilt

9" X WIDTH OF QUILT

On large quilts, the hanging sleeve must be placed so the bottom of the sleeve is 90" from the bottom of the quilt.

Failure to properly place the sleeve could result in the quilt touching the floor.
