

Cardn Pay

Processing Network

**360 PAYMENT
MADE EASY**

CardnPay 360 Payments, combines state-of-the-art payments technology, processing services and partnership with Mastercard, the world's foremost payments brand. The service is designed to meet the specific needs of all manner of financial services providers in the Caribbean and Latin American region including: credit unions, development banks, commercial banks, finance companies, payment solution providers, merchants and independent terminal deployers.

The CardnPay processing network is PCI-DSS certified, EMV-compliant and uses PA-DSS payment technology. With operations centers in the Caribbean and Canada, CardnPay's network is fully-secure, robust and scalable to meet the demands of all modern payment delivery requirements.

Please contact us to learn more about how CardnPay makes payment easy.
