

We are continuously working to improve the accessibility of content on our website. Below, you'll find a few recommendations to help make your browsing experience more accessible:

If you have trouble seeing web pages, the [US Social Security Administration](#) offers these tips for optimizing your computer and browser to improve your online experience.

- [Use your computer to read web pages out loud](#)
- [Use the keyboard to navigate screens](#)
- [Increase text size](#)
- [Magnify your screen](#)
- [Change background and text colors](#)
- [Make your mouse pointer more visible](#) (Windows only)

If you are looking for mouse and keyboard alternatives, speech recognition software such as [Dragon Naturally Speaking](#) may help you navigate web pages and online services. This software allows the user to move focus around a web page or application screen through voice controls.

If none of the recommendations above are helpful to you, please call our office and we will be happy to assist you in filling out any forms, or read any of our website content to you.
