

INTRODUCING:

EMPLOYER RETURN TO WORK PROGRAM

As states slowly begin to lift their shelter-in-place orders, businesses of all sizes are being left to consider when and how to move forward in a way that ensures the health and safety of both their employees and their business. Two sobering statistics released by the CDC illustrate the challenge for employers and employees alike in re-opening their physical operations: **40% of all coronavirus transmission is occurring before people feel sick**; and most difficult, **up to 35% of all coronavirus patients never experience any symptoms**.

Understanding this challenge, we have leveraged our relationships with the healthcare community to create a turnkey employer-based testing solution that provides on-demand access to FDA-authorized virus and antibody testing for all employees. While each employer's post COVID-19 business plan, timeline and office re-openings will be unique, access to a universal employee testing program will be critical in protecting the health and safety of your business and establishing renewed confidence with your employees.

PROGRAM OVERVIEW

Which COVID-19 Virus Test with FDA EUA Approval Is Included in the Program?

We have partnered with Vault Health to provide employees with an At-Home COVID-19 Virus Tests (saliva test) that includes a guided test experience with the assistance of a telehealth nurse.

Which COVID-19 IgG Antibody Detection (Serology) Test Is Included in the Program?

We have partnered with LabCorp to provide employees with Antibody Detection blood tests at more than 1,000 LabCorp patient centers nationwide.

Do Employees have to Display Current COVID-19 Symptoms or Feel Like They Already had COVID-19 to be Tested?

No. Tests from both Vault Health and LabCorp are administered under the order of an in-house physician. Both companies and their medical staffs have determined that an employer-sponsored return to work testing program complies with CDC test guidelines for both virus and serology testing.

What other Services can be Included in the Return to Work Program?

In addition to testing, we have created 3 unique kits that are designed to communicate critical information on your company's unique return to work strategy along with guides to promote ongoing safety practices and safety gear for employees to use in their return to the workplace.
