

Discipleship Checklist

If you are working with people, it helps to chart your course of training. You will notice in the evaluation that you can score anywhere from a one to a five. The reality is that people are always in-process in growth areas and this helps people to honestly evaluate where they are and what steps need to be taken next.

To score yourself, use the following scale. Look up the reference verse listed and then compare your actions to that action or teaching.

1--I have not even heard of that command--Exposure

2--I have heard of it but I don't understand it--Exposure/Experimentation

3--I have heard of it and am trying to figure out what to do next--Experimentation

4--I am able to put this into practice sometimes--Experience

5--This is a consistent part of my life--Experience/Expert
